Educational Therapy in Action Dorothy Fink Ungerleider, 2011-08-15 This book provides an in depth look at what a little known clinician the educational therapist does and how they do it It goes behind the clinician s door to illustrate the unusual and broad range of interventions both academic vocational and social emotional that an educational therapist employs This particular case study involves a young woman named Nora who had a severe but undiagnosed auditory processing disorder She could not give meaning to the spoken language that came at her too rapidly leaving her in a constant fog of words that she couldn t comprehend This case discloses the problems their causes and the emotional toll that had to be considered when developing an effective educational therapeutic plan for Nora It vividly illustrates the dynamic exchanges and mutual learning that goes on between client and therapist Parts I and II illustrate how the psycho educational interventions that addressed Nora s academic and non academic needs were gradually formulated over the first year Part III provides a series of vignettes from subsequent years that illustrate the ongoing applications of the therapist s work Distinguishing Features Explanatory Sidebars The rationale behind particular techniques and interventions is clarified through a system of explanatory sidebars that inform the reader without distracting from the story This approach makes the book both an instructional tool well as compelling story Organic Curriculum The rationale for and application of an organic personalized curriculum is explained and applied throughout the book as a model for others to use in working with this population A Longitudinal Perspective The initial work with Nora began many years ago so this book provides a long view of her life and tracks the influences that educational therapy exerted on her development into a fully functioning adult

Reinstein,2013-05-13 Drawing on the teachings of D W Winnicott and John Bowlby who helped revolutionize thinking about relational psychology *To Hold and Be Held* integrates the concepts of the holding environment and attachment theory and describes how they are applied in a clinical setting It also uses metaphor to both derive meaning from the language of the therapeutic process and to apply that meaning within a systems framework to effect significant therapeutic change As the number of children with complex problems increases and the facilities to treat and manage them decrease schools are left with few resources to cope Professionals such as teachers psychologists social workers and counselors need a new framework in which to think about and advocate for services for these children *To Hold*

and Be Held describes the creation of a system of working that not only holds the child and his family but also holds the larger system as well a system in which therapeutic services are integrated at all levels and implemented in public schools in a way that supports all those involved This is not only a unique and successful way of working with children and their families but a timely one as well *Skill Training for Community Living* Arnold P.
