Gulf Challenges Of The Future The:

The Challenge of the Future Roland Greene Usher, 1916 Human Capital and the Future of the Gulf Carolyn Barnett, 2015-11-16 Extensive efforts to develop human capital are under way in the United Arab Emirates Saudi Arabia and elsewhere in the Gulf and they are increasingly setting expectations for how people ought to behave socially and economically that are in tension with how they are expected to behave politically The tensions created by governments conflicting aims can produce frustration a sense of entitlement or apathy among young people entering the labor force each of which poses different potential political challenges for governments Navigating this tension or finding ways to create space for genuine innovation and risk taking within that constrained political context will be among the most important strategic challenges for the region s leaders and people in the next 10 years Gulf of Mexico Reefs: Past, Present and Future Adrienne M. S. Correa, Nancy Knowlton, Joshua D. Voss, Daniel M. Holstein, Rowan C. Martindale, 2021-09-28 *Deep Water: The Gulf Oil Disaster and the Future of Offshore Drilling: Report to the President, January 2011* National Commission on the BP Deepwater Horizon Oil Spill and Offshore Drilling, 2011-05-24 On April 20 2010 the Macondo well blew out costing the lives of 11 men and beginning a catastrophe that sank the Deepwater Horizon drilling rig and spilled nearly 5 million barrels of crude oil into the Gulf of Mexico The spill disrupted an entire region s economy damaged fisheries and critical habitats and brought vividly to light the risks of deepwater drilling for oil and gas the latest frontier in the national energy supply Soon after President Barack Obama appointed a seven member Commission to investigate the disaster analyze its causes and effects and recommend the actions necessary to minimize such risks in the future The Commission s report offers the American public and policymakers alike the fullest account available of what happened in the Gulf and why and proposes actions changes in company behavior reform of government oversight and investments in research and technology required as industry moves forward to meet the nation s energy needs The Gulf Challenges of the Future , 2005-06-24 This analysis offers fresh insight into security issues and social policy in the Gulf states It covers the redefining of government responsibilities the initiation of political and social change the evolution of media roles and the expansion of opportunities for women The book also presents important new assessments of the security situations in Iraq and Iran and early developments in security co operation and economic integration in the region **The Suez Canal: Past Lessons and Future Challenges** Carmela Lutmar, Ziv Rubinovitz, 2023-01-05 This open access book seeks to provide a survey of historical geopolitical economic and environmental developments in the last 150 years and to highlight future challenges it faces as it pertains to the areas mentioned earlier It argues that the centrality of the canal geo strategically and otherwise requires a shift in scholarly focus to study the various aspects from an interdisciplinary perspective This book addresses several gaps in the literature the first being a lack of a systematic examination of historical aspects in the development of the canal in 150 years The second is a careful study of the canal s geostrategic importance The third is a combination of several disciplines that

examine the centrality of the Suez Canal

The Future of the Region The Emirates Center for Strategic Studies and Research, 2021-05-11 This book presents some of the most important contributions made during the Emirates Center for Strategic Studies and Research ECSSR 22nd Annual Conference titled The Future of the Region Oil Price Challenges It seeks to outline strategies to ensure stability in Arab countries by identifying some of the key security issues set against the context of oil price challenges Chapter 1 examines the concept of stability as well as the factors that have caused instability in the region and suggests strategies to ensure peace and security which is vital for the region's advancement Chapter 2 reviews the role of the GCC countries in maintaining regional stability with a focus on the Gulf states emerging prominence as perhaps the only Arab power able to withstand the turmoil that has struck the region following the decline of the traditional Arab powers Chapter 3 looks at shifting alliances in the region and suggests strategies for avoiding conflict within a new geopolitical reality Within this context GCC countries should draw on their considerable capabilities to achieve and sustain security in the Arabian Gulf region working to create a regional power base able to maintain military and economic balance Chapter 4 sheds light on the policies and interests of the major powers in relation to the region The significant decline in oil prices consequences of the so called Arab Spring the crisis in Yemen emergence of Da'esh and increased Iranian hostilities have had a major impact raising the concerns of countries all over the world Ultimately partnership with major powers such as the US can help Gulf countries ensure the region's stability and advancement Chapter 5 considers how American views toward political Islam and religious extremism were shaped during Donald Trump's presidential election campaign It raises serious concerns over the campaign's rhetoric which can be viewed as having politicized Islamic extremism in the US contributing to polarization and confusion over the issue with implications for American relations with Gulf nations Chapter 6 focuses on the economic policies of oil producing states which are in urgent need of major modification In order to adapt to falling oil prices two main mechanisms are identified the use of sovereign wealth funds and a decrease in government spending Finally Chapter 7 continues the discussion of oil price challenges reviewing the key issues in international oil markets upon which the policies of oil producing countries are based Direct competition between oil producers in the region and American producers of shale oil is anticipated especially during Trump's tenure The chapter's conclusion is that for the foreseeable future as GCC states diversify their economies the oil sector will continue to play an essential role

