Education And The Presidency:

The Presidency and Education Kenneth W. Thompson, 1990 **American Presidents and Education** Maurice R. Berube, 1991-06-30 The role of the president of the United States in regard to education changed significantly following the end of World War II As the U S economy became more sophisticated and the country emerged as the dominant technological and world power the demand for an educated work force increased In this work Maurice R Berube offers the first comprehensive analysis of the involvement of American presidents in educational policy tracing the efforts of administrations from Washington to Bush and chronicling the national and international pressures to shape educational policies that have characterized the post World War II era Berube s work takes the form of a policy study as he analyzes presidential programs in education the reasons for their implementation and their correlation to national educational outcomes Beginning with the birth of the presidency he examines successful programs that had a considerable impact and less successful efforts that were significant either ideologically or as forerunners of future policies The constitutional constraints of the president s role in education are explored as well as recent developments including the corporate presidency and the rhetorical presidency Among the other issues addressed are education and the economy and the federal and state constitutions views of a right to education This work will be a unique and valuable resource for students of presidential history the politics of education and contemporary issues in education as well as an important addition to public and academic library collections **Education and the Presidency** Chester Evans Finn, 1977 **Education and the Presidency** ,1977 *Presidents, Congress, and the Public Schools* Jack Jennings, 2015-03-01 April 2015 marks the fiftieth anniversary of the Elementary and Secondary Education Act ESEA the landmark legislation that has provided the foundation of federal education policy in the United States In Presidents Congress and the Public Schools longtime policy analyst Jack Jennings examines the evolution of federal education policy and outlines a bold and controversial vision for its future Jennings brings an insider s knowledge to this account offering a vivid analysis of federal efforts in the education arena and revealing some of the factors that shaped their enactment His rich descriptions and lively anecdotes provide pointed lessons about the partisan climate that stymies much federal policy making today After assessing the impacts of Title I and NCLB and exploring the variety of ways that the federal government has intervened in education Jennings sets forth an ambitious agenda for reframing education as a federal civil right and ensuring that every child has the opportunity to learn Letters to a Serious Education President Seymour B. Sarason, 2005-12-08 Letters to a Serious Education President provides sound advice for what it would take to provide all students in the United States with a high quality education There is wisdom and profound insights about how to improve public education in these letters and of course Sarason offers lots of common sense Pedro Noguera Professor The Steinhardt School of Education New York University Letters to a Serious Education President underscores the brilliance of Sarason s observations about what is and continues to be missing in how we conceptualize and hence implement schooling in our

society Indeed Sarason is calling for a different education one that enlivens the curiosity and lifelong learning of all children and their teachers Rhona Weinstein Professor University of California Berkeley In this new edition of his original insightful collection of letters to the first president of the 21st century education luminary Seymour B Sarason details how school reformers still have difficulty examining the differences between contexts of productive and unproductive learning Originally written nearly 13 years ago these letters are even more relevant in today s era of extreme mandates and accountability measures It is in this context where Sarason s acute insight into why school reforms are failing that we must turn to the fundamental question of how we are teaching and supporting all students Sarason s seemingly simple focus emphasizes that we must start with what and where children are inspiring and encouraging their natural curiosity for learning Detailed within is coverage of An educational agenda beginning with children The need for both repair and prevention in education How classrooms extinguish curiosity Educator preparation program reform School downsizing Dropping out as a response to an uncaring school culture A critique of the No Child Left Behind Act and more Sarason s analysis and powerful letters are packed with humor common sense practical advice and recommendations for reaching students in today s classrooms They distinguish between the typical rhetoric of educational change and the necessary actions that affect present and future generations of students

The White House and Education through the Years M. Scott Norton, 2018-05-01 The book sets forth the early developments established by colonial leaders to place public education in the forefront of their new America The ups and downs of the educational perspectives of the many national leaders demonstrate the important issues and problems that have faced and are facing the improvement of public education nationally Although every effort is made to stay clear of the politics that are encountered in educational policy its influence on educational matters such as control funding improvement purpose and availability is readily recognized in the views and contributions of the nation s presidential leaders Although the book is not a history of a president s life or a history of a president s personal education many books have been written on these topics this book focuses on the educational views and personal contributions of the presidents to the maintenance and improvement of K 12 and higher education in America from the colonial period to the present time

Jennings, 2015 In *Presidents Congress and the Public Schools* longtime policy analyst Jack Jennings examines the evolution of federal education policy and outlines a bold and controversial vision for its future He assesses the impacts of Title I and NCLB and explores the variety of ways that the federal government has intervened in education He concludes by setting forth an ambitious national agenda to ensure that every child has the opportunity to learn No one knows more about ESEA and especially Title I than Jack Jennings Here he tells a remarkably unbiased informed and crisp story

about the politics battles and decisions made by Congress over the past fifty years As Jennings makes clear the story is not over His conclusions propose a new and important course for Congress Marshall Mike Smith former under secretary U S Department of Education Jennings has written an admirably bold proposal for overhauling the federal role in K 12 education with an eye to both student learning and equity Arguing that NCLB has not lived up to its promise he presents a blueprint for an improved balance in the federal state relationship one providing flexibility and accountability His ideas merit serious attention and debate Elizabeth DeBray professor of educational administration and policy University of Georgia If you agree with everything in this book you probably didn t read it closely But if you don t read it you re missing a unique account of federal education policy from someone who was in the middle of it for decades Jennings offers a concise history and some ideas about new directions that show what federal education policy has accomplished and how much work remains Andrew J Rotherham cofounder and partner Bellwether Education Only Jack Jennings could have written this unique and important account of federal involvement in education Presidents Congress and the Public Schools is a must read contribution to American education policy that will stimulate important conversations about our future Gene Wilhoit founder and executive director Center for Innovation in Education and partner Student Achievement Partners Jack Jennings is the founder and former CEO of the Center on Education Policy He served for twenty seven years as a subcommittee staff director and then as general counsel for the U S House of Representatives Committee on Education and Labor Michael J Feuer is the dean and professor of education at The George Washington University and president of the National Academy of Education State Departments of Education, State Boards of Education, and Chief State School Officers Sam P.
