Education Policy and Social Reproduction John Fitz,Brian Davies,John Evans,2005-11-16 This book takes a theoretically informed look at British education policy over the last sixty years when secondary schooling for all children became an established fact for the first time Comprehensive schools largely replaced a system based on academic selection Now under choice and competition policies all schools are subject to the rigours of local education markets What impact did each of these successive policy frameworks have on structures of opportunities for families and their children How and to what extent was the experience of secondary school students shaped and what influenced the qualifications they obtained and their life chances after schooling The authors locate their work within two broad strands in the sociology of education Basil Bernstein s work on the realisation of power and control in and through

pedagogic discourse and social reproduction provides a theoretical framework for exploring the character of and continuities and change in education and training policies The book is an important contribution to debates about the extent to which education is a force for change in class divided societies The authors also set out to re establish social class at the centre of educational analysis at a time when emphasis has been on identity and identity formation arguing for their interdependence This book will be an important resource for students policy analysts and policymakers wishing to think through and understand the longer term impact of programmes that have shaped secondary schooling in Britain and elsewhere

The Three Waves of Reform in the World of Education 1918 - 2018 Ami Volansky, 2023-01-01 This book reviews one hundred years of educational reforms worldwide Characterized by a tension between governing public and professional forces the waves of educational reform reflect myriad efforts to define and fulfill professional and public expectations for the world of education The first wave of reform based on progressive ideals spread across the globe after World War I striving to place the student at the center of the education process and respond to the diverse needs of children and youth in a world that included massive population shifts The second wave nearly obliterated the ideals of the progressive movement that had prevailed for sixty years Drawing its principles from the business world the second wave imposed competition uniform standards and measurable outputs on students teachers and schools even at the cost of harming at risk populations and encouraging the infiltration of private sector values into public education systems The third wave was launched at the turn of the twenty first century Seeking to adjust instructional methods to modern reality this reform rejected standardized curricula in favor of developing skills such as independent thinking curiosity innovation collaboration among learners and the ability to mine and process information Book I reviews the three waves of reform in the United States England Canada Japan Singapore Hong Kong Australia and Finland Book II focuses on Israel s education system past present and future

Economy, Work, and Education Catherine Casey, 2016-07-27 Economy Work and Education Critical Connections addresses effects of neoliberal capitalism in particular regard to work and education It reveals limits and paradoxes in macroeconomic policy imperatives toward knowledge based economies and learning societies and elaborates ensuing critical concerns and dilemmas It concludes with an exploration of innovative conceptions of social citizenship which may stimulate sources of a revitalization of work and education beyond singular economic imperatives

Policy, Discourse and Rhetoric Marie Lall, 2012-09-11 This is not yet another book on New Labour and neoliberalism but the only book which uses policy case study evidence to show the rhetorical nature of the commitment New Labour appeared to have been making to education Unlike other books on that era this one aims to review New Labour s time in government through specific policy texts This book reviews some of the major policy shifts in the education sector analysing selected case study policies in order to articulate dominant discourses in recent policy making which have helped establish a particular hegemony The book s originality lies in its policy analysis and case study base whereby key policy texts across different sectors are dissected using

the policy cycle framework allowing for an in depth analysis of the policy discourse as well as a discussion on how the neoliberal agenda was reflected and or promoted Education is often only perceived as limited to policies relating to schools and higher education However the book seeks to demonstrate that education as a sector is a much broader field and therefore the areas covered include key policies in citizenship and youth work widening participation in higher education the place of inclusive education in the curriculum the undergraduate medical curriculum and the effect of the Cox review on creativity In effect the broad selection of sectors demonstrates that New Labour s education policies were not only detrimental in traditional education settings but also affected areas such as medicine and the media which are of importance to those who no longer are affected by what happens in institutions of learning and teaching The book is consequently relevant for a much wider audience beyond the education community
