Ross, 2021-06-22 This book presents a series of analyses of educational policies largely in the UK but some also in Europe researched by a team of social scientists who share a commitment to social justice and equity in education We explore what social justice means in educational policy and practice and how it impacts on our understanding of both educational science and the public good Using a social constructivist approach the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy and of the way this term turns educational policies towards treating learning as a competition in which many young people are constructed as losers We discuss how many terms in education are essentialised and have specific and different meanings for particular social groups and how this may create issues in both quantitative survey methods and in determining what is the public good We discuss social justice across a range of intersecting social characteristics including social class ethnicity and gender as they are applied across the educational policy spectrum from early years to postgraduate education We examine the ways that young people construct their identities and the implications of this for understanding the public good in educational practice We consider the responsibilities of educational researchers to acknowledge these issues and offer examples of researching with such a commitment We conclude by considering how educational policy might contribute to a socially just equitable and inclusive public good **Educational Research: Ethics, Social Justice, and Funding Dynamics** Paul Smeyers, Marc

Depaepe, 2018-03-22 This book examines the conduct and purposes of educational research It looks at values of researchers

at whose interests are served by the research and the inclusion or exclusion of practitioners and subjects of research It asks if educational research should be explicitly committed to promoting equality and inclusion and whether that requires research to be more aware of the cultural and global contexts of research questions It explores the ethical challenges encountered in the conduct of research and the potential ethical and social justice constraints imposed by comparative research rankings Next it discusses the research funding aspects of the above issues both philosophically and historically thus examining the changing sources patterns and effects of educational research funding over time Since the conduct of most educational research increasingly requires institutional and financial support the question is whether funding shapes the content of research and what counts as research The book discusses if funding is a factor in the shift of efforts of researchers from pure or basic research to more applied research and if it encourages the development of large research teams to the detriment of individual scholars It looks at the ownership of the content results and data of publicly funded research Finally it tries to establish whether scholars solicit funding to support research projects or generate research projects to attract funding This publication as well as the ones that are mentioned in the preliminary pages of this work were realized by the Research Community Philosophy and History of the Discipline of Education Purposes Projects and Practices of Educational Research

Special Educational Needs and Inclusive Education: Inclusive education David R. Mitchell,2004 Demonstrates how the fields of special education and inclusive education have evolved philosophically and technically over the past 30 years *Educational Leadership for Ethics and Social Justice* Anthony H. Normore,Jeffrey S. Brooks,2014-01-01 The purpose of this book is to examine and learn lessons from the way leadership for social justice is conceptualized in several disciplines and to consider how these lessons might improve the preparation and practice of school leaders In particular we examine philosophy anthropology sociology economics political science public policy and psychology Our contention is that the field of educational leadership might consider taking a step backward in order to take several forward That is educational leadership researchers might re examine social justice both in terms of social and individual dynamics and as disciplinary specific multidisciplinary and interdisciplinary phenomenon By adopting this approach we can connect and extend long established lines of conceptual and empirical inquiry and thereby gain insights that may otherwise be overlooked or assumed This holds great promise for generating refining and testing theories of social justice in educational leadership and will help

strengthen already vibrant lines of inquiry That is rather than citing a single or a few works out of their disciplinary context it might be more fruitful to situate educational leadership for social justice research in their respective traditions This could be carried out by extending extant lines of inquiry in educational leadership research and then incorporating lessons gleaned from this work into innovative practice For example why not more clearly establish lines of educational leadership and justice research into the Philosophy of Social Justice Economics of Social Justice Political Studies of Social Justice Sociology of Social Justice Anthropology of Social Justice and the Public Policy of Social Justice as focused and discrete areas of inquiry Once this new orientation toward the knowledge base of social justice and educational leadership is laid we might then seek to explore some of the natural connections between traditions before ultimately investigating justice in educational leadership through a free association of ideas as the worlds of practice and research co construct a new language they can use to discuss educational leadership Such an endeavor may demand reconceptualization of both the processes and products of collaborative research and the communication of findings but it will demand a breaking down of methodological and epistemological biases and a more meaningful level and type of engagement between primary and applied knowledge bases
