**Contemporary Issues in Educational Policy and School Outcomes** Wayne K. Hoy, Cecil Miskel, 2006-03-01 This book is the fifth in a series on research and theory dedicated to advancing our understanding of schools through empirical study and theoretical analysis. Scholars both young and established are invited to publish original analyses but we especially encourage young scholars to contribute to this series. The current volume is similar to its predecessors in that it provides a mix of beginning and established scholars and a broad range of theoretical perspectives in all 14 authors contributed to 9 separate but related analyses which were selected for publication this year.

**Education, Policy and Ethics** Mike Bottery, 2001-01-01 Across the world a number of long term trends globalization marketization managerialism are now impacting on national education policies. Here Mike Bottery shows how paradoxically these forces are making education both more centralized and more fragmented. In this magisterial study of educational policy and practice he shows the dangers this creates and in response how to create a more humane and democratic education system.

**Education Policy** Mark Olssen, John A Codd, Anne-Marie O'Neill, 2004-06-08 Education policy is now a global matter and all the more complex for that. Mark Olssen, John Codd and Ann Marie O'Neill do us an invaluable service in producing a carefully theorised guide to current issues and key concerns. This is an important erudite and very practical book. Stephen J Ball, Education Policy Research Unit, University of London. Given the global reach of neoliberal policies we need cogent books that enable us to better understand the major effects such tendencies have. Education Policy is such a book. It is insightful and well written and should be read by all of us who care deeply about what is happening in education in international contexts. Michael W Apple, Author of Educating the Right Way and John Bascom, Professor of Education, University of Wisconsin, Madison. I really am taken with the book. The range and depth of analysis are truly impressive. This book is a magnum opus and everyone in the area should read it. Hugh Lauder, University of Bath. In their insightful and comprehensive book on education policy, Mark Olssen, John Codd and Anne Marie O'Neill wrestle with the big questions of citizenship and democracy in an age of globalization. They argue that education policy in the 21st century is the key to security, sustainability and survival. The book anchored in the poststructuralist perspective of Michel Foucault traverses the whole territory of education policy not only methods and approaches of policy analysis and the dominant political perspectives that influence policy: classical liberalism, social democracy and neo liberalism but also those policy areas that require the closest scrutiny: markets, trust, professionalism, choice, diversity and finally community, citizenship and democracy. This is the new policy bible for educationalists; it is at once systematic, provocative and instructive. Michael A Peters, Research Professor, University of Glasgow. It is rare indeed for books with such ambitious scope as this one to appear within educational scholarship. This is an important book for any graduate student who is undertaking work on any aspect of education policy. Education Review. This book provides an international perspective on education policy and of the role and function of education in the global economy. The authors present a

Foucauldian perspective on the politics of liberal education within a theoretical framework necessary for the critical analysis of education policy The authors set out the analyses necessary for understanding the restructuring in education and social policy that has occurred in many countries affected by the resurgence of neo liberal political theory They examine education policy in relation to globalization citizenship and democracy The authors argue that globalization is an extension of neoliberalism and is destructive of the nation state community and democracy They show the importance of education in building strong democratic nation states and global communities based on cultural identity and inter cultural awareness This book is essential reading for students of education policy studies and social policy analysis

**The New Digital Education Policy Landscape** Cristóbal Cobo,Axel Rivas,2023-06-16 This book provides a scholarly investigation of the new era we have entered in which platforms can replace or profoundly modify educational systems and questions the role of educational policy in this new stage of platform based digital technology The contributors explore important questions around who controls these transformations what form they are taking what the balance between national education policies and Big Tech education solutions should be as well as whether there should be a public platform in every education system that digitally expands learning and what evidence there is that learning will be more efficient using these platforms The first part provides a selection of empirical studies on the new digital educational policy and an analysis of the real opportunities and concerns that governments face in this regard while the second offers reflections on the processes of platformization and the role of the state in this new digital world Uniquely examining the temporal evolution of these changes and taking a theoretical political and epistemological approach it crucially opens pathways for dialogical and diverse critical thinking about profound problems and possibilities Gathering purposeful thinking that creates space for design solutions and rethinking educational systems considering these new technological artefacts it will appeal to researchers and specialists in the fields of educational technology and educational policy

**Research of Vs Research for Education Policy** Richard Desjardins,2009-02-01 As national governments reform their educational systems to meet the challenges of living in a globalised world the agenda setting power of transnational organizations like the OECD and the EU have become more transparent in the last decade The phenomenon of globalization has a number of implications for education policy making processes and not least it has had an impact on who conducts policy studies and how This book brings together a variety of contributions which explore recent political economic changes affecting education policy making processes including the ascension of neo liberalism and the transnationalization of education policy making as well as the tension between research of policy and research for policy Working from different perspectives the authors help to provide a better understanding of these two important sets of issues which the field of education must contend with today

**Higher Education Policy: An International Comparative Perspective** F. Kaiser,P. Maassen,L. Meek,F. van Vught,E. de Weert,L. Goedegebuure,2014-06-28 Tremendous changes are affecting the structure and funding of higher education in many countries This volume attempts to identify and analyze the

principles structural features and modes of work of the different higher education policies operating in eleven countries as well as their commonalities and differences in the light of both general international trends and country specific factors In order to gather the relevant information for the project national correspondents were provided with an overarching framework to guide them in their work and to ensure maximum comparability of the resulting reports Each country report is broken down into four sections the structure and goals of higher education systems authority in the system higher education policy and the impact of each on institutional governance and management The final chapter draws together the general trends which have emerged a move towards less state control a strengthening of institutional autonomy and increased governance competition between institutions privatization of funding greater market orientation and growing institutional accountability for quality and service

**Education and the Public Interest** Edward P. St. John, 2007-05-28 Economic globalization has been accompanied by implementation of education reforms linked to accountability and public finance schemes that emphasize student choice in schools and student loans in higher education In the U S these reforms are rationalized based on intermediate variables like the number of math credits completed in high school and net prices However the reforms rationalized based on this research are seldom evaluated in relation to outcomes i e measures of student achievement and equal opportunity to attain an education In *Education and the Public Interest* the editor re-examines the political rationales for these reforms John Rawls's theory of justice is reconstructed to develop a framework for assessing the effects of public policy on these outcomes This volume undertakes a comparative study of the states in the U S to examine how education reforms influence student achievement high school graduation and college access and finance schemes influence college access Policies implemented by states in the 1990s were associated with improved achievement as measured by test scores for high school students These policies also correlate with increased high school drop out rates and the widening gap in college enrolment rates across income groups This volume considers how privatization and accountability policies can be reconstructed to reduce inequality while continuing to improve student achievement and college enrolment I enjoyed reading the book and benefited from it and I feel confident others will as well I am particularly taken by its sweep and by the skill and persuasiveness with which the author ties together the broad trends and themes of privatization globalization school reform preparation equity equality and college access Prof James C Hearn Vanderbilt University USA What I especially like about this book is the framing of the importance of the topic in terms of the global political and economic changes and the notion of access to quality education as a basic right Prof Laura W Perna College of Education University of Maryland USA
