Education In A Post Welfare Society:

Education in a Post-welfare Society Sally Tomlinson, 2005 This is the second edition of *Education in a Post Welfare Society* first published in 2001 which provided a critical overview of education policy since 1945 a period during which governments in the UK particularly in England moved from creating and sustaining a welfare state to promoting a post welfare society dominated by private enterprise and competitive markets The first edition took readers through a descriptive review of Acts reports and events in education 1945 2000 placing in context the avalanche of legislation and initiatives that have reformed education into a competitive enterprise in which young people learn to compete locally nationally and globally This edition continues the policy story up to 2005 and covers two terms of a New Labour government and their plans for a third term It also continues an examination of the relationship of education policy to social class race gender and the economy The book continues to demonstrate how a relatively decentralised education system became a system in which funding teaching and curriculum are centrally controlled and privatisation encouraged with education being narrowed to an economic function becoming a prop for global market economy rather than a pillar of welfare state Chronologies of education acts reports and initiatives are provided at the beginning of the first seven chapters major legislation is summarised and suggestions for further reading made Chapters on the middle classes and education the relationship of policy to race gender and disability and education and the economy follow The book is an invaluable resource for all those concerned with social policy and education including educational researchers professionals and politicians

Education in a Post-welfare Society Sally Tomlinson, 2001 A critical overview of education policy as government in Britain has moved from creating a welfare state to promoting a post welfare society dominated by private enterprise and competitive markets Concentrating particularly on the last 20 years the author places in context the avalanche of legislation and documentation that has reformed education into a competitive enterprise in which young people learn to compete She also demonstrates how a relatively decentralized education system became a system in which funding teaching and curriculum were centrally controlled and education narrowed to an economic function

The Politics of Race, Class and Special Education Sally Tomlinson, 2014-05-09 In the World Library of Educationalists series international experts themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands and see how their work contributes to the development of the field Professor Sally Tomlinson brings together 12 of her key writings in one place including chapters from her best selling books and articles from leading journals In this landmark publication she reviews

and recounts the history and development of her research and writing over 30 years that is concerned with the politics of education systems especially special education and the place of social classes and ethnic and racial minorities in the systems. Social class, race and gender have historically always been essential markers in deciding who would receive a minimum or inferior education and thus fail to obtain whatever were currently acceptable qualifications. Definitions of the less able or ineducable were based on beliefs in the biological and cultural inferiority of lower social classes, racial and immigrant groups. Professor Tomlinson's aim in her work has always been to introduce sociological, historical and political perspectives into an area dominated by psychological, administrative and technical views and to explain how the individual problems were connected to wider social structures and policies. This unique collection illustrates the development of Professor Tomlinson's thinking over the course of her long and esteemed career.

Journeys through Childhood Studies Ingrid Richter, 2019-07-10 Investigating the experiences of a group of female students as they journey into and through higher education and into work with and for children. *Journeys through Childhood Studies* offers a critical analysis of the intersectional influences and effects of social division on experiences of higher education and career trajectories. The book explores the influences of gender, race and class on the experiences of higher education and the development of professional identities and whether the professionalisation of work in relation to children and childhood opens up opportunities for career development or narrows the range of choices available to women. Adopting a distinctive qualitative approach to track strategies used by women participants to accommodate the changing terrain of their journeys, this book demonstrates how the women's pathways to university are shaped by factors such as social divisions, friends, family and school and their experiences of working with children. Featuring detailed interviews, *Journeys through Childhood Studies* offers an insightful exploration of the construction and practices of the Children's Workforce. It is a must-read for academics, postgraduate students and those researching Childhood Studies, professional identities and experiences of higher education.
