Education In The South The Modalities Of International Support Revisited:

Education in the South Kees Epskamp, 2000 The Sector Wide approach which is rapidly catching on among policy makers and politicians in donor countries and organizations is used as the background of this book about education and development cooperation The approach is a new way of getting serious about the often stated principle that development cooperation should be in response to what the South wants rather than what the North believes is good for developing countries In the name of this new global approach the Nuffic asked a large number of experts in North and South to take a critical look at the ways in which international support is given in the field of education **Education in the South**, 2000 **Comparative**

and International Education David Phillips, Michele Schweisfurth, 2014-03-13 This revised and updated second edition of Comparative and International Education An Introduction to Theory Method and Practice provides a comprehensive and authoritative introduction to the key themes definitions and approaches in this important field It covers the history theory and methods of comparative and international education as well as the relationship with education and national development and outlines what we can learn from comparative studies Clear explanations are complemented with examples of real research in the field including work on policy borrowing learner centred pedagogy and university internationalization

Theatre for Development C. P. Epskamp, 2006-10 The Theatre for Development TFD is a learning strategy in which theatre is used to encourage communities to express their own concerns and think about the causes of their problems and possible solutions This overview contributes to both the theory and practice of Theatre for Development The author contextualises it historically within the evolving range of development theories strategies and practices notably including the now widely accepted notion of participatory approaches to achieving social change **Global Development of**

Globalization and Low Income Economies Reforming Education The Crisis of Vision is a thought provoking book which critically examines bureaucracy politics and international aid in the Low Income Economies with a view to using formal education as a tool of empowerment The author with his long experience of serving as an academic a researcher university teacher development worker and International Development Advisor to governments and development agencies in Asia illustrates the failure of the General Education and the School Model to empower the poor in the Low Income Economies In his analysis the author points out how Globalization could also fail to empower the poor in the LIEs because the bureaucrats and the politicians in the LIEs and the assisting International Development Agencies have failed to perceive the Human Resource Development perspective of the new economic order Globalization has been perceived only from a commodity perspective *Local Solutions to Global Challenges*, 2003 New Acquisitions Unesco Institute for Education.
