**An Annotated Guide to The Maximus Poems of Charles Olson** George F. Butterick, 1970      **A Guide to the Maximus Poems of Charles Olson** George F. Butterick, 1980      *Staying Open: Charles Olson's Sources and Influences* Joshua S. Hoeynck, 2019-05-03 *Staying Open* Charles Olson's Sources and Influences investigates the inter disciplinary influences on the work of the mid Century American poet Charles Olson This edited collection of essays covers Olson's diverse non literary interests including his engagement with the music of John Cage and Pierre Boulez his interests in abstract expressionism and his readings of philosopher Alfred North Whitehead The essays also examine Olson's pedagogy which he developed in the experimental environment at Black Mountain College as well as his six month archeological journey through the Yucatan Peninsula in 1950 to explore the culture of the Maya This book will therefore be a strong research aid to scholars working in diverse fields music archeology pedagogy philosophy art and psychology as it outlines methods for close inter disciplinary work that can uncover the mechanics of Olson's creative literary processes Building on the straightforward scholarship of George Butterick whose *Guide to the Maximus Poems* remains indispensable for readers of Olson's work the essays in this volume will also guide readers through the thick allusions within *The Maximus Poems* itself New interest in the wide ranging and non literary nature of Olson's thought in several recent academic works makes this book both timely and necessary *Physics Envy American Poetry and Science in the Cold War and After* by Peter Middleton as well as *Contemporary Olson* edited by David Herd have started the process of uncovering the extent to which Olson's inter disciplinary interests inflected his poetic compositions *Staying Open* extends the preliminary investigations of Olson's non literary sources in those volumes by bringing together a community of scholars working across disciplines and within a wide variety of humanistic concerns      **Charles Olson's Reading** Ralph Maud, 1996 Maud English Simon Fraser U offers a narrative account of the life and work of poet Charles Olson focusing on the poet's lifelong reading material as a basis for understanding his work Drawing on an annotated listing of his library as well as his childhood books and poetry by his contemporaries he links the books to the poet's intellectual and poetic development at each stage of his career Annotation copyright by Book News Inc Portland OR      [From Virgin Land to Disney World](#) , 2016-08-22 With the publication in English in 1930 of *Civilization and its Discontents* and its thesis that instinct and ultimately nature had been and must be forever subordinated in order that civilization might thrive and endure Freud contributed what some contemporaries saw to the central debate of his era a debate which had long preoccupied both official American pundits and the American populace at

large At the beginning of the new Millennium evidence abounds that an American debate still rages over the meaning of nature the rightful weight of instinct and the status of civilization The Millennium itself has appeared in popular and official discourses as an appropriate marker of an age in which nature is close to the edge of radical extinction and has also become more and more unreliable as a paradigm for representation and debate At the same time the contemporary tailoring of nature to postmodern needs and expectations inevitably reveals the conceptual difficulty of any possible simple opposition between nature and culture as if they were clearly distinguishable domains If nature then can clearly be seen as a discursive concept it may also be a timeless concept insofar that it has been shaped created and used at all times Every epoch age and era had its own nature with myth history and ideology as its dominant shaping forces From the Frontier to Cyberia nature has been suffering the agony of the real resurfacing in discursive strategies and demonstrating a powerful impact on American society culture and self definition The essays in this collection speak critically of the natural and examine the American debate in the many guises it has assumed over the last century within the context of major critical approaches psychoanalytical concepts and postmodern theorizing

*A Companion to Twentieth-Century Poetry* Neil Roberts, 2008-04-15 In the twentieth century more people spoke English and more people wrote poetry than in the whole of previous history and this Companion strives to make sense of this crowded poetical era The original contributions by leading international scholars and practising poets were written as the contributors adjusted to the idea that the possibilities of twentieth century poetry were exhausted and finite However the volume also looks forward to the poetry and readings that the new century will bring The Companion embraces the extraordinary development of poetry over the century in twenty English speaking countries a century which began with a bipolar transatlantic connection in modernism and ended with the decentred heterogeneity of post colonialism Representation of the canonical and the marginal is therefore balanced including the full integration of women poets and feminist approaches and the in depth treatment of post colonial poets from various national traditions Discussion of context

intertextualities and formal approaches illustrates the increasing self consciousness and self reflexivity of the period whilst a Readings section offers new readings of key selected texts The volume as a whole offers critical and contextual coverage of the full range of English language poetry in the last century

