Education And Practice Upholding The Integrity Of Teaching And Learning:

Special Issue: Education and Practice Upholding the Integrity of Teaching and Learning Joseph Dunne, Pádraig Hogan, 2003 **The Good Life of Teaching** Chris Higgins, 2011-09-19 The Good Life of Teaching extends the recent revival of virtue ethics to professional ethics and the philosophy of teaching. It connects long standing philosophical questions about work and human growth to questions about teacher motivation, identity and development. Makes a significant contribution to the philosophy of teaching and also offers new insights into virtue theory and professional ethics. Offers fresh and detailed readings of major figures in ethics including Alasdair MacIntyre, Charles Taylor and Bernard Williams and the practical philosophies of Hannah Arendt, John Dewey and Hans Georg Gadamer. Provides illustrations to assist the reader in visualizing major points and integrates sources such as film literature and teaching memoirs to exemplify arguments in an engaging and accessible way. Presents a compelling vision of teaching as a reflective practice showing how this requires us to prepare teachers differently. *Clinical Reasoning in the Health Professions E-Book* Joy Higgs, Gail M. Educational Explanations Christopher Winch, 2022-02-11 EDUCATIONAL EXPLANATIONS Educational Explanations is a comprehensive study of the main philosophical questions that confront empirical educational researchers. The book outlines the sense in which empirical educational research pursues truth and sets out and defends an account of its task as the

offering of explanations for the many educational problems that claim our attention The book goes on to look at the criteria for high quality research the relationship between different methodological approaches and the scope and limits of intervention studies At all stages detailed examples are presented to make the argument clearer A distinctive feature of the book is the presentation of four detailed case studies over four chapters of influential educational research programmes that not only examine what they have achieved but emphasise the conceptual issues that researchers are confronted with as they seek to provide explanations The book goes on to examine the impact of empirical educational research on educational practice and on the practice of teachers in particular

earlier grades Yet so many and varied are the uses of the term liberal education that the question arises of whether and how the idea is any longer a useful or helpful construct In what way might it speak helpfully to educational challenges we face today In what ways does it still speak helpfully to educational challenges we face today In what ways might it be a guide as we search for a better way forward These are the central questions that are addressed in this book In doing so the positions of three theorists John Henry Newman Mortimer J Adler and Jane Roland Martin who have written about liberal education in a compelling way and from different perspectives are selected for close analysis The analysis is built upon to fashion a new ideal of the educated person and a new theory of liberal education
