*Spinoza and Education* Johan Dahlbeck, 2016-11-25 Spinoza and Education offers a comprehensive investigation into the educational implications of Spinoza's moral theory Taking Spinoza's naturalism as its point of departure it constructs a considered account of education taking special care to investigate the educational implications of Spinoza's psychological egoism What emerges is a counterintuitive form of education grounded in the egoistic striving of the teacher to persevere and to flourish in existence while still catering to the ethical demands of the students and the greater community In providing an educational reading of Spinoza's moral theory this book sets up a critical dialogue between educational theory and recent studies which highlight the centrality of ethics in Spinoza's overall philosophy By placing his work in a contemporary educational context chapters explore a counterintuitive conception of education as an ethical project aimed at overcoming the desire to seek short term satisfaction and troubling the influential concept of the student as consumer This book also considers how education from a Spinozistic point of view may be approached in terms of a kind of cognitive therapy serving to further a more scientifically adequate understanding of the world and aimed at

combating prejudices and superstition Spinoza and Education demonstrates that Spinoza's moral theory can further an educational ideal where notions of freedom and self preservation provide the conceptual core of a coherent philosophy of education As such it will appeal to researchers academics and postgraduate students in the fields of philosophy of education theory of education critical thinking philosophy ethics and Spinoza studies Teaching in Unequal Societies John Russon, 2021-12-30 This book considers teaching in modern institutional settings among other things as the ethical questioning and reversal of passively accepted prejudices particularly in contexts of diversities and inequalities Its thematic focus is the ethics of teacher learner and learner learner relationships within the democratic setup and the possibilities of critique and transformation emerging out of such a relationship The first theme of the book is diversity and pluralism the second is the question of inequality in such contexts of radical diversity With respect to this question an unavoidable phenomenon of our times is the capitalisation of education and the reductionist view of learners as customers and consumers of knowledge The approach to education that sees students merely as skilled human resources to be readied for the job market militates against critical thinking and do not respond appropriately to the questions of diversity and inequality Thus a significant focus of the book is the impact of inherited inequalities of caste and race on classroom ambience and teachers interventions in the modern institutional context The pertinent question is the increasing unwillingness of teachers to recognise and challenge discriminatory views and play their role in social transformation In this regard the teaching and learning of the humanities is also investigated Teaching and the traditional classroom it is often said may not be required in the future as machines and remotely located teachers explicators might claim their place Hence another question of focus is whether such a future would be hospitable to the critical task of education to cultivate young citizens of democracies