**Physics Envy** Peter Middleton,2015-11-04 At the close of the Second World War modernist poets found themselves in an increasingly scientific world where natural and social sciences claimed exclusive rights to knowledge of both matter and mind Following the overthrow of the Newtonian worldview and the recent shocking displays of the power of the atom physics led the way with other disciplines often turning to the methods and discoveries of physics for inspiration In *Physics Envy* Peter Middleton examines the influence of science particularly physics on American poetry since World War II He focuses on such diverse poets as Charles Olson Muriel Rukeyser Amiri Baraka and Rae Armantrout among others revealing how the methods and language of contemporary natural and social sciences and even the discourse of the leading popular science magazine *Scientific American* shaped their work The relationship at times extended in the other direction as well leading physicists such as Robert Oppenheimer Werner Heisenberg and Erwin Schrödinger were interested in whether poetry might help them explain the strangeness of the new quantum world *Physics Envy* is a history of science and poetry that shows how ultimately each serves to illuminate the other in its quest for the true nature of things

**Late modernist poetics** Anthony Mellors,2024-06-04 This book explores the uncanny afterlife of modernist ideals in the second half of the twentieth century Rejecting the familiar notion that modernism dissolved during the 1930s it argues that the fusion of rationalism and mysticism which characterises modernist poetics was sustained long after its politics had been discredited by the events of World War Two The book's central concern is why the aesthetic mysticism that Walter Benjamin called the faith of those who made common cause with Fascism continued to be a guiding principle for literary elites and countercultural movements alike New light is shed on the relationship between occultism and the Pound tradition especially in terms of Pound's influence on post 1945 Anglo American poetry and a critical theory of late modernism is offered which shows how belated notions of cultural redemption have survived in contemporary poetry This wide ranging contextual study focuses on the poetry of Ezra Pound Charles Olson Paul Celan and J H Prynne and explores the development of modernist culture through its theories of phenomenology psychoanalysis science ethnography and ancient history

**Contemporary Poetry Archive** Linda Anderson,2019-05-23 Explores critical and creative responses to the contemporary poetry archive Provides an innovative new dialogue between critics and creative writers on the value and practice of the literary archive Expands the scope for understanding perspectives on and the opposition between creative and critical relations to archival materials Opens up a new cross disciplinary agenda for thinking the archive as both a source for scholarship and a source of inspiration for creative practice These 13 newly commissioned chapters examine the impact of archival poetry collections on both literary scholarship and poetic practice They examine what we can learn from the drafts notebooks and personal libraries left behind by poets and look at the ways in which the growth of poetry archives has

changed the way poets think about their work The contributing poets and scholars including Susan Howe Sean O'Brien and George Szirtes present an in depth account of the significance of poetry archives for contemporary literature The collection provides a new cross disciplinary agenda for thinking about the archive as both a source for scholarship and inspiration for creative practice

**The Oxford Handbook of Modern and Contemporary American Poetry** Cary Nelson, 2012-01-06 The Oxford Handbook of Modern and Contemporary American Poetry gives readers a cutting edge introduction to the kaleidoscopic world of American poetry over the last century Offering a comprehensive approach to the debates that have defined the study of American verse the twenty five original essays contained herein take up a wide array of topics the influence of jazz on the Beats and beyond European and surrealist influences on style poetics of the disenfranchised religion and the national epic antiwar and dissent poetry the AIDS epidemic digital innovations transnationalism hip hop and more Alongside these topics major interpretive perspectives such as Marxist psychoanalytic disability queer and ecocritical are incorporated Throughout the names that have shaped American poetry in the period Ezra Pound Wallace Stevens Marianne Moore Mina Loy Sterling Brown Hart Crane William Carlos Williams Posey Langston Hughes Allen Ginsberg John Ashbery Rae Armantrout Larry Eigner and others serve as touchstones along the tour of the poetic landscape

