Policing the Second Amendment Jennifer Carlson, 2022-06-21 An urgent look at the relationship between guns the police and race The United States is steeped in guns gun violence and gun debates As arguments rage on one issue has largely been overlooked Americans who support gun control turn to the police as enforcers of their preferred policies but the police themselves disproportionately support gun rights over gun control Yet who do the police believe should get gun access When do they pursue aggressive enforcement of gun laws And what part does race play in all of this Policing the Second Amendment unravels the complex relationship between the police gun violence and race Rethinking the terms of the gun debate Jennifer Carlson shows how the politics of guns cannot be understood or changed without considering how the racial politics of crime affect police attitudes about guns Drawing on local and national newspapers interviews with close to eighty police chiefs and a rare look at gun licensing processes Carlson explores the ways police talk about guns and how firearms are regulated in different parts of the country Examining how organizations such as the National Rifle Association have influenced police perspectives she describes a troubling paradox of guns today while color blind laws grant civilians unprecedented rights to own carry and use guns people of color face an all too visible system of gun criminalization This racialized framework undergirding who is a good guy with a gun versus a bad guy with a gun informs and justifies how police understand and pursue public safety Policing the Second Amendment demonstrates that the terrain of gun politics must be reevaluated if there is to be any hope of mitigating further tragedies

Kelly, 2016-07-14 Today we know that crime is often not just a matter of making bad decisions Rather there are a variety of factors that are implicated in much criminal offending some fairly obvious like poverty mental illness and drug abuse and others less so such as neurocognitive problems Today we have the tools for effective criminal behavioral change but this cannot be an excuse for criminal offending In *The Future of Crime and Punishment* William R Kelly identifies the need to educate the public on how these tools can be used to most effectively and cost efficiently reduce crime recidivism victimization and cost The justice system of the future needs to be much more collaborative utilizing the expertise of a variety of disciplines such as psychology psychiatry addiction and neuroscience Judges and prosecutors are lawyers not clinicians and as we transition the justice system to a focus on behavioral change the decision making will need to reflect the input of clinical experts The path forward is one characterized largely by change from traditional criminal prosecution and punishment to venues that balance accountability compliance and risk management with behavioral change interventions that address the primary underlying causes for recidivism There are many moving parts to this effort and it is a complex proposition It requires substantial changes to law procedure decision making roles and responsibilities expertise and funding Moreover it requires a radical shift in how we think about crime and punishment Our thinking needs to reflect a perspective that crime is harmful but that much criminal behavior is changeable *Public Policy in the United States* , 2014-12-18 The fifth edition of this well regarded text covers the period up through the 2012 elections It has been revised to make it sleeker more concise and up to date with a clear organisational structure This edition accomplishes these three important goals First it introduces readers to the American approach to public policy making as it has been shaped by our political institutions changing circumstances and ideology Second it surveys American public policy and policymaking in all the major policy areas from economic policy to

Lethal Logic Dennis A. Henigan, 2009-06-30 Guns don't kill people people kill people When guns are outlawed only outlaws will have guns An armed society is a polite society Who hasn't heard these engaging assertions time and time again Burned into the national consciousness by years of targeted disciplined messaging by the National Rifle Association and others they are just a few of the bumper sticker slogans that have defined the gun control debate in America Long ridiculed by gun control advocates they are the first words that come to mind for most Americans when the gun issue is discussed This is the first book both to acknowledge the profound and deadly impact of the gun lobby's bumper sticker logic on the gun control debate and to systematically expose the misguided thinking at the core of the pro gun slogans Indeed the author contends that the gun lobby's remarkable success in blocking passage of lifesaving gun laws is the result in large part of its relentless and effective use of these simple and resonant messages Their persuasive power has been a largely ignored influence on the current politics of gun control in which the gun lobby wields unprecedented power in the Republican Party while many Democratic Party leaders see the policy benefits of stronger gun laws as not worth the political risk of standing up to the NRA The book contends that the current political stalemate over guns will never be broken until the pro gun slogans are exposed as the cleverly disguised fallacies that they are *Crime*
