Educational Dilemmas Vol 1 Debate And Diversity Teachers Teacher Education And Training:

EBOOK: Education Studies: Issues & Critical Perspectives Derek Kassem, Emmanuel Mufti, John Robinson, 2006-08-16

This major text for Education Studies students provides a critical account of key issues in education today. The text features a critical analysis of key issues in Education Studies to encourage students thinking about education in the broadest terms. Themed sections with introductions to link the issues discussed in each chapter. Use of specific examples of educational diversity to illustrate how concerns such as ethnicity, gender and class operate in educational institutions. An examination of educational issues as they relate to other phases of educational provision such as home schooling and universities. *Education Studies: Issues and Critical Perspectives* is an essential text for Education Studies students. It is also of value to students on QTS courses and students and professionals in areas such as sociology, childhood studies, community studies and education policy.

Silent Moments in Education Colette A. Granger, 2011-01-01. *Silent Moments in Education* combines autoethnography with psychoanalytic theory and critical discourse analysis in a unique consideration of the relations teachers and learners forge with knowledge with ideas and with one another.

Contesting Neoliberal Education Dave Hill, 2011-02-09. Neoliberal education policies have privatised, marketised, decentralized, controlled and surveilled, managed according to the business and control principles of new public managerialism, attacked the rights and conditions of education workers and resulted in a loss of democracy, critique and equality of access and outcome. This book, written by an impressive international array of scholars and activists, explores the mechanisms and ideologies behind neoliberal education while evaluating and promoting resistance on a local, national and global level. Chapters examine the activities and impacts of the arguably socialist revolution in Venezuela, the Porto Alegre democratic community experimental model in Brazil, the activities of the Rouge Forum of democratic socialist teachers and educators in the USA, Public Service International resistance movements against the GATS General Agreement on Trade in Services and trade union and social movement and community parental opposition to neoliberal education policies in Britain and in Latin America.

Student-Teacher Research Jyoti Raina, Gunjan Sharma, 2025-08-29. This book focuses on the conceptualisation and practice of student teacher research (STR). Despite existing practices and global discourse on the importance of STR in foregrounding teaching as a research-based profession, STR remains underexplored, particularly in the Indian context. This volume engages in a reflective, analytic, empirical exploration of STR, its contexts, concepts, nature, practices, experiences, challenges and status in initial teacher education (ITE) in India. An important contribution, the book will be indispensable to scholars and researchers of education in India. The book will be essential in various teacher education programmes across the country.

Promoting Equality in Secondary Schools David Hill, Mike Cole, 1999-01-12. This text looks at each national curriculum subject and analyzes it in terms of culture and ideology represented. It proceeds to give detailed advice and suggestions on how to promote equality and equal opportunities within each subject. Each chapter is wide ranging and includes both theoretical and practical issues.

The book also provides detailed lists of relevant curricular resources and their suppliers **Shaping the Future**

,2007-01-01 World wide the production of teachers has become a sharp political issue during the early years of the twenty first century Current systems for ensuring a supply of capable and knowledgeable teachers have come sustained under attack from politicians economists parents organisations and social critics alike There is less agreement now about teacher education than in any time over the pass fifty years Much of the debate in the public and political arenas has been driven by narrow and expedient consideration and too much of it demonstrates a poor grasp of the deep and complex issues which teacher education in a democracy must confront At the same time there has been a serious educational debate which has focused on what a well trained teacher ought to be able to do and what methods of training and education can produce competent teachers The chapters of this book address these issues in a critical way asking what should the objectives of teacher education be The authors demonstrate the international reach of the debate over teacher education and they ground their discussions within the national contexts of their own experience All the authors share the view that teacher education involves much more than acquiring a set of skills and techniques Important as these are the well trained teacher needs for example to have an understanding of the contexts of teaching of the reasons why we teach of the role of schools as institutions within political environments as well as a coherent perspective on curriculum and the relevant bodies of theory which give overall point to what is being done What teacher education entails will probably never be beyond contestation at least not so long as it takes place within capitalist democracies These democracies with their tensions running between liberal ideals and economic imperative push and pull teacher education in contradictory directions At present educational ideals seems too quickly and too dogmatically to be traded for immediate fiscal policy The authors of these chapters articulate the reasons why such short term thinking will be detrimental to any approach to teacher education which commits itself to producing well rounded and comprehensively professional teachers Schooling and Equality Dave Hill, Mike

Cole,2013-10-16 This text covers the range of equality issues in school level education from the perspective and needs of educators trainee teachers and students of education It uses a blend of issues concepts facts and research to open up key issues and consider policy developments in the field **A Knowledge Base for Teacher Education and Development**

Man Tak Chan, Yin Cheong Cheng, Kwok Tung Tsui, 2002 The Rich World and the Impoverishment of Education Dave Hill, 2010-07-15 This book advances a powerful critique of neoliberalised education privatization marketisation new public managerialism increasing control and surveillance of schools and colleges in eight of the rich countries of the world USA Canada England and Wales Finland Greece Taiwan Israel and Japan **Forthcoming Books** Rose Arny, 2002-04

International Handbook of Research and Development in Technology Education ,2009-01-01 This international handbook reflects on the development of the field of technology education From reviewing how the field has developed and its current strengths consideration is given to where the field might go and how it can be supported in this process This

handbook argues that technology is an essential part of education for all and it provides a unique coverage of the developing field of technology education. It is divided into eight sections from consideration of different approaches to education in different countries through thinking about the nature of technology, perceptions of technology, relationships between science, technology and society, learning and teaching, assessment, teacher education and professional development, and developed and developing research approaches. This book constitutes a significant collection of work from numerous countries and authors actively engaged in technology education research and development. It is intended for graduate students, academics, researchers, curriculum developers, professional development providers, policy makers and practitioners. The development of this handbook represents an important step in the maturity of the field of technology education. The field has matured as our technological society has matured to the point that research and practice can be documented as shared in this publication. Historians will look at this international handbook as a significant comprehensive step for a field of education that focuses on technology innovation, design and engineering for all students. Kendall Starkweather, Ph.D., DTE, CAE, ITEA Executive Director.

Promoting Equality in Primary Schools Mike Cole, Dave Hill, Sharan-Jeet Shan, 1997. This text sets out to provide a holistic approach to issues of equality in the primary curriculum. In particular, it looks at issues of social class, gender, disability, special needs and sexuality with a view to laying down guidelines for the promotion of social justice in the classroom.

Resources in Education, 2001 **Teacher Education in Transition** John Furlong, 2000. The 1990s were a period of quite dramatic change for initial teacher education in England and Wales with wave after wave of Government sponsored reforms. The changes introduced were highly controversial as those in higher education who were traditionally responsible for teacher education felt marginalized; many believed that what was at stake in these reforms was the nature of teacher professionalism itself. It was against this background of policy change and political ferment that the Economic and Social Research Council funded two successive research projects to evaluate the consequences of the reforms. The projects known as MOTE (Modes of Teacher Education) included two national surveys as well as more detailed case studies of particular courses. In this volume, the authors draw upon these two major studies as well as more recent policy analysis to give a fascinating overview of the impact of policy change throughout the 1990s. In doing so, they also consider whether a new form of professionalism was indeed created. BOOK JACKET Title Summary field provided by Blackwell North America Inc.
