

The background of the book cover is a detailed illustration of a large sailing ship, possibly a galleon, navigating through a turbulent, dark blue sea. The ship's sails are partially set, and its complex rigging is visible. The overall tone of the illustration is dramatic and historical.

Warfare in Early Modern Europe 1450–1660 Paul E.J. Hammer,2017-05-15 The early modern period saw gunpowder weapons reach maturity and become a central feature of European warfare on land and at sea This exciting collection of essays brings together a distinguished and varied selection of modern scholarship on the transformation of war often described as a military revolution during the period between 1450 and 1660 **The Story of N** Hugh S. Gorman,2013-01-24 In *The Story of N* Hugh S Gorman analyzes the notion of sustainability from a fresh perspective the integration of human activities with the biogeochemical cycling of nitrogen and provides a supportive alternative to studying sustainability through the lens of climate change and the cycling of carbon It is the first book to examine the social processes by which industrial societies learned to bypass a fundamental ecological limit and later began addressing the resulting concerns by establishing limits of their own The book is organized into three parts Part I *The Knowledge of Nature* explores the emergence of the nitrogen cycle before humans arrived on the scene and the changes that occurred as stationary agricultural societies took root Part II *Learning to Bypass an Ecological Limit* examines the role of science and market capitalism in accelerating the pace of innovation eventually allowing humans to bypass the activity of nitrogen fixing bacteria Part III *Learning to Establish Human Defined Limits* covers the twentieth century response to the nitrogen related concerns that emerged as more nitrogenous compounds flowed into the environment A concluding chapter *The Challenge of Sustainability* places the entire story in the context of constructing an ecological economy in which innovations that contribute to sustainable practices are rewarded Mughal Warfare , After the Empires P. Preston,2014-08-26 The shift to the modern world in East Asia was accomplished in part via the experience of colonial rule in the late nineteenth century Following imperial crisis in the 1930s and 1940s independent nation states formed from which the political structure of East Asia is based today *Experiencing Nature* Antonio Barrera-Osorio,2010-01-01 As Spain colonized the Americas during the sixteenth century Spanish soldiers bureaucrats merchants adventurers physicians ship pilots and friars explored the natural world gathered data drew maps and sent home specimens of America s vast resources of animals plants and minerals This amassing of empirical knowledge about Spain s American possessions had two far reaching effects It overturned the medieval understanding of nature derived from Classical texts and helped initiate the modern scientific revolution And it allowed Spain to commodify and control the natural resources upon which it built its American empire In this book Antonio Barrera Osorio investigates how Spain s need for accurate information about its American colonies gave rise to empirical scientific practices and their institutionalization which he asserts was Spain s chief contribution to the early scientific revolution He also conclusively links empiricism to empire building as he focuses on five areas of Spanish activity in America the search for commodities in and the ecological transformation of the New World the institutionalization of navigational and information gathering practices at the Spanish Casa de la Contrataci n House of Trade the development of instruments and

technologies for exploiting the natural resources of the Americas the use of reports and questionnaires for gathering information and the writing of natural histories about the Americas **APM - Archeologia Postmedievale, 18, 2014 -**

The Indian Frontier Jos Gommans, 2017-12-22 This omnibus brings together some old and some recent works by Jos Gommans on the warhorse and its impact on medieval and early modern state formation in South Asia These studies are based on Gommans' observation that Indian empires always had to deal with a highly dynamic inner frontier between semi arid wilderness and settled agriculture Such inner frontiers could only be bridged by the ongoing movements of Turkish Afghan Rajput and other warbands Like the most spectacular examples of the Delhi Sultanate and the Mughal Empires they all based their power on the exploitation of the most lethal weapon of that time the warhorse In discussing the breeding and trading of horses and their role in medieval and early modern South Asian warfare Gommans also makes some thought provoking comparisons with Europe and the Middle East Since the Indian frontier is part of the much larger Eurasian Arid Zone that links the Indian subcontinent to West Central and East Asia the final essay explores the connected and entangled history of the Turko Mongolian warband in the Ottoman and Timurid Empires Russia and China **The Economy of Later Renaissance Europe 1460-1600** Harry A. Miskimin, 1977-11-30

A study of Charles I's two unsuccessful attempts to bring religious conformity to Scotland *Mr. Smith Goes to China* Jessica Hanser, 2019-07-23 An account of eighteenth century global commerce as seen through the lives of three Scottish traders written with verve and filled with arresting details Tonio Andrade author of *The Gunpowder Age* This book delves into the lives of three Scottish private traders George Smith of Bombay George Smith of Canton and George Smith of Madras and uses them as lenses through which to explore the inner workings of Britain's imperial expansion and

global network of trade revealing how an unstable credit system and a financial crisis ultimately led to greater British intervention in India and China This book is a history of British seafaring and imperialism written largely from a micro level perspective placing the focus on individual traders rather than the East India Company as a whole But it is not only an imperial history It also unravels the interwoven financial political and social relations between Britain China and India in the eighteenth century Hanser has consulted an impressively wide range of archival sources in different languages and located in various countries from private letters to periodicals and from official Chinese documents to East India Company reports Her work contributes to our understanding of 18th century British imperial history Reviews in History **The Routledge**

