Philosophical Thoughts on Education

6 Philosophical Thoughts on Education

JOHN LOCKE- THE EMPIRICIST

- Education is not an acquisition of knowledge contained in the Classics. It is learners interacting with concrete experience. The learner is an active not a passive agent of his/her own learning.
- From the social dimension, education citizens participate actively and intelligently in establishing their government and in choosing who will govern them from among themselves. They are of the thinking that no one person is destined to be a ruler forever. This is in keeping with the Anti-Political Dynasty Bill.

SPENCER- THE UTILITARIANIST

- To survive in a complex society, Spencer favors specialized education over general education.
- "The expert who concentrates on a limited field is useful, but if he loses sight of the interdependence of things he becomes a man who knows more and more about less and less. We must be warned of the early peril of over specialist. Of course, we do not prefer the other extreme, the superficial person who every day knows less and less about more and more.
- Who is fittest survives, Individual competitions lead to social progress.
- The competition in class is what advocates of whole child approach and Socio-emotional Learning (SEL) atmosphere approach and Socio-Emotional Learning (SEL) atmosphere and Socio-Emotional Learning (SEL) atmosphere negate. Education and Thinking in Continental Philosophy Itay Snir, 2020-09-28 This book draws on five philosophers from the continental tradition Theodor Adorno Hannah Arendt Gilles Deleuze Jacques Derrida and Jacques Rancière in order to think about thinking and offer new and surprising answers to the question How can we educate students to think creatively and critically Despite their differences all of these philosophers challenge the modern understanding of thinking and offer original radical perspectives on it In very different ways each rejects the modern approach to thinking as well as the reduction of proper thought to rationality situating thinking in sociohistorical reality and relating it to political action Thinking they argue is not a natural automatic activity and the need to think has become all the more important as political reality seems to exhibit less thinking or to even celebrate thoughtlessness Bringing these continental conceptions of thinking
