

Sunnybell

Schmidulirion racemosum (Michx.) A. Gray

Lily Family

Description: An attractive bulbous perennial, the Sunnybell has an 8 to 24 inch leafless stem that arises from a basal rosette of thin linear leaves and terminates in an inflorescence of many flowers. Each bright yellow flower is borne on a stalk accompanied by a small thin, dry leaf where it diverges from the stem. The flowers have six perianth parts united at their bases and six stamens.

Occurrence: In moist drainage areas and swampy sites on moist grassy outcrops.

Distribution: Restricted to Georgia, Florida, and a few sites in the Carolinas.

Cottony Groundsel

Senecio demississimus Michx.

Aster Family

Description: A perennial, the Cottony Groundsel has yellow ray and disc flowers borne on a stout branched stem that grows between 1 and 2 feet in height. The underside of the undivided basal leaves and the lower part of the stem are covered in soft dense hairs that give the appearance of white felt.

Occurrence: In large colonies in the moderately deep-soils of depression pits.

Distribution: Found in all principal outcrops of the Piedmont Region but otherwise confined to the Coastal Plain Region of the southeastern United States.

Wildflowers and Plant Communities of the Southern Appalachian Mountains and Piedmont Timothy P. Spira, 2011-05-16 This richly illustrated field guide serves as an introduction to the wildflowers and plant communities of the southern Appalachians and the rolling hills of the adjoining piedmont Rather than organizing plants including trees shrubs and herbaceous plants by flower color or family characteristics as is done in most guidebooks botanist Tim Spira takes a holistic ecological approach that enables the reader to identify and learn about plants in their natural communities This approach says Spira better reflects the natural world as plants like other organisms don't live in isolation they coexist and interact in myriad ways Full color photo keys allow the reader to rapidly preview plants found within each of the 21 major plant communities described and the illustrated species description for each of the 340 featured plants includes

fascinating information about the ecology and natural history of each plant in its larger environment With this new format readers can see how the mountain and piedmont landscapes form a mosaic of plant communities that harbor particular groups of plants The volume also includes a glossary illustrations of plant structures and descriptions of sites to visit Whether you re a beginning naturalist or an expert botanist this guidebook is a useful companion on field excursions and wildflower walks as well as a valuable reference Southern Gateways Guide is a registered trademark of the University of North Carolina Press
