Globalization Marcelo Suarez-Orozco, Desiree B. Qin-Hilliard, 2004-04-01 Globalization defines our era While it has created a great deal of debate in economic policy and grassroots circles many aspects of the phenomenon remain virtual terra incognita Education is at the heart of this continent of the unknown This pathbreaking book examines how globalization and large scale immigration are affecting children and youth both in and out of schools Taking into consideration broad historical cultural technological and demographic changes the contributors all leading social scientists in their fields suggest that these global transformations will require youth to develop new skills sensibilities and habits of mind that are far ahead of what most educational systems can now deliver Drawing from comparative and interdisciplinary materials the authors examine the complex psychological sociocultural and historical implications of globalization for children and youth growing up today The book explores why new and broader global visions are needed to educate children and youth to be informed engaged and critical citizens in the new millennium Published in association with the Ross Institute

**Montessori for the New Millennium** Roland A. Lubie Wentworth, Felix Wentworth, 2013-09-05 Although Montessori s name is almost universally known in education circles today and there are countless nursery schools throughout the world using the Montessori Method the real core of her thinking has remained largely misunderstood Most people regard the method as a system for the education of very young children And most who have some direct experience of it either as parent or teacher would regard it as involving a certain set of procedures and specialized educational materials with clear and elaborate instructions for their use However the essence of Montessori s philosophy of education is in reality far broader than this and contains a powerful message for educators everywhere What is less well known about Montessori s work is that she began by establishing the effectiveness of her approach at the pre elementary level but also strongly encouraged the extension of her method to the higher levels of education Wentworth s purpose in writing this book is to elucidate this vital aspect of Maria Montessori s life s work and to show how it applies to real life teaching situations She believed that by transforming the process of children s education she could help to transform the attitudes of the adults they will later become and so those of society and the world at large a message she promoted as vitally relevant to the future of humankind as a whole

demonstrate realistic approaches to achieving the aims of access and quality discussed throughout the book The authors draw on their years of experience as practitioners in both private and public institutions liberal arts colleges and research universities to develop their material This volume will be of interest to faculty and students in higher education programs nation and state public policymakers legislative and academic leaders and a general public concerned about the cost and value of a college education     Resources in Education ,2001-04     *Educating Ethical Leaders for the Twenty-First Century* Walter Earl Fluker,2013-02-19 The contributors to this book address the theme of educating ethical leaders for the twenty first century They represent a wide range of fields including philosophy theology law science and medicine They all share the belief however that ethical leadership education is necessary in order to provide the next generation of leaders with the tools that they will need to successfully navigate the challenges of today and of the coming decades These essays identify significant issues and challenges confronting leaders students and educators from many different backgrounds cultures and communities who must negotiate the difficult matters of tolerance respect and appreciation of difference and the development of ethical student leaders and educators within specific environments who will promote habits and practices that create communities of discourse and practice that address the challenges of diversity and culture Contributors Derek Bell Walter Earl Fluker Shirley Ann Jackson James A Joseph Melvinia King Preston King Bryant Marks Walter E Massey David Satcher Tavis Smiley     **Brookings Papers on Education Policy: 2001** Diane Ravitch,2010-12-01 Published annually Brookings Papers on Education Policy BPEP analyzes policies intended to improve student performance In each volume some of the best informed analysts in various disciplines review the current situation in education and consider programs for reform In this fourth annual issue of the series prominent educators and other social scientists discuss standards in education Contents include Incentives and Equity under Standards Based Reform Julian R Betts and Robert M Costrell Why Business Backs Education Standards Milton Goldberg and Susan Traiman State Academic Standards Chester Finn Jr and Marci Kanstoroom Searching for Indirect Evidence for the Effects of Statewide Reforms David Grissmer and Ann Flanagan The Controversy over the National Assessment Governing Board Standards Mark Reckase The Role of End of Course Exams and Minimum Competency Exams in Standards Based Reforms John H Bishop Ferran Mane Michael Bishop and Joan Moriarty A Diagnostic Analysis of Black White GPA Disparities in Shaker Heights Ohio Ronald F Ferguson     **Sign Language Interpreting and Interpreter Education** Marc Marschark,Rico Peterson,Elizabeth A. Winston,Patricia Sapere,Carol M. Convertino,Rosemarie Seewagen,Christine Monikowski,2005-04-14 More the 1 46 million people in the United States have hearing losses in sufficient severity to be considered deaf another 21 million people have other hearing impairments For many deaf and hard of hearing individuals sign language and voice interpreting is essential to their participation in educational programs and their access to public and private services However there is less than half the number of interpreters needed to meet the demand interpreting quality is often variable and there is a considerable lack of

knowledge of factors that contribute to successful interpreting Perhaps it is not surprising then that a study by the National Association of the Deaf NAD found that 70% of the deaf individuals are dissatisfied with interpreting quality Because recent legislation in the United States and elsewhere has mandated access to educational employment and other contexts for deaf individuals and others with hearing disabilities there is an increasing need for quality sign language interpreting It is in education however that the need is most pressing particularly because more than 75% of deaf students now attend regular schools rather than schools for the deaf where teachers and classmates are unable to sign for themselves In the more than 100 interpreter training programs in the U S alone there are a variety of educational models but little empirical information on how to evaluate them or determine their appropriateness in different interpreting and interpreter education covering what we know what we do not know and what we should know Several volumes have covered interpreting and interpreter education there are even some published dissertations that have included a single research study and a few books have attempted to offer methods for professional interpreters or interpreter educators with nods to existing research This is the first volume that synthesizes existing work and provides a coherent picture of the field as a whole including evaluation of the extent to which current practices are supported by validating research It will be the first comprehensive source suitable as both a reference book and a textbook for interpreter training programs and a variety of courses on bilingual education psycholinguistics and translation and cross linguistic studies

*Transforming Education for Peace* Jing Lin, Edward J. Brantmeier, Christa Bruhn, 2008-06-01 Currently peace education remains marginalized in our education system however a united front can be formed and powerful paradigms can empower educators to play a critical role in peace building through scholarship practice and activism Indeed educators around the world are developing effective strategies to transform education as a powerful force for global peace The diverse array of contributors in the book demonstrate that educators as peace makers can be and have been instrumental in transforming social forces the self and others for the construction of global peace The book aims to broaden the educational discourse in order to make room for new visions to educate future generations for peace Local and global efforts to build a long lasting peace are presented through the lens of education The timeliness of peace education surely renders this book
