Gunma Museum:

Gunma Museum Philip Drew, Arata Isozaki, 1996-10-10 Arata Isozaki is one of the most prolific and creative personalities in contemporary architecture. The Museum of Modern Art Gunma arguably the architect's masterwork was the first in a line of commissions for modern and contemporary art museums on a worldwide scale. Completed in 1974 it was refurbished and extended by Isozaki in 1994. The museum is located in the rural surroundings of the Gunma no Mori park and is the most complete realization by Isozaki of conceptual architectural approach: a pristine essential structure composed of an arrangement of cubes taking the form of a large rectangular block with projecting wings. The 1994 addition consists of a cube added to the main entrance facade housing the new Highvision Theatre and a restaurant which occupies part of the area beneath one of the wings.

The Museum Owen Hopkins, 2021-10-12 This beautiful and visually immersive book charts the fascinating story of the institution of the Museum from its origins to the present. Visited by millions around the world every year, museums are one of mankind's most essential creations. They tell stories, shape cultural identities and hold valuable insight about the past and about the future. This captivating work charts a path from the very first collection through to the latest developments in cultural curation, interweaving. Using examples of the greatest cultural institutions to shape the narrative, historian and academic Owen Hopkins draws on his deep knowledge of the field to outline the history of the museum movement. Tracking the evolution from princely collections in Europe and the Enlightenment's classically inspired temples of curiosities via the public museums of the late nineteenth century on to today's global era of iconic buildings designed by the world's leading architects, this book is a vital work for anyone seeking to understand the development of the museum into what it is today. Over the course of five chapters filled with stunning imagery that highlights the beauty of these venerated buildings, the origins of key institutions are revealed, including Louvre, Metropolitan Museum of Art, British Museum, Tate Modern, The Hermitage, Guggenheim, Smithsonian Institute, Acropolis Museum. Also outlined are the motivations of the architects, curators and patrons who have shaped how we experience the modern museum, a cast that includes names such as King George II, Napoleon, Henry Clay Frick, Peggy Guggenheim, Andrew Carnegie, Alfred Barr, Frank Lloyd Wright, Le Corbusier, Frank Gehry, Richard Rogers, Nicholas Serota and Zaha Hadid. By examining how these venues became intrinsic to our shared cultural experience, analysing the changing roles they play in society and questioning what the future holds in a digital age, this book is for anyone who has stood in awe at the spectacle of a museum.

Architects Today

Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings Riddle of the Feathered Dragons Alan Feduccia, 2012-01-01 Inspired by the spectacular discoveries of the past two decades from the Age of Reptiles in China Riddle of the Feathered Dragons explores how these miraculous fossils have transformed the contentious arena of bird and dinosaur evolution Aside from being the most comprehensive discussion of these avian and associated discoveries the author delves into the world of investigative journalism to expose the darker side of the world of fossil birds and dinosaurs The book exposes the massive unfounded speculation that has characterized the field of vertebrate paleontology and published extensively in the world's most prestigious journals including everything from supposed dinosaur protein to so called feathered dinosaurs The book questions the validity of the foundational tenets of the now unquestionable orthodoxy of bird and dinosaur evolution including bird origins feathered dinosaurs flight origin from the ground up and hot blooded dinosaurs and their proteins It exposes how speculation has gone far beyond the ability of the currently available evidence to yield answers The author concludes that birds are best defined by a more traditional definition of the possession of feathers and avian flight architecture that the so called feathered dinosaurs are most likely derived avians and that flight clearly originated from the trees down from ancestors that antedated the dinosaurs rather than a direct linear descent *Evolution of Island Mammals* Alexandra van der Geer, George Lyras, John de Vos, 2021-04-27 EVOLUTION OF ISLAND MAMMALS Evolution on islands differs in a number of important ways from evolution on mainland areas Over millions of years of isolation exceptional and sometimes bizarre mammals evolved on islands such as pig sized elephants and hippos giant rats and gorilla sized lemurs that would have been formidable to their mainland ancestors Evolution of Island Mammals Second Edition provides an updated and expanded overview of the current knowledge on fossil island mammals worldwide ranging from the Oligocene to the onset of the Holocene The book addresses evolutionary processes and key aspects of insular mammal biology exemplified by a variety of fossil species Readers familiar with the first edition will find here a host of updated and enhanced material including An entirely new chapter on the island rule Updated and expanded theoretical chapters Updated and improved taxonomic information Extensive coverage of new discoveries Body masses or body size indices for most extinct island mammals New figures visualizing the richness of the fossil record This accessible and richly illustrated textbook is written for graduate level students and professional researchers in evolutionary biology palaeontology biogeography zoology and ecology **Sangiran: Man, Culture, and Environment in Pleistocene Times** Truman Simanjuntak, Bagyo Prasetyo, Retno Handini, 2001
