Education And Social Problems:

Politics, Education, and Social Problems Jennifer Rich, 2021-06-17 This book offers an innovative perspective on the intersection of politics education and social problems It considers how we can create social change by talking about politics and social problems in more open direct and inclusive ways in educational spaces Drawing on data from a range of settings this book closely examines how and when complicated conversations take place in classrooms schools and communities The book tackles a series of hot button timely issues including race religion politics and gender and turns a critical eye to schools and the communities in which they are situated the conversations adults have and pointedly ignore with one another and perhaps most critically the politics that shape our society Education and Social Problems Carl Weinberg, 1971

Educational Research: the Educationalization of Social Problems Paul Smeyers, 2009-04-14 Pushing social responsibilities on schools is a process that has been underway for a long time This phenomenon has been studied more in Europe than in North America and the U K and has been labelled P dagogisierung The editors have chosen to use Educationalization to identify the overall orientation or trend toward thinking about education as the focal point for addressing or solving larger human problems The term describes these phenomena as a sub process of the modernization of society but it also has negative connotations such as increased dependence patronization and pampering In this book distinguished philosophers and historians of education focus on educationalization to expand its meaning through an engagement with educational theory Topics discussed are the family and the child the learning society citizenship education widening participation in higher education progressive education and schooling movements such as No Child Left Behind Smeyers and Depaepe s book offers great insights into one of the most ambivalent phenomena of today s educational world and especially educational policy The contributions assembled represent perspectives of some of the most respected scholars in the field Their manifold critiques of the educationalization of social problems are rather convincing Our time is definitely ripe for such analysis Roland Reichenbach Center for Educational Studies University of Basel Switzerland This is a challenging critical and analytical treatment of the tendency of contemporary administrations to overburden educational institutions with the expectation that they will provide the solutions to an increasingly diverse range of social and economic problems It brings together the theoretical resources of a distinguished international group of philosophers and historians of education and deserves the careful attention of educational policy makers practitioners and researchers alike David Bridges Von H gel Institute St Edmund s College Cambridge England This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research Also realized by the Research Community are Educational Research Why What Works Doesn t Work 2006 and Educational Research Networks and Technologies 2007 **The Importance of Teaching Social Issues** Samuel Totten, 2014-08-07 John Dewey s My Pedagogical Creed outlined his beliefs in regard to

Critical Social Issues in American Education H. Svi Shapiro, 2004-09-22 This text reader brings together powerful readings that critically situate issues of education in the context of the major cultural moral political economic ecological and spiritual crises that confront us as a nation and a global community It provides a focus and a conceptual framework for thinking about education in light of these issues Readers are exposed to the thinking of some of the best and most insightful social and educational commentators *Critical Social Issues in American Education Democracy and Meaning in a Globalizing World Third Edition* is intended to work on two levels First it helps readers to develop an awareness of how education is connected to the wider social structures of cultural political and economic life Second it encourages not only a critical examination of our present social reality but also a serious discussion of alternatives of what a transformed society and educational process might look like The editors goal is to deliberately engage readers in connecting the work of teachers to an ethically committed politically charged pedagogy The assumption on which they base the text is that educators must see their work as inextricably linked to the broader conflicts stresses and crises of the social world it is not otherwise possible to make sense of what is happening educationally What happens in school or as part of the educational experience reflects expresses and mediates profound questions about the direction and nature of the society we inhabit The text is organized thematically into five sections which address respectively social justice and democracy consumerism culture and public education marginality and difference moral and spiritual perspectives on education and globalization and education Each section is preceded by a brief essay that introduces the readings This Third Edition includes many new readings and addresses issues that have more recently emerged as especially significant such as concerns about the implications of globalization and the post 9 11 world commercialism violence and the ever increasing influence of high stakes testing This compelling text is relevant for a wide range of courses in educational foundations educational policy curriculum studies and multicultural education that address the social context of education cultural and political change and public policy
