Edge Of Now New Questions For Democracy In The Network Age:

African Postcolonial Modernity S. Osha, 2014-09-04 African cultures and politics remain significantly affected by precolonial and postcolonial configurations of modernity as well as hegemonic global systems This project explores Africa s conversation with itself and the rest of the world critiquing universalist notions of democratization The Anglosphere Challenge James C. Bennett, 2007-04-03 Despite repeated predictions of the demise of America and the English speaking nations as the world s predominant culture James C Bennett believes that this gap will widen in the coming decades Coining the term anglosphere to describe a loose coalition based on a common language and heritage Bennett believes that traits common to these countries a particularly strong and independent civil society openness and receptivity to the world its people and ideas and a dynamic economy have uniquely positioned them to prosper in a time of dramatic technological and scientific change In a wide ranging exploration back to the Industrial Revolution and into the future The Anglosphere Challenge gives voice to a growing movement on both sides of the Atlantic

The Politics of Method in the Human Sciences George Steinmetz, 2005-05-16 Collection of new essays on the past present and future of positivism in the various social sciences

Essays on: The Nature and State of Modern Economics Tony Lawson, 2015-04-17 What do modern academic economists do What currently is mainstream economics What is neoclassical economics And how about heterodox economics How do the central concerns of modern economists whatever their associations or allegiances relate to those traditionally taken up in the discipline And how did economics arrive at its current state These and various cognate questions and concerns are systematically pursued in this new book by Tony Lawson The result is a collection of previously published and new papers distinguished in providing the only comprehensive and coherent account of these issues currently available The financial crisis has not only revealed weaknesses of the capitalist economy but also highlighted just how limited and impoverished is modern academic economics Despite the failings of the latter being more widely acknowledged now than ever there is still an enormous amount of confusion about their source and true nature In this collection Tony Lawson also identifies the causes of the discipline s failings and outlines a transformative solution to its deficiencies Amongst other things Lawson advocates for the adoption of a more historical and philosophical orientation to the study of economics one that deemphasizes the current focus on mathematical modelling while maintaining a high level of analytical rigour In so doing Lawson argues for a return to long term systematic and sustained projects in the manner pursued by the likes of Marx Veblen Hayek and Keynes concerned first and foremost with advancing our understanding of social reality Overall this forceful and persuasive collection represents a major intervention in the on going debates about the nature state and future direction of economics

Ken Saro-Wiwa's Shadow (Expanded Edition) Sanya Osha, 2020-12-21 The Ogoni crisis which reached its peak in Nigeria in the 1990s divided all the major stakeholders namely the Nigerian state the multinational petroleum concerns the Ogoni community and the rest of the Nigerian populace in the conflict There were also undoubtedly

other important ramifications within the Ogoni community such as divisions along the lines of those who were pro government and those who upheld an opposing stance These divisions run deep and define the more subtle contours of the conflict amongst the Ogoni people who were once led by their indomitable leader Ken Saro Wiwa until he was hanged by the General Sani Abacha regime in 1995 Ken Saro Wiwa's struggle exemplified certain core values and tenets including democracy minority rights environmental awareness non violence and respect for human dignity However as he lived and worked in an antithetical political context governed by veniality despotism and philistinism he was brutally cut down This study provides an in depth analysis of the Ogoni crisis and its unfolding aftermath [Out of the Energy Labyrinth](#) David Howell,Carole Nakhle,2007-05-25 The planet is under threat And that threat comes from energy So goes the standard argument But according to David Howell and Carole Nakhle this reasoning is wrong In their provocative and original book the authors argue that energy can become a tool for environmental protection that energy and environment are not by definition in conflict with each other and that by pooling energy production and environmental protection ideas energy can be part of a solution rather than the problem This book is firmly grounded in reality given the demands of China India and other developing economies and makes specific proposals a radical rethinking on energy investment strategies massive incentives to develop alternative fuel technologies a ground breaking public awareness strategy to redirect consumers and policy makers to embrace fundamental though essentially painless change in consumption patterns The solutions that Howell and Nakhle offer are unapologetically short term This is because the energy challenges immediately ahead if not handled right could undermine all longer term attempts to limit climate change Their important and novel approach makes this book essential reading for an understanding of today's bewildering environmental debates [IBSS](#) Compiled by the British Library of Political and Economic Science,2001 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences

Reorienting Economics Tony Lawson,2003 Contemporary economics is characterized by a mismatch between its methods of analysis and the nature of the world it seeks to interpret Despite regular economic crises and ongoing critique of the discipline the drift from political economy into applied mathematics appears to continue unabated In this book Tony Lawson advocates a realignment of economics with social reality In analyzing

mainstream economists misplaced universality the author places ontology at the heart of a reoriented future in which economics is integrated within the wider human and social sciences The British Conservative Party and One Nation Politics David Seawright,2011-12-22 Won the 2011 Prize for best publication on Conservatives and Conservatism awarded by the specialist group Conservatives and Conservatism of the UK Political Studies Association *Sociological Research*,2007