**American Poetry as Transactional Art** Stephen Fredman, 2020-06-02 Explores the ways American poetry engages with visual art music fiction spirituality and performance art Many people think of poetry as a hermetic art as though poets wrote only about themselves or as if the subject of poetry were finally only poetry its forms and traditions Indeed much of what constitutes poetry in the lyric tradition depends on a stringently controlled point of view and aims for a timeless intransitive utterance Stephen Fredman's study proposes a different perspective American Poetry as Transactional Art explores a salient quality of much avant garde American poetry that has so far lacked sustained treatment namely its role as a transactional art Specifically Fredman describes this role as the ways it consistently engages in conversation talk correspondence going beyond the scope of its own subjects and forms its existential interactions with the outside world Poetry operating in this vein draws together images ideas practices rituals and verbal techniques from around the globe and across time not to equate them but to establish dialogue to invite as many guests as possible to the World Party which Robert Duncan has called the symposium of the whole Fredman invites new readers into contemporary poetry by providing lucid and nuanced analyses of specific poems and specific interchanges between poets and their surroundings He explores such topics as poetry's transactions with spiritual traditions and practices over the course of the twentieth century the impact of World War II on the poetry of Charles Olson and George Oppen exchanges between poetry and other art forms including sculpture performance art and ambient music the battle between poetry and prose in the early work of Paul Auster and in Lyn Hejinian's *My Life* The epilogue looks briefly at another crucial transactional occasion teaching American poetry in the classroom in a

way that demonstrates that it is at the center of the arts and at the heart of American culture      **Writing in Real Time** Paul Jaussen, 2017-07-03 Writing in Real Time is the first book length study of the American long poem as a complex adaptive system      *The Black American Short Story in the 20th Century* Peter Bruck, 1977-01-01 This volume is a collection of essays on black short stories written between 1998 and 1976 It aims to say something about the black short story as a genre and the development of the racial situation in America as well The primary aim is to introduce the reader to this long neglected genre of black fiction In contrast to the black novel the short story has hardly been given extensive criticism let alone serious attention The individual essays of this collection aim at presenting new points of critical orientation in the hope of reviving and fostering further discussions They provide a variety of approaches and a great diversity of critical points of view

**Content's Dream** Charles Bernstein, 2001 This collection of essays is an introduction to contemporary American poetics The book addresses a wide range of arts and ideas moving from philosophical reflections on Wittgenstein to the film antics of Mad Max from the paintings of Arakawa to the poetics of William Carlos Williams      *Charles Olson and Alfred North Whitehead* Shachar Bram, 2004 Annotation Through a detailed and thoughtful study of the impact of Alfred North Whitehead's philosophy on Olson's aesthetic theory this book points out the conceptual unity underlying what seems to be a sprawl of fragments in Olson's major work *The Maximus Poems* On the one hand concrete poetic units of *The Maximus Poems* serve as a starting point for clarifying how different elements are joined together in one unity On the other hand the book traces the blending of the whole poem at the macro level following its course through a temporal progress in which the poem moves from one poetic unit to the next that is from a unity of multiplicity to a new unity in which the previous unity is already part of the multiplicity building the new one Thus the book illuminates Olson's theory of the Long Poem as an all containing corpus governed by metaphysical principles equal to life itself enacted in the process of working on *The Maximus Poems*

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      **Expressivity in Modern Poetry** Donald Wellman, 2019-02-26 *Expressivity in Modern Poetry* explores three interrelated subjects The first is a general exposition of the radical or deeply realistic aspects of the poetry and visual arts of the modern period The focus is on the works of Ezra Pound as understood through a prism of postmodern thought The second subject is the poetry and poetics of Charles Olson a pivotal figure during the transition from modernism to postmodernism The third subject is contemporary innovative poetry with special attention to transcultural neobarroco and language centered aspects of composition The grounding for this section is found in the works of William Carlos Williams Aime Cesaire and Jose Lezama Lima A reversal of the relation between the center and periphery decentering the New York to Paris vector is crucial for understanding the Caribbean as a seedbed for both innovative and identity based poetics Wellman's purpose is to amplify the cultural importance of expressivity in a field where critical discussion is often dominated by constructivism and conceptualism *Expressivity in Modern Poetry* offers a new reading of the relation between twentieth century modernism and contemporary

poetic practice