The Challenge To U.S. Policy In The Third World Thomas P Thornton, 2020-01-22 In formulating policy toward the Third World US decisionmakers have been hampered by a superficial understanding of events in developing countries by a tendency to deal with Third World problems in terms of global considerations and by the role of the United States as a superpower with responsibility for helping to manage regional security affairs

The Future of the Gulf Region Arno Tausch, 2021-08-09 This book studies values and attitudes in the Gulf region In light of global power shifts the threatening collapse of internal security in the West and uncertainty about the current leadership vacuum in world society this book explores a future leading

role of the Gulf countries in such institutions as the G 20 and the OECD Based on rigorous analysis of macro level data and opinion surveys with relevance for the Gulf region it analyzes the global macro factors shaping the Gulf s future at a time of the global COVID 19 crisis and depression and rising global tensions Starting with an empirical time series analysis of the long cycles of global politics and economics it highlights the implications for the Gulf region Offering a multivariate analysis of civil society values in the Gulf the author analyzes value changes and attitudes on antisemitism political Islam internal security democracy and other issues of Arab politics The partially optimistic conclusions of the study testify to the underestimated and incipient maturity of the Gulf s civil society and strongly suggest that the Gulf s future is rather with the free societies of the West and not with a Neo Ottoman Empire in whatever form Exceptional in scope and right up to the minute in coverage Brian M Pollins Associate Professor Emeritus The Ohio State University An outstanding and topical book by an astute scholar of the MENA region Professor Hussein Solomon Academic Head of Department Political Studies and Governance University of the Free State South Africa The most comprehensive and insightful study on the subject to date Manfred B Steger Professor of Sociology University of Hawai i at Manoa and Global Professorial Fellow Western Sydney University **Handbook of Regional Conflict Resolution Initiatives in the Global South** Jeronimo

Delgado-Caicedo,2022-07-28 During the first half of the twentieth century the international system was largely dominated by the USA and the colonial powers of western Europe After the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics However as it is the norm in the international system power structures are not immutable After the end of the Cold War rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world It is therefore unthinkable to ignore emerging countries such as Russia the People s Republic of China India Brazil or South Africa in the decision making process in today s world order In addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world Argentina Colombia Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan Saudi Arabia Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions previous analyses have focused primarily on the impact that emerging powers have had in their own regions conflict resolution initiatives This volume instead aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers In other words this book explores the relation between a country s involvement in conflict resolution initiatives and its positioning in the international system The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global

South particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives

Water Security in the Middle East Jean Axelrad

Cahan,2017-01-02 Water Security in the Middle East explores the extent and nature of water security problems in transboundary water systems in the Middle East This collection of essays discusses the political and scientific contexts and

the limitations of cooperation in water security The contributors argue that while conflicts over transboundary water systems in the Middle East do occur they tend not to be violent nor have they ever been the primary cause of a war in this region The authors place water disputes in larger political historical and scientific contexts and discuss how the humanities and social sciences could contribute more towards this understanding They also contend that international sharing of scientific and technological advances can significantly increase access to water and improve water quality While scientific advances can and should increase adaptability to changing environmental conditions especially climate change national institutional reform and the strengthening of joint commissions are vital The contributors indicate ways in which transboundary cooperation may move from simple and intermittent coordination to sophisticated adaptive and equitable modes of water management *The Future of Motorsports* Hans Erik Næss, Simon Chadwick, 2023-06-12 This book takes stock of the position of motorsport in the 21st century and considers how it will continue to influence sport business politics and society in the future Presenting a set of thematic essays and multi disciplinary case studies the book demonstrates that motorsport continues to play a significant role in relationships between the automotive industry nationalism industrialisation and capitalism as well as motorsports position as a feature of contemporary popular culture Examining issues such as event management and legacy environmental sustainability and greenwashing diversity and inclusion the rise of gaming and esports and the use of sport as political soft power around the world across multiple motorsport disciplines the book shines fascinating new light on this innovative but sometimes problematic industry This is essential reading for all advanced students researchers managers strategists sponsors and other stakeholders working at the nexus of motorsport business politics and culture **The Future of Warfare in the 21st Century** The Emirates Center for Strategic Studies and Research, 2014-10-15 Concepts and theories of war fighting have evolved radically over the past twenty years resulting in equally radical changes in military doctrine Emergent non conventional security threats have led to a proliferation of asymmetric conflicts while new modes of virtual warfare have developed in the realms of cyberspace The ECSSR 18th Annual Conference The Future of Warfare in the 21st Century held at the Center on April 9 10 2013 in Abu Dhabi and the resultant papers contained in this volume explore how warfare may be affected by technological strategic and civil developments in the coming years particularly the revolutionary use of remote and autonomous systems on the modern battlefield the budding application of cyber attack and defense strategies and the future direction of intelligence operations in the 21st century The authors also discuss political and civil influences on the future of warfare particularly in terms of the evolving state of civil military relations the growing employment of contractors in contemporary conflicts and the complex evolving relationship between defense industries and military establishments North African Politics Yahia H. Zoubir, Gregory White, 2015-09-16 In the aftermath of the turmoil that shook North Africa in late 2010 and early 2011 commentators and analysts have sought explanations to the factors that triggered the uprisings and to understand why a region seemingly characterized by relative stability for decades would

suddenly erupt in convulsions Had an underlying dynamism in the region overwhelmed what were ostensibly stable authoritarian regimes What were the connections to events and dynamics beyond the region such as countries in the Middle East international commodity markets and environmental factors amongst others Why had allies abetted authoritarianism for so long and what were the implications for such alliances North African Politics Change and continuity brings together experts to explore these questions providing in depth analyses of important developments in the region which build upon and complement the 2008 companion volume North Africa Politics Region and the Limits of Transformation This 21 chapter volume is a key contribution that responds to the need in the Anglo American sphere for sustained critical studies on North Africa and examines political economic security social and military aspects of the region Focused studies on individual countries allow detailed discussion of regional factors The book also examines extrinsic trans regional dynamics such as North Africa s influential interdependencies with the Levant and the Gulf Europe Sahelian and sub Saharan Africa and North America Its innovative approach provides new perspectives on North Africa extending its research scope to include Egypt and exploring China s evolving role in the region Providing an important contribution in the assessment of the ever shifting political and social tectonics within and beyond North Africa North African Politics is an essential resource for students scholars and policy makers in Middle Eastern and North African Studies and beyond

Regional Fears of Western Primacy and the Future of U.S. Middle Eastern Basing Policy W. Andrew Terrill,2006 The United States has a core national interest in maintaining peace and stability in the Middle East as well as containing or eliminating threats emanating from that region Yet there is often disagreement on the ways to best achieve these goals The author seeks to present his analysis of how the United States and other Western states might best address their military cooperation and basing needs within the Middle East while still respecting and working with an understanding of regional and especially Arab history and concerns He also provides policy recommendations based upon his analysis
