European Dimensions and the Secondary School Curriculum Ivor Goodson, Veronica McGivney, 2018-10-03 Originally published in 1985 Europe and the EEC seemed to be virtually synonymous for the majority of our population and the ambivalent feelings many people have about the Community together with the consistently bad press it received in the UK seemed to engender a hostility in educational circles towards teaching about Europe as a whole However if one of the aims of education is to increase children's awareness tolerance and understanding of the world about them to widen their experience and horizons then teaching about the wider world must have a place in the curriculum This book argues for education about Europe not necessarily in favour of Europe breaking down the national insularity of the UK curriculum and using Europe as one convenient window on the wider world

Multiculturalism Still Matters in Education and Society Festus E. Obiakor, 2021-06-01 Today we live in changing times and how we respond to these changes creates some uneasiness in our daily lives Some of these changes reflect demographic shifts in power and paradigm in the United States while others reflect the reckless assumption that our problems are insurmountable Multiculturalism Still Matters in Education and Society Responding to Changing Times urges us to collaborate consult and cooperate for our common good It rightly emphasizes that multiculturalism will always matter in whatever we do in our complex world In addition it challenges us to continue to see differences as strengths that must be valued in dealing with our students educational professionals leaders and communities Finally this book inspires us to expand our discourses create avenues for hearty conversations look for ways to make invisible voices visible and help culturally and linguistically diverse CLD and vulnerable populations to maximize their fullest potential

The State and Higher Education Dr Brian Salter, Brian Salter, Ted Tapper, 2013-11-26 Much has been written about higher education but very little about the organisations of the state which increasingly determine its destiny Employing the theory of educational change developed in the authors previous work this book analyses the contribution each part of the state structure has made

to the present condition of higher education Beginning with the political parties and parliamentary committees it shows how there has been a steady decline in support for the traditional values of autonomous university education and a growing belief in the accountability of higher education to the needs of the economy It then proceeds to show how this ideological change was fostered by the DES and used to justify the development of bureaucratic mechanisms of management and control
