Educational Judgments:

Educational Judgments(*International Library of the Philosophy of Education Volume 9*) F. Doyle James,2010-02-25 The topics covered in this volume originally published in 1973 include the need for a more adequate concept or definition of education the issue of whether indoctrination is compatible with education particularly with moral education and the processes of judging the merits of different approaches to aesthetic education Two contributors present complementary analyses of the relations between freedom as a characteristic of institutions and the process of learning to be a free man There is discussion of the neglected subject of rights and duties in education with special emphasis on the question of a universal right to education The volume concludes with papers on the relevance of philosophy to the practical judgments of educators and to education as a field of study

Beautiful Risk of Education Gert J. J. Biesta, 2015-11-17 This is a book about what many teachers know but are increasingly being prevented from talking about that real education always involves a risk The risk is there because as W B Yeats has put it education is not about filling a bucket but about lighting a fire It is there because students are not to be seen as objects to be moulded and disciplined but as subjects of action and responsibility The Beautiful Risk of Education is organised around a critical discussion of seven key educational concepts creativity communication teaching learning emancipation democracy and virtuosity By opposing the risk aversion that characterises many contemporary educational policies and practices Gert J J Biesta makes a strong argument for giving risk a central place in our educational endeavours and brings risk taking to the forefront of a critical pedagogical practice

Kaplin and Barbara A Lee's clear cogent and contextualized legal guide proves more and more indispensable every year. Over 3 000 new cases related to higher education have been decided since the publication of the previous edition and scores of changes to higher education law are made each year. Every section of the fifth edition contains new material including those related to Hate speech and free speech rights of faculty in public universities. Sharing of research with international colleagues. Intellectual property and peer to peer file sharing. Student suicide. Campus safety. Police and administrators' right to search students' residence hall rooms. Governmental support for religious institutions and religious autonomy rights of individual public institutions. Collective bargaining and antidiscrimination laws. Nondiscrimination and affirmative action in employment admissions and financial aid. Family and Medical Leave Act and workers compensation. FERPA. Family Educational Rights and Privacy Act.

Problems in Primary Education (RLE Edu K) R Dearden, 2012-05-23 The first part of the book discusses aims who should determine them and how they might be determined. The second part discusses some more specific topics of learning and teaching such as learning how to learn, the integrated day and the use of competition. The author distinguishes three broad levels of thought in looking at schools: the details of choice and decision, the general principles which are or ought to be guiding that detailed practice, and the theoretical commentaries on the guiding principles available from the various disciplines which constitute the study of education.

Academic Freedom at American Universities Philip Lee, 2014-11-19 This book details the legal and historical development of institutional and professorial academic freedoms to better understand the relationship between these concepts. While some judges and scholars have focused on the divergence of these protections, this book articulates an aligned theory that brings both the professorial and institutional theories together. It argues that while constitutionally based academic freedom does its job in protecting both public and private universities from excessive state interference or at the very least it asks the right questions, it is inadequate because it fails to protect many individual professors in the same way. This solution entails using contract law to fill in the gaps that constitutional law leaves open in regard to protecting individual professors. Contract law is an effective alternative to constitutional law for three reasons. First, unlike constitutional law, it covers professors at both public and private universities. Second, it allows for the consideration of the custom and usage of the academic community as either express or implied contract terms in resolving disputes between universities and professors. Third, contract law enables courts to structure remedies that take into account the specific campus contexts that give rise to various disputes instead of crafting broad remedies that may ill fit certain campus environments. The proposed reconceptualization of academic freedom merges constitutional protection for institutions and contractual protection for individual professors. This combined approach would provide a more comprehensive framework than is currently available under the predominantly constitutional paradigm of academic freedom.

Philosophical Analysis and Education (International Library of the Philosophy of Education Volume 1) Reginald Archambault, 2010-02-25 When originally published in 1965, this book reflected some of the new thinking among

philosophers regarding the role of the discipline in its investigation of central issues in education. The essays are grouped into four major sections: The Nature and Function of Educational Theory, The Context of Educational Discussion, Conceptions of Teaching, and The Essence of Education. The concepts dealt with are of the first importance to any practical or theoretical discussion in education, and the editor provides a generous introduction to the essays to aid the reader in his analysis of the issues.

