Human Resources in Japanese Industrial Development Hisashi Kawada, Solomon B. Levine, 2014-07-14 By focusing on the educational and skill training institutions Japan has developed to generate human resources for modern industry this book represents a new contribution to the historical analysis of Japan's modern economic growth The authors concentrate on those large scale industries that seem to pose the greatest challenges for an agrarian society such as Japan was in the 1870s in order to show how an economically less developed country becomes an advanced industrialized nation Originally published in 1980 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Area Bibliography of Japan Ria Koopmans-de Bruijn, 1998 Provides a general overview of literature relating to Japan and covers a broad range of subject matter from art feminism and linguistics to corporate culture history and medicine Includes books published since 1980 that are related to the geographical area of Japan and to Japanese culture within that area

Vocational Education in Japan and Texas Policy Research Project on Fighting Crime and Improving Education in Japan and Texas, 1992 *Routledge Revivals: Vocational Education and Training in the Developed World* (1979) Leonard Cantor, 2017-11-22 First published in 1989 this book primarily sets out to provide detailed accounts of the policy towards and the provision of vocational education and training in five countries of the developed world Japan Australia the United States the Federal Republic of Germany and the United Kingdom Professor Cantor concentrates on the training of skilled personnel at operative craft and technician levels and describes provision both within public and private institutions such as further education colleges and in industry and business Comparisons are drawn between each country for example between the British traditions of vocational education and training in Australia and the United Kingdom and the more entrepreneurial approach of Japan and the United States

Computerized Manufacturing Automation, 1984 **Canada-Japan** Institute for Research on Public Policy, Sōgō Kenkyū Kaihatsu Kikō (Japan), 1990 The papers presented in this publication cover the following topics lessons from the past

concerning national sovereignty and firms Canadian responses to globalization problems of foreign workers immigration the Canadian labour force and structural change present conditions of globalized private enterprise in Canada globalization of Japanese enterprise economic issues shared by Japan and Canada and economic structural adjustment and international economic integration and national policy diversity *Education, Training and the Future of Work II* Mike Flude, Sandy Sieminski, 2013-10-18 This volume focuses on the recent changes in education and training policy mainly in the UK The considerable developments of past years and the ways in which they have affected both education and training are examined The contributors analyse the methods by which we educate our workforce and look closely at the kind of training now offered to those in work The chapters in this reader cover the role of the state how economic factors influence education national education and training policy the political factor Other countries including Germany are looked at and there is reflection on the ways in which the new industry led qualifications such as NVQs have fared There is careful analysis as to how much the political climate of the time influenced developments There is thorough research to back up claims made throughout the book and many practical examples are referred to What emerges is an incisive examination of current trends in education and the workplace *Industrial Training and Technological Innovation* Howard Gospel, 2010-11 Taking an international and comparative perspective this book focuses on the relationship between industrial training and technological change in three major global economies the UK USA and Japan The contributors an international group of leading researchers look at the origins and development of training in these countries and analyse the benefits resulting from the interaction of a skilled workforce and technological change This analysis of training in major industrial nations reveals the full complexity of the relationship between labour and technological change It shows the value of an approach which is both historical and comparative and highlights the importance of education and training as a necessary basis for successful innovation *The International Handbook of Educational Research in the Asia-Pacific Region* J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the

theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

Engineers in Japan and Britain Kevin McCormick,2013-02-01 Engineers are a key occupational group in the transformation of the modern world Contrasts between Japans economic miracle and Britains relative economic decline have often been linked to differences in education training and employment of engineers Yet such views have often rested on little more than colourful anecdotes and selective statistics Using careful and systematic comparisons Kevin McCormick locates the differences between rhetoric and reality to dismiss both the inflated claims of the 1980s and the excessive detracting of the 1990s with Japans prolonged recession
