Position Classification Standards United States. Office of Personnel Management. Office of Classification,1990 **The Craft of Editing** Michael Alley,2013-03-08 You are a hired gun of sorts a manager scientist or engineer called upon to edit a document Perhaps you are overseeing a long report or thesis reviewing a journal article or providing comments on a proposal For the document before you what changes do you suggest How do you clearly and efficiently communicate those changes to the author How do you convince the author and the other editors that those changes are needed The answers to these questions define how you edit someone's writing In business engineering and science the process of editing causes much strife In fact my experience in teaching professional writing over the past fifteen years has been that editing is the number one complaint that professionals have about the process of documenting their work Many professionals complain that this editing seems to arise more from whim than from logic that what flies in one document is often shot down in another Others complain that editors change too much essentially inserting their own individual styles Still others complain that the sign off process is so inefficient and taxing that they sometimes do not document work they know should be documented While in many cases these complaints are unfounded in many others they are legitimate This book addresses those complaints that are legitimate by showing managers scientists and engineers how to make their editing both more effective and more efficient

Office of Personnel Management,1994 *Heart Rate Variability: Clinical Applications and Interaction between HRV and Heart Rate* Karin Trimmel,Jerzy Sacha,Heikki Veli Huikuri,2015-10-07 Over the last decades assessment of heart rate variability HRV has increased in various fields of research HRV describes changes in heartbeat intervals which are caused by autonomic neural regulation i e by the interplay of the sympathetic and the parasympathetic nervous systems The most frequent application of HRV is connected to cardiological issues most importantly to the monitoring of post myocardial infarction patients and the prediction of sudden cardiac death Analysis of HRV is also frequently applied in relation to diabetes renal failure neurological and psychiatric conditions sleep

disorders psychological phenomena such as stress as well as drug and addiction research including alcohol and smoking The widespread application of HRV measurements is based on the fact that they are noninvasive easy to perform and in general reproducible if carried out under standardized conditions However the amount of parameters to be analysed is still rising Well established time domain and frequency domain parameters are discussed controversially when it comes to their physiological interpretation and their psychometric properties like reliability and validity and the sensitivity to cardiovascular properties of the variety of parameters seems to be a topic for further research Recently introduced parameters like pNNxx and new dynamic methods such as approximate entropy and detrended fluctuation analysis offer new potentials and warrant standardization However HRV is significantly associated with average heart rate HR and one can conclude that HRV actually provides information on two quantities i e on HR and its variability It is hard to determine which of these two plays a principal role in the clinical value of HRV The association between HRV and HR is not only a physiological phenomenon but also a mathematical one which is due to non linear mathematical relationship between RR interval and HR If one normalizes HRV to its average RR interval one may get pure variability free from the mathematical bias Recently a new modification method of the association between HRV and HR has been developed which enables us to completely remove the HRV dependence on HR even the physiological one or conversely enhance this dependence Such an approach allows us to explore the HR contribution to the clinical significance of HRV i e whether HR or its variability plays a main role in the HRV clinical value This Research Topic covers recent advances in the application of HRV methodological issues basic underlying mechanisms as well as all aspects of the interaction between HRV and HR

The Griffith Project, Volume 12 Paolo Cherchi Usai,2019-07-25 THE GRIFFITH PROJECT Paolo Cherchi Usai General Editor Volume 12 Essays on D W Griffith Edited by Paolo Cherchi Usai and Cynthia Rowell With contributions by

William M Drew Helmut F rber Andr Gaudreault Philippe Gauthier Lea Jacobs Joyce Jesionowski Charlie Keil Richard Koszarski Arthur Lennig Pat Loughney David Mayer Russell Merritt Jan Olsson Paul Spehr Yuri Tsivian Linda Williams In early 1996 an international group of 35 specialists in silent cinema volunteered to write commentaries on more than six hundred films directed written produced and supervised by D W Griffith or featuring him as a performer for the eleven volume series The Griffith Project the largest monograph ever assembled on an individual film director in conjunction with the massive retrospective held at the Pordenone Silent Film Festival from 1996 to 2008 All authors involved in The Griffith Project were bound to strict editorial rules most notably the fact that all titles in the series would be assigned to them in pre determined groups rather than as a result of their own individual preference for this or that specific entry The patience and commitment demonstrated by all scholars in this endeavor requires at least a symbolic recognition We therefore invited the members of the project team to write an essay on a D W Griffith related topic of their own choice The papers included in this volume constitute the response to our carte blanche invitation Our offer was also extended to other experts on D W Griffith who for various reasons were unable to participate in The Griffith Project but consistently supported it with their generous advice and insight This volume brings The Griffith Project to completion as 2008 sees the last installment of the D W Griffith program at the Pordenone Silent Film Festival with the screening of his films produced between 1925 and 1931 Not surprisingly twelve years of research on D W Griffith have unearthed an impressive wealth of knowledge but also an equally amazing array of new questions certainly enough of them to fill several more volumes Some of them including the increasingly complex issue of D W Griffith s role as production supervisor are only introduced or barely mentioned here but we are confident that what we have called the Griffith Project will continue at the Giornate and elsewhere with more research and newly found or preserved prints PAOLO CHERCHI USAI is Director of the National Film and Sound Archive of Australia He is co founder of the Pordenone Silent Film Festival and of the L Jeffrey Selznick School of Film Preservation at George Eastman House Rochester New York He directed the experimental feature film Passio 2007 His latest book is David Wark Griffith Editrice Il Castoro 2008
