**Diamond** Dennis Bergot, 2004-02-17 Seminar paper from the year 2004 in the subject Economy Environment economics grade 1 0 A University of Hamburg Centre for Sea and Climate Research course Seminar Contemporary Environmental Problems language English abstract The starting point of Diamond's book *Guns Germs And Steel* is a question he was asked by an indigenous New Guinean friend of his called Yali His question was Why is it that you white people developed so much cargo and brought it to New Guinea but we black people had little cargo of our own 1 addressing the obvious inequality in wealth and power of today's world With his book Diamond tries to provide an answer for this question According to Diamond the immediate causes for the inequalities in the world today are to be found in the different stages of development between the continents as of around A D 1500 By that time only societies of Eurasia the landmass that constitutes Asia and Europe and there especially the Western Europeans possessed ocean going ships population decimating germs steel weapons horses usable for warfare easy spread of information by an efficient writing system and many other means that come in handy decimating subjugating or in some cases even exterminating the original inhabitants of other continents Diamond calls these advantages the proximate factors of differing developments that led to the inequalities The book's title *Guns Germs And Steel* can be understood as a summary of these proximate causes In chapter three of his book Diamond cites as a prominent example of the inequalities the conquest by the Spaniard Francisco Pizarro and a few hundred soldiers over the Inca emperor Atahualpa at Cajamarca Peru in A D 1532 The Spanish got there and won because they possessed the above stated proximate factors He then turns the point around and asks why for instance the Native Americans or Aboriginal Australians were not the ones who possessed these proximate factors and used them to conquer Europe **Guns, Germs and Steel**

Riley Quinn, 2017-07-04 Winner of the 1998 Pulitzer *Guns Germs and Steel* attempts to answer why human history unfolded differently on different continents **Guns, Germs and Steel** Jared M. Diamond, 2019 Why has human history unfolded so differently across the globe In this Pulitzer Prize winning book Jared Diamond puts the case that geography and biogeography not race moulded the contrasting fates of Europeans Asians Native Americans sub Saharan Africans and aboriginal Australians An ambitious synthesis of history biology ecology and linguistics *Guns Germs and Steel* remains a ground breaking and humane work of popular science An Analysis of Jared Diamond's *Guns, Germs & Steel* Riley Quinn, 2017-07-05 In his 1997 work *Guns Germs and Steel* Jared Diamond marshals evidence from five continents and across 13 000 years of human history in an attempt to answer the question of why that history unfolded so differently in various parts of the globe His results offer new explanations for why the unequal divisions of power and wealth so familiar to us today came into existence and have persisted Balancing materials drawn from a vast range of sources addressing core problems that have fascinated historians anthropologists biologists and geographers alike and blending his analysis to create a compelling narrative that became an international best seller and reached a broad general market required a mastery of the critical thinking skill of reasoning that few other scholars can rival Diamond's reasoning skills allow him to persuade his

readers of the value of his interdisciplinary approach and produce well structured arguments that keep them turning pages even as he refocuses his analysis from one disparate example to another Diamond adds to that a spectacular ability to grasp the meaning of the available evidence produced by scholars in those widely different disciplines making *Guns Germs and Steel* equally valuable as an exercise in high level interpretation [Key Takeaways, Analysis and Review of Jared Diamond's Guns, Germs, and Steel](#) Eureka Books,2015-07-30 *Guns Germs Steel* by Jared Diamond Key Takeaways Analysis Review *Guns Germs Steel The Fates of Human Societies* by Jared Diamond won the Pulitzer Prize for the first edition that was published in 1997 Thirteen thousand years of human history are explored in order to explain why societies around the world evolved differently from each other and how those differences led to the conquest of particular groups at the hands of others particularly the defeat of Native Americans both North and South at the hands of much more sophisticated and advanced Eurasian forces This companion to *Guns Germs Steel* includes Overview of the book Important People Key Takeaways Analysis of Key Takeaways and much more ***Guns, Germs, and Steel: The Fates of Human Societies*** Jared Diamond,1999-04-17 Fascinating Lays a foundation for understanding human history Bill Gates In this artful informative and delightful William H McNeill New York Review of Books book Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world Societies that had had a head start in food production advanced beyond the hunter gatherer stage and then developed religion as well as nasty germs and potent weapons of war and adventured on sea and land to conquer and decimate preliterate cultures A major advance in our understanding of human societies *Guns Germs and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history Winner of the Pulitzer Prize the Phi Beta Kappa Award in Science the Rhone Poulenc Prize and the Commonwealth club of California s Gold Medal [Summary of Jared Diamond's Book: Guns, Germs, and Steel](#) Good Summaries,2021-08-27 In *Guns Germs and Steel* Diamond asks fundamental questions about humanity why did different civilizations develop so unequally Did some people possess certain advantages over others What were they To answer these questions he undertakes a detailed analysis of human history across the globe beginning in 11 000 B C In his research he discovers that the explanation lies in geography rather than biology contrary to commonly held racist assumptions for why societies are so unequal Geographical differences allowed some societies to develop food production earlier than others they allowed technology to spread more quickly in addition he argue that the differences between different peoples and societies of the world are largely attributable to geographic differences between different world regions Humans began pursuing agriculture in certain parts of the world because the fertile soil and temperate climate made agriculture a good use of time and resources Agricultural societies gained tremendous advantages over non agricultural societies because the increase in leisure time enabled people to develop technologies and centralized political structures The proximity to animals gave people immunities to deadly diseases As a result some societies were able to conquer others Read on to unearth the challenging