Art's Teachings, Teaching's Art Tyson Lewis, Megan Laverty, 2015-08-28 This volume examines the interface between the teachings of art and the art of teaching and asserts the centrality of aesthetics for rethinking education. Many of the essays in this collection claim a direct connection between critical thinking, democratic dissensus, and anti-racist pedagogy with aesthetic experiences. They argue that aesthetics should be reconceptualized less as mere art appreciation or the cultivation of aesthetic judgment of taste and more with the affective disruptions, phenomenological experiences, and the democratic politics of learning, thinking, and teaching. The first set of essays in the volume examines the unique pedagogies of the various arts including literature, poetry, film, and music. The second set addresses questions concerning the art of pedagogy and the relationship between aesthetic experience and teaching and learning. Demonstrating the flexibility and diversity of aesthetic expressions and experiences in education, the book deals with issues such as the connections between racism and affect, curatorship and teaching, aesthetic experience and the common, and studying and poetics. The book explores these topics through a variety of theoretical and philosophical lenses including contemporary post-structuralism, psychoanalysis, phenomenology, critical theory, and pragmatism.

The Handbook of Educational Theories Beverly Irby, Genevieve H. Brown, Rafael Lara-Alecio, Dr. Shirley A. Jackson, 2013-03-01 Although educational theories are presented in a variety of textbooks and in some discipline-specific handbooks and encyclopedias, no publication exists which serves as a comprehensive consolidated collection of the most influential and most frequently quoted and consulted theories. There is a need to put such theories into a single, easily accessible volume. A unique feature of the Handbook is the way in which it conveys the theories. The organization of the chapters within each section makes the volume an easy-to-use and understandable reference tool as researchers and practitioners seek theories to guide their research and practice and as they develop theoretical frameworks. In addition to the traditional theories presented, the Handbook includes emerging theories for the 21st Century as well as presenting practical examples of the use of these theories in research from dissertations and published articles. An appendix which indicates which theories have instruments associated with them and where those instruments can be found is also included. The Handbook consists of 12 sections. Section I provides the introduction with a focus on what constitutes good theory as well as how theory guides research and practice. The remaining sections address Philosophical, Educational Constructs, Learning Theory, Instructional Theory, Curriculum theory, Literacy and Language Acquisition Theory, Counseling Theory, Moral Development Theory, Classroom Management Theory, Assessment Theory, Organizational Theory, and Leadership Management Theory. Each section consists of an overview written by the

section editor of the general theoretical concepts to be addressed by the chapter authors Each chapter within the section will include a a description of the theory with goals assumptions and aspects particular to the theory b the original development of and interactions of the theory c validation of the theory d generalizability of the theory across cultures ethnicities and genders e the use and application of the theory f critiques of the theory g any instruments associated with the theory and h two to five particular studies exemplifying particular theories as individuals have used them in theoretical framework of dissertations or published articles and be written by the original theorist or prominent contributors to the theory The Handbook is intended for graduate students enrolled in research courses or completing theses and dissertations Additionally professors of all educational disciplines in the social sciences would be an interested audience There is also potential use of the text as administrators counselors and teachers in schools use theory to guide practice As more inquiry is being promoted among school leaders this book has more meaning for practitioners

education this updated student affairs edition provides a reference and guide for student affairs practitioners and graduate students in student affairs administration courses This volume combines sections that are pertinent to student affairs practitioners as well as the government regulatory and administrative issues found in the full Fourth Edition It is thus the most comprehensive and easy to use volume for student affairs officers and students

Education in a Post-Metaphysical World Christopher Martin, 2012-11-02 What does it mean to say that a person has been educated This question forms the basis of global education policy debates from the way governments establish funding for national school systems to the way children are treated in the classroom Should there be a common ethical core to such policies What kind of educational process should aboriginal groups in Labrador Canada have a moral right to and should this process be different from what children in New York's boroughs have claim to Should a school based curriculum such as the UK's National Curriculum make well being a central concern or are there other ethical dimensions to be addressed Christopher Martin explores these questions and argues that the best way to consider them is to view education as a matter of public moral understanding He brings together traditions of thought central to philosophy of education such as R S Peters and connects this tradition to the moral philosophy and critical theory of Jurgen Habermas whose theory of Discourse Morality has previously been given little attention in education circles
