preparation for this aspect of a teacher's role. Principals and teachers across the world now work in increasingly uncertain and challenging environments involving complex legislative frameworks with their roles and responsibilities constantly changing to meet these demands. Thus, it is imperative that educators adapt and acquire new skills relating to child protection and criminal law. On a daily basis, teachers and practitioners are being challenged to critically examine and evaluate the legal rights and obligations of various stakeholders including students, parents, educators, and administrators. However, if these skills are not developed, the implications will be significant, particularly so if principals are deterred from pursuing innovative education strategies due to potential litigation risks. Consequently, the chapters will empower principals and teachers in the management of these concerns. This wide-ranging handbook, including case studies from around the world, will be of interest and value to both scholars of education law and practitioners.

Education in India Ed. Shubha Tiwari, 2006. Education in India is a multi-layered and multi-dimensional phenomenon. The various demands, needs, requirements, approaches, and output of sub-sectors of this overwhelmingly vast sector are immensely varied. It is not easy to comment on this issue. Moreover, the excessive governmental control over the education system on one hand and decreasing governmental funding on the other make the situation ironical in its own way. Through these ambitious volumes, we have taken up this challenging task of candidly analyzing different aspects of education in India. The volumes are expected to be useful for all those related to this field as well as to the general and aware reader. The biggest asset of these volumes is their apolitical approach, wherein an attempt has been made to see things as they are. A straightforward and practical approach is the strength of this venture.
