Guide to the Evaluation of Educational Experiences in the Armed Services, 1954-1989, 199? No Sure Victory Gregory

A. Daddis, 2011-06-01 In *No Sure Victory* Army officer and historian Gregory Daddis looks deep into the Army's techniques for measuring military success in Vietnam and presents a much more complicated and disturbing account of the American misadventure in Indochina Daddis shows how the US Army adopted a massive and eventually unmanageable system of measurements and formulas to track the progress of military operations that ranged from pacification efforts to search and destroy missions Concentrating more on data collection and less on data analysis these indiscriminate attempts to gauge success may actually have hindered the army's ability to evaluate the true outcome of the fight at hand a roadblock that Daddis believes significantly contributed to the many failures that American forces suffered in Vietnam Filled with incisive analysis and rich historical detail *No Sure Victory* is not only a valuable case study in unconventional warfare but a cautionary tale that offers important perspectives on how to measure performance in current and future armed conflict