fascinating and overwhelmingly important understanding of world history Lessons from the past will equip us for the future Much of human history has consisted of unequal conflicts between the haves and the have nots Jared Diamond Disclaimer This summary is meant to enhance your reading experience The insights analysis and overall essence is an unofficial work and not the original book It is not intended as a substitute for the original work it summarizes It is not licensed approved authorized or endorsed by the original author or publisher GUNS, GERMS AND STEEL, 2007 'We Hold These Truths to Be Self-Evident...' Kenneth N. Addison, 2009-02-16 We hold these truths to be self evident An Interdisciplinary Analysis of the Roots of Racism and Slavery in America delves into the philosophical historical socio cultural and political evolution of racism and slavery in America The premise of this work is that racism and slavery in America are the result of an unintentional historical intertwining of various Western philosophical religious cultural social economic and political strands of thought that date back to the Classical Era These strands have become tangled in a Gordian knot which can only be unraveled through the bold application of a variety of multidisciplinary tools By doing so this book is intended help the reader understand how the United States a nation that claims all men are created equal could be responsible for slavery and the intractable threads of racism and inequality that have become woven into its cultural the fabric *Quicklet on Guns, Germs, and Steel by Jared Diamond* Niko Silvester, 2011-12-20 ABOUT THE BOOK While working in New Guinea in 1972 where he was studying bird evolution Jared Diamond met a local politician touring the area At the time Papua New Guinea was approaching independence after long being administered by Australia Yali the politician spoke about preparing his people for independence and asked Diamond many questions about history and other topics Finally he wanted to know why the conquering Europeans had arrived with so many goods and technology while the New Guineans had so little of their own It seems to be a simple question and yet answering it took Diamond twenty five years Guns Germs and Steel The Fates of Human Societies is his attempt to answer not just Yali s question but the whole question of why some peoples in some parts of the world developed technological advances before others and why some of them were then able to conquer other peoples using those advances MEET THE AUTHOR Nicole has been writing since she could make letters with a pencil and has been making a living at it for more than ten years She has gone back to school too many times studying archaeology folklore writing and visual art She writes fiction under several pen names and also does printmaking book arts and photography She s an avid amateur natural historian with a particular fascination for things that fly whether it s birds bats or insects And if it s possible to be both a luddite with a love for the low tech and a technophile with a fascination for everything new and shiny Nicole is both She reads too many books plays too many video games and watches too much anime EXCERPT FROM THE BOOK Guns Germs and Steel is as mentioned above Jared Diamond s attempt to answer the question of why some societies were able to conquer their neighbours and spread across the globe instead of being conquered while their neighbours did the spreading The usual reasons a person might think up to answer that question are generally unsatisfactory Biological

explanations that some peoples are more intelligent than others are not only distasteful and racist but unproven In fact studies of human intelligence the ones that overcome cultural bias tend to show that humans are on average pretty much the same across cultures So why did some cultures develop the technology to conquer more quickly and some didn t develop such technology at all Diamond takes us right back to the beginnings of human settlement on the different continents to show that the explanation may be largely geographic That is the places where people settled gave them more or fewer advantages in the areas necessary for developing the social complexity which in turn could lead to technological advances
