Building Schools, Making Doctors Katherine L. Carroll, 2022-05-31 In the late nineteenth century medical educators intent on transforming American physicians into scientifically trained elite professionals recognized the value of medical school design for their reform efforts Between 1893 and 1940 nearly every medical college in the country rebuilt or substantially renovated its facility In Building Schools Making Doctors Katherine Carroll reveals how the schools constructed during this fifty year period did more than passively house a remodeled system of medical training they actively participated in defining and promoting an innovative pedagogy modern science and the new physician Interdisciplinary and wide ranging her study moves architecture from the periphery of medical education to the center uncovering a network of medical educators architects and philanthropists who believed that the educational environment itself shaped how students learned and the type of physicians they became Carroll offers the first comprehensive study of the science and pedagogy formulated by the buildings the influence of the schools donors and architects the impact of the structures on the urban landscape and the local community and the facilities privileging of white men within the medical profession during this formative period for physicians and medical schools

**Send Us a Lady Physician** Ruth J. Abram, 1985 The irony of women s acceptance into the medical world and the unfortunate decline in their status at the beginning of the twentieth century is illustrated in this volume through words and pictures By focusing on the class of 1879 at the Woman s Medical College of Pennsylvania the authors of the various essays depict individual trials frustrations and victories of nineteenth century women physicians and we come to understand a vital aspect of our history and how it affects us all today

**An American Health Dilemma** W. Michael Byrd, Linda A. Clayton, 2012-10-02 At times mirroring and at times shockingly disparate to the rise of traditional white American medicine the history of African American health care is a story of traditional healers root doctors granny midwives underappreciated and overworked African American physicians scrupulous and unscrupulous white doctors and scientists governmental support and neglect epidemics and poverty Virtually every part of this story revolves around race More than 50 years after the publication of An American Dilemma Gunnar Myrdal s 1944 classic about race relations in the

USA An American Health Dilemma presents a comprehensive and groundbreaking history and social analysis of race relations and the African American medical and public health experience Beginning with the origins of western medicine and science in Egypt Greece and Rome the authors explore the relationship between race medicine and health care from the precursors of American science and medicine through the days of the slave trade with the harrowing middle passage and equally deadly breaking in period through the Civil War and the gains of reconstruction and the reversals caused by Jim Crow laws It offers an extensive examination of the history of intellectual and scientific racism that evolved to give sanction to the mistreatment medical abuse and neglect of African Americans and other non white people Also included are biographical portraits of black medical pioneers like James McCune Smith the first African American to earn a degree from a European university and anecdotal vignettes like the tragic story of the Hottentot Venus which illustrate larger themes An American Health Dilemma promises to become an irreplaceable and essential look at African American and medical history and will provide an invaluable baseline for future exploration of race and racism in the American health system *Departments of Labor, and Health, Education, and Welfare Appropriations for 1971* United States. **Psychology and Selfhood in the Segregated South** Anne C. Rose,2009-06-15 In the American South at the turn of the twentieth century the legal segregation of the races and psychological sciences focused on selfhood emerged simultaneously The two developments presented conflicting views of human nature American psychiatry and psychology were optimistic about personality growth guided by the new mental sciences Segregation in contrast placed racial traits said to be natural and fixed at the forefront of identity In a society built on racial differences raising questions about human potential as psychology did was unsettling As Anne Rose lays out with sophistication and nuance the introduction of psychological thinking into the Jim Crow South produced neither a clear victory for racial equality nor a single minded defense of traditional ways Instead professionals of both races treated the mind set of segregation as a hazardous subject Psychology and Selfhood in the Segregated South examines the tensions stirred by mental science and restrained by southern custom Rose highlights the role of southern black intellectuals who embraced psychological theories as an instrument of reform their white counterparts who proved wary of examining the mind and northerners eager to change the South by means of science She argues that although psychology and psychiatry took root as academic disciplines all these practitioners were reluctant to turn the sciences of the mind to the subject of race relations History of Education: Studies of education systems Roy Lowe,2000 The Morehouse Mystique Marybeth Gasman,Louis W. Sullivan,2012-04 Tells the history of the Morehouse School of Medicine situating the school in the context of the history of medical education for Blacks and race relations throughout the country From publisher description *Departments of Labor and Health, Education, and Welfare appropriations for 1978* United States.
