Guidelines For Monitoring Indoor Air Quality:

Guidelines For Monitoring Indoor Air Quality Niren Laxmichand Nagda, Harry E. Rector, Michael D.

Koontz, 1986-11-01 Design and Protocol for Monitoring Indoor Air Quality Niren Laxmichand Nagda, Jerome P. Harper, 1989 The book is derived from a symposium prompted by the growing concern for air quality in homes offices and schools and the need for better design of investigations about indoor air quality problems and solutions Numerous chemical and physical factors influence the indoor concentrations of contaminants The multiplicity of these factors makes the investigation design process complex So well conceived designs and protocols form a crucial starting point for successful measurement programs Design of a study relates to developing a general strategy or approach protocols refers to specific procedures to be followed in conducting a study This document aims to provide information on designs and protocols used in different types of indoor air quality monitoring studies and to supply learning opportunities through shared experience

WHO Guidelines for Indoor Air Quality World Health Organization, 2014 Built on existing WHO indoor air quality guidelines for specific pollutants these guidelines bring together the most recent evidence on fuel use emission and exposure levels health risks intervention impacts and policy considerations to provide practical recommendations to reduce this health burden Introduction to Indoor Air Quality , 1991 Exposure Guidelines for Residential Indoor Air Quality

Federal-Provincial Advisory Committee on Environmental and Occupational Health (Canada), Canada. Environmental Health Directorate, 1989 It is now recognized that non industrial indoor environments can contribute significantly to human exposure to airborne pollutants This is particularly true in Canada with its long cold winters and hot summers which results in considerable amounts of time being spent in climate controlled buildings The working group was set up in October 1980 to consider a definition of acceptable air quality the need for objective and or maximum acceptable concentrations for specified substances and a specification of ventilation rates or recirculation criteria in domestic premises This report presents guidelines and recommendations for substances with non carcinogenic and carcinogenic effects and for substances with recommendations for controlling exposure A description of the derivation of the guidelines is also included Recommendations were not developed for radon because of the specialized knowledge required to develop guidelines **Sampling and**