Companion to Marine and Maritime Worlds 1400-1800 Claire Jowitt, Craig Lambert, Steve Mentz, 2020-05-21 This book has been nominated for The Mountbatten Award for Best Book in the Maritime Media Awards 2021 The Routledge Companion to Marine and Maritime Worlds 1400 1800 explores early modern maritime history culture and the current state of the research and approaches taken by experts in the field Ranging from cartography to poetry and decorative design to naval warfare the book shows how once traditional and often Euro chauvinistic depictions of oceanic mastery during the early modern period have been replaced by newer global ideas This comprehensive volume challenges underlying assumptions by balancing its assessment of the consequences and accomplishments of European navigators in the era of Columbus da Gama and Magellan with an awareness of the sophistication and maritime expertise in Asia the Arab world and the Americas By imparting riveting new stories and global perceptions of maritime history and culture the contributors provide readers with fresh insights concerning early modern entanglements between humans and the vast unpredictable ocean With maritime studies growing and the ocean s health in decline this volume is essential reading for academics and students interested in the historicization of the ocean and the ways early modern cultures both conceptualized and utilized seas **Conquests and Cultures** Thomas Sowell, 2021-08-10 This book is the culmination of 15 years of research and

Magra, 2016-10-14 Poseidon s Curse interprets the American Revolution from the vantage point of the Atlantic Ocean Christopher P Magra traces how British naval impressment played a leading role in the rise of Great Britain s seaborne empire yet ultimately contributed significantly to its decline Long reliant on appropriating free laborers to man the warships that defended British colonies and maritime commerce the British severely

jeopardized mariners earning potential and occupational mobility which led to deep resentment toward the British Empire Magra explains how anger about impressment translated into revolutionary ideology with impressment eventually occupying a major role in the Declaration of Independence as one of the foremost grievances Americans had with the British government

The Medieval Frontiers of Latin Christendom Felipe Fernandez-Armesto, 2017-05-15 The aim of this first volume in the series *The Expansion of Latin Europe* is to sketch the outlines of medieval expansion illustrating some of the major topics that historians have examined in the course of demonstrating the links between medieval and modern experiences The articles reprinted here show that European expansion began not in 1492 following Columbus's voyages but earlier as European Christian society re arose from the ruins of the Carolingian Empire The two phases of expansion were linked but the second period did not simply replicate the medieval experience Medieval expansion occurred as farmers merchants and missionaries reduced forests to farmland and pasture created new towns and converted the peoples encountered along the frontiers to Christianity Later colonizers subsequently adapted the medieval experience to suit their new frontiers in the New World

Empire and Holy War in the Mediterranean Phillip Williams, 2014-05-12 In the century after 1530 the empires of the Habsburgs of Spain and the Ottoman Turks fought a maritime war that seemed destined to lead nowhere lasting peace was as unlikely as final triumph in part because the salient feature of this conflict was a violent form of piracy practiced by the corsairs of North African and Malta It was fundamentally a war of unequal means since the Habsburgs of

Spain had too few good warships and the Ottomans too many bad ones Christendom and Islam engaged in a war fought largely through the exercise of private violence the Hospitaller Knights of Malta and ghazi captains of North Africa succeeded in imposing their crusading ethos on the Mediterranean If a degree of futility loomed over these campaigns it was nevertheless true that the Mediterranean witnessed a sustained conflict which in scale and intensity was far greater than that of any contemporary form of warfare at sea Moreover the sea was never abandoned as until at least 1620 large galley fleets continued to patrol the inland sea The raiding methods employed by Elizabethan seadogs like Sir Francis Drake would certainly not have worked in this theatre of arms as the defences in Italy and North Africa were much more formidable than those of the Atlantic Phillip Williams begins with a detailed examination of the oared warships used in these campaigns He then explores the structures of political and military organization and the role of geography and the environment in shaping the fighting stressing that the Italian territories were of vital significance to the Habsburgs of Spain He considers the cultural and historical outlook of protagonists such as the Habsburg rulers Charles V and Philip II and the Ottoman Sultan S leyman the Magnificent examining the extent to which the dictates of prudence triumphed over ideals of performing the service of God Providing a unique perspective on early modern maritime conflict this book will be essential reading for all students and researchers of Mediterranean History and the early modern world *Firearms* Kenneth Warren Chase,2003-07-07 This book is a history of firearms across the world from the 1100s up to the 1700s from the time of their invention in China to the time when European firearms had become clearly superior It asks why it was the Europeans who perfected firearms when it was the Chinese who had invented them but it answers this question by looking at how firearms were used throughout the world
