Education And Politics:

An Education in Politics Jesse Rhodes, 2012-04-13 Since the early 1990s the federal role in education exemplified by the controversial No Child Left Behind Act NCLB has expanded dramatically Yet states and localities have retained a central role in education policy leading to a growing struggle for control over the direction of the nation s schools In *An Education in Politics* Jesse H Rhodes explains the uneven development of federal involvement in education While supporters of expanded federal involvement enjoyed some success in bringing new ideas to the federal policy agenda Rhodes argues they also encountered stiff resistance from proponents of local control Built atop existing decentralized policies new federal reforms raised difficult questions about which level of government bore ultimate responsibility for improving schools Rhodes s argument focuses on the role played by civil rights activists business leaders and education experts in promoting the reforms that would be enacted with federal policies such as NCLB It also underscores the constraints on federal involvement imposed by existing education policies hostile interest groups and above all the nation s federal system Indeed the federal system which left specific policy formation and implementation to the states and localities repeatedly frustrated efforts to effect changes national reforms lost their force as policies passed through iterations at the state county and municipal levels Ironically state and local resistance only encouraged civil rights activists business leaders and their political allies to advocate even more stringent reforms that imposed heavier burdens on state and local governments Through it all the nation s education system made only incremental steps toward the goal of providing a quality education for every child

Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael Timpane, Roger W. Benjamin, 2000 Why do America s public schools seem unable to meet today s social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public

education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens Meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America s future

Improving Education in a World of Politics M. Scott Norton,2018-10-05 This book centers on the fact that public education is involved in the politics of the world just as other systems and organizations are involved in competing for the values and resources of the many communities Keeping education out of politics or politics out of

education is fallacious As long as public education is financed by taxes local state or national it must compete with other agencies and programs for the available tax dollars These realities make it necessary for school leaders to be knowledgeable of how the values and resources of the school community are distributed This need calls for an understanding of how important decisions are made or not made that affect the outcomes of public education If public schools are to remain relevant and in the main stream of public issues and related decisional outcomes they must become more knowledgeable of the political world of education and how important decisions are determined regarding educational support

Besieged William G. Howell, 2005-04-01 School boards are fighting for their survival Almost everything that they do is subject to regulations handed down from city councils state boards of education legislatures and courts As recent mayoral and state takeovers in such cities as Baltimore Chicago and New York make abundantly clear school boards that do not fulfill the expectations of other political players may be stripped of what few independent powers they still retain Teachers unions exert growing influence over board decision making processes And with the passage of the No Child Left Behind Act the federal government has aggressively inserted itself into matters of local education governance

Besieged is the first full length volume in many years to systematically examine the politics that surround school boards A group of highly renowned scholars relying on both careful case studies and quantitative analyses examine how school boards fare when they interact with their political superiors teachers unions and the public For the most part the picture that emerges is sobering while school boards perform certain administrative functions quite well the political pressures they face undermine their capacity to institute the wide ranging school reforms that many voters and local leaders are currently demanding

No Adult Left Behind Vladimir Kogan, 2025-08-31 For decades Americans have debated why our students consistently score lower than their peers in other developed countries While most debates have focused on school spending curriculum teacher quality and teachers unions **No Adult Left Behind** argues that local democratic control is the root of the problem Elected school boards govern local school districts but only adults vote in local elections most of whom don't have children or care about academics This leads to educational debates that are centered around issues that adults care most about such as partisanship identity politics property values and employment concerns while the needs of students get left behind In identifying the misalignment between the interests of school children and the political and policy agendas of the adults who control education **No Adult Left Behind** stands to become a landmark study on modern education politics

Owen, 2006 Today administrators must assume a different mindset if public schools are to remain viable and functional Changing populations resulting in heterogeneous communities diversity of community values and finite resources meeting the infinite desires of a demanding constituency have created the necessity for political acumen on the part of local educational leaders The primary reason for the upheaval occurring in schools today is not that the instructional element is being neglected but that the building level administrators have a woeful lack of

winning historian's pathbreaking book uses federal education policy from the Great Society to Reagan's New Morning to demonstrate how innovative policies become entrenched irrespective of who occupies the White House
