In-Text Citations

The basics

Always use past tense or present perfect tense when you use in text references e.g., "Jordan (2001) found" or "Jordan (2001) has found." Furthermore, APA style follows the author-date method of references of paraphrases in-text: (Jordan, 2001). For direct quotations longer than 40 words, you require to put the whole quotation inside a text block that is indented by 1/2 inch from the left margin. Place the reference in parentheses after the closing punctuation mark.

No author

if there is no author, cite the title in the signal phrase or use the first 2 words in the parenthetical citation. Italics for books and reports, while quotation marks are used for article titles, websites, chapters.
...using research ("Finding Glory", 2022).

One or two authors

Name all authors by their last name. Use the word "and" in the signal phrase and the ampersand "&" in parenthetical citations when using multiple authors.
Jordan and Peele (2011) argued that ...
(Jordan & Peele, 2011).

Three or more authors

Use the last name of the first author plus "et al." in every citation, unless it creates ambiguity, then add a second author's surname as well.
Gustavo, et al. (2011) noticed that... Besides that, (Gustavo, et al, 2011) also found out that...
Gustavo, Wang, et al. (2011) noticed that... Besides that, (Gustavo, Wang, et al, 2011) also found out that.

Multiple works in parentheses

When multiple works are used to describe the idea, you need to include all in the parentheses as you would do with a single author's work, but separated by a semi-colon.
(Chang, 2019; Kong, 2011)

Formatting

The basics

Start with white 8.5 x 11 inch paper and use 1 inch margin on all sides. All the text throughout your paper should be **double-spaced**. Use appropriate **legible fonts** (Times New Roman) and **font sizes** (11-12 points). Use a **Page header** on each page that says: "TITLE OF YOUR PAPER" and flush with the left margin. Your title should not contain more than 50 characters, else abbreviate it. Insert the Page numbers to the right.

Title page

Type your "TITLE OF THE PAPER" in the header and include your own name in the upper half of the page. The byline and affiliations are centered on separate lines. For student papers, you must also include the course number and name, supervisor's name and assignment due date.

Abstract

On a new page write the word: "Abstract" and center it.
On a new line, you can write an abstract of maximum 250 words that summarizes your report.

Main body

All the body pages should have a header, that includes the page number as well. The margins should be 1 inch all around. Every paragraph should start with an additional indent by 1/2 an inch.

Reference list

At the end of the paper you can add a reference list on a new page. It should contain the words "References" at the top. All the lines after the each entry should be indented 1/2 inch from the margin on the left. Note that author's names are always inverted (surname first, then initials) for all the authors, unless there are more than 20. All the sources should be in alphabetical order.

Guidelines For Style Analysis

Guidelines For Style Analysis:

Guidelines for Style Analysis Jan LaRue, Marian Green LaRue, 2011 *Guidelines for Style Analysis* now in its expanded second edition sets forth Jan LaRue's original penetrating and adaptable approach to the understanding of musical works. LaRue provides a consistent point of view from which music of any historical period can be examined. His style analytic method insures the close examination of all musical dimensions and elements, an understanding of their functions and interrelations, and a firm basis for evaluation and comparison. *Guidelines* presents a codification of various ways of looking at music within a comprehensive framework. LaRue discusses in detail each aspect of the style analytic routine, illustrating points with illuminating examples and diagrams. *Guidelines and Models* taken together give the teacher and student the listener and performer new insight into the nature of musical shape and movement, thereby creating heightened awareness of the many facets of the musical experience.

Guidelines for Style Analysis Jan LaRue, 1970 By providing a consistent point of view from which music of any style or period can be examined, the style analytical approach insures the close examination of all dimensions and elements, an understanding of their functions and interrelations, and a firm basis for evaluation and comparison. Not a system of musical theory, *Guidelines for Style Analysis* is rather an extension and codification of various partial ways of looking at music into a comprehensive framework. Publisher **Style and Music** Leonard B. Meyer, 1996 Leonard Meyer proposes a theory of style and style change that relates the choices made by composers to the constraints of psychology, cultural context, and musical traditions. He explores why, out of the abundance of compositional possibilities, composers choose to replicate some patterns and neglect others. Meyer devotes the latter part of his book to a sketch history of nineteenth-century music. He shows explicitly how the beliefs and attitudes of Romanticism influenced the choices of composers from Beethoven to Mahler and into our own time. A monumental work. Most authors concede the relation of music to its cultural milieu, but few have probed so deeply in demonstrating this interaction. Choice Probes the foundations of musical research precisely at the joints where theory and history fold into one another. Kevin Korsyn *Journal of American Musicological Society* A remarkably rich and multifaceted yet unified argument. No one else could have brought off this immense project with anything like Meyer's command. Robert P. Morgan *Music Perception* Anyone who attempts to deal with Romanticism in scholarly depth must bring to the task not only musical and historical expertise but unquenchable optimism. Because Leonard B. Meyer has those qualities in abundance, he has been able to offer fresh insight into the Romantic concept. Donal Henahan *New York Times*

Heinrich Schenker's Conception of Harmony Robert Wesley Wason, Matthew Brown, 2020 The first detailed study of Schenker s pathbreaking 1906 treatise showing how it reflected 2500 years of thinking about harmony and presented a vigorous reaction to Austro Germanic music theory ca 1900 What makes the compositions of Handel Bach Haydn Mozart Beethoven Schubert Schumann Chopin and Brahms stand out as great works of art Heinrich Schenker 1868 1935 set out to answer this question in a series of treatises beginning with a strikingly original work with the deceptive title *Harmonielehre*

roughly Treatise on Harmony 1906 Whereas other treatises of the period associated harmony with the abstract principles governing chords and chord progressions Schenker's treated it as the conceptual glue that allowed the individual elements of a work melodies motives chords counterpoint etc to work together locally and globally Yet this book though renowned and much cited has never been studied systematically and in close detail Heinrich Schenker's Conception of Harmony approaches Schenker's 1906 treatise as a synthesis of ancient ideas and very new ones It translates for the first time two preparatory essays for Harmonielehre and describes his later views of harmony and the ways in which they influenced and also were ignored by the 1954 edition and translation entitled simply Harmony Though problematic Harmony was the first published translation of a major work by Schenker inaugurating the study of his writings in postwar America and Britain where they continue to be highly influential
