Education And The Common Good A Moral Philosophy Of The Curriculum By Phenix:

Education and the Common Good Philip Henry Phenix, 1961 A Coherent Curriculum for Every Student Edmund C. Short, 2019-10-11 This book exhibits a collection of proposals for how school curriculum may be conceived designed and realized These proposals are drawn from writers both past and present who have presented some particular vision of what curriculum could be like for Pre K 12 schools and have sought to convince others to adopt their proposal for use in some actual school situation The proposals differ from one another in a variety of ways including in their purposes their contents and their perspectives and thus pose a wealth of options for consideration by those who are planning to change their school curriculum to something new and more suitable for their particular clientele Readers will need to weigh the appeal of various proposals presented here against criteria they have for locating an optimum model for their particular situation The proposals selected for inclusion in this book address the whole of the curriculum all levels all subjects all age groups they deal with entire program change rather than with incidental changes in content program arrangements teaching approaches or other limited alterations This book is intended to be a useful resource for those responsible for making decisions in a particular school or school district or at a broader policy making level about what the entire curriculum should be and should include It draws attention to the work of many thoughtful persons who have dealt with the issue of what a coherent curriculum might be like and who in some instances have set up actual programs based on their ideas **Education and the Common Good** Philip Henry Phenix, 1977 *The Palgrave Handbook of Educational Thinkers* Brett A. Geier, 2024-08-21 This handbook presents a durable comprehensive and up to date resource covering the seminal thinkers in education of past and present Each entry will capture the professional background of a legendary thinker and presents their key insights new thinking and major legacies to the field of education Carefully brought together to present a balance of gender and geographical contexts as well as areas of thought and work in the broad field of education this handbook provides a unique history and overview of figures who have shaped education and educational thinking throughout the world Philosophy of Education John Percival Powell, 1974 *Life and Moral Education in Greater China* John Chi-Kin Lee, Stephen Yam-wing Yip, Raymond Ho-Man Kong, 2021-03-29 Arguing for life moral and values education as a bedrock for the original goals of school education this monograph explores how life and values education is conceptualised and imparted in Greater China Under a globalized transnational and technological world where there has been an increase in people's mobility in information and cultural exchanges there is also a growing emphasis on personal and professional ethics Against this context life moral and values education has gained attention for its impact on shaping students' characters as future citizens However the cultivation of these values is made deeply diversified and complex by varying interpretations of life education and values education across societies given that different societies are influenced by different socio cultural traditions educational ideologies and religious beliefs The means and approaches towards life education also vary vastly from formal school subjects

school based programmes as well as teachers and peers role modelling community services extra curricular activities school discipline charity work pastoral care and school ethos Recognising this inherent diversity and complexity in the approach to and the dissemination of life education the contributors to this volume survey the practice of life education in Greater China so far suggesting that life education is most effective when it is diversified dynamic and developmental across contexts This book will provide the opportunity for engaging in important and serious debates about the future and the values that will underpin it and will prove of special interest to scholars and practitioners working on education policies curriculum development and teacher education in Greater China

A Marriage of Philosophy and Music Erich Welling, 2014-04 How to use philosophy and music to open your horizons and enjoy being yourself put theory to work and help you experience personal growth is discussed in A Marriage of Philosophy and Music It is all about after After having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality This book offers a path toward the education of privacy with the key words being selection design and beauty The book relates five areas of general human interest

spirituality philosophy science art and body awareness The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music Because of the plurality of subject matters and methods used in philosophy and music their patterns of discipline are comparable to self discipline A Marriage of Philosophy and Music attempts to create a path in this direction because besides the enjoyment of social culture and personal skills there is enjoyment in being yourself which is a neglected liberal art

With All Your Mind Michael L. Peterson, 2001-10-29 With All Your Mind makes a compelling case for the value of thinking deeply about education in America from a historically orthodox and broadly ecumenical Christian point of view Few people dispute that education in America is in a state of crisis But not many have posed workable solutions to this serious problem Michael Peterson contends that thinking philosophically about education is our only hope for meaningful progress In this refreshing book he invites all who are concerned about education in America to participate in his study which analyzes representative theories and practical strategies that reveal the power of Christian ideas in this vital area

Primary and Secondary Education in Sierra Leone Collier, Ebenezer, 2016-03-29 Colonial education was instituted in Sierra Leone as a consequence of the activities of British philanthropic and missionary bodies from the late 19th to mid 20th century It was largely in the hands of Christian missionaries introduced in the form of evangelism and as part of Western missionary enterprise Such education basically ignored the achievements and contributions of the indigenous populations and for the most part did not cultivate the African student's self esteem and pride The author gives details of policies programmes and statistical outcomes It is important

particularly for policy makers as it may serve as input to the debate on future education policy development and has the potential for contributing to research literature on implementation of educational policies Sierra Leoneans should access the previously lacking and relevant knowledge of the development of education during the fifty years of Independence as presented in this book As such it will also be a valuable resource for college and university lecturers **21st Century**
