Parry, Joel S. Steinberg, 2007-02-15 Guillain Barre Syndrome GBS is a disorder in which the body's immune system attacks part of the peripheral nervous system Feelings of tingling and weakness increase in intensity until the muscles cannot be used at all and the patient is almost totally paralyzed No one knows why Guillain Barre strikes some people and not others or what sets the disease in motion What we do know is that GBS is now the most common cause of acute paralysis in Western countries since the virtual elimination of poliomyelitis with vaccination programs Guillain Barre Syndrome co authored by a survivor of this illness addresses all aspects of this condition including initial symptoms diagnostic evaluation and criteria general and illness specific treatments and typical outcomes Fortunately most GBS patients have a good recovery but the pathway to this goal can be slow and scary This book covers a wide range of issues including Features unique to GBS such as pain without injury and other abnormal sensations Workplace adjustment with incomplete recovery Intensive care unit management Practical caregivers guidelines The rehabilitation process Sexual dysfunction and much more Guillain Barre Syndrome is a comprehensive book written in lay terms covering everything from diagnosis to emotional issues It is a book that stands alone This latest volume in the American Academy of Neurology Press Quality of Life Guide series is an essential tool for all individuals families and caregivers coping with Guillain Barre Syndrome **Guillain-Barré Syndrome**, 2005

Guillain-Barré Syndrome, 2001 **Guillain-Barré Syndrome** Brian S. Langton, 2006-07 This book is about three people from different walks of life each of whom experienced a life changing episode of Guillain Barr Syndrome Three dramatic stories in one Firstly a story of the Author's remarkable almost complete recovery following his encounter with the syndrome It is a frank and personal account of his struggle to regain much of what he had lost in bodily function during one year of hospitalisation It should provide inspiration and possibly answer so many questions typically asked by others afflicted with this syndrome Secondly case studies written by two co author contributors one a Calgary Veterinarian and mother of two the other a retired Vancouver resident who was struck with Guillain Barr Syndrome whilst shopping for a boat in England There is no single answer to the question as to how life may change after recovery from this disorder Each case appears to be unique That is why I have chosen to include not just a record of my partial recovery but also the recovery record of two additional people each different from one another's and each certainly different from mine Author's Preface We eventually identified a boat only three feet short of what we had wanted that was within our budget At this point Heather's brother who lived nearby said he would like a share in the boat to which we agreed During this discussion in his house I had to ask him to refrain from smoking as my throat was quite sore I was feeling rather run down and often felt cold About the

same time on a Saturday I felt a tingling in the finger tips of my left hand and found they were a bit swollen I mentioned it to Heather but it did not seem serious It was however the first sign that I had contracted GBS If only I had known the treatment might have been started earlier Patrick Hill Probably the worst face of Guillain Barr Syndrome is the effect it has on loved ones Severe or not chronic or not it matters little to the supporting family at the bedside of a patient Fear puzzlement and apprehension are all experienced by the loved ones Reading the case histories of Sarah and Patrick one learns how their spouses also suffered many frightening experiences but in spite of all that they remained obviously without second thought hesitation or doubt True to their marriage vows they provided so much love care and support That was the shared experience among the three of us Author Epilogue
