Bruner,Delwyn G. Berrett,2023-06-06 This is the first field guide to the identification of the birds of the islands of the tropical Pacific including the Hawaiian Islands Fiji Samoa Tonga southeastern Polynesia and Micronesia It is intended both as a reference for the expert and as an introduction to birding in the region for the novice Small enough to be carried afield it contains much previously unpublished information about behavior vocalizations ecology and distribution The forty five color plates depict all plumages of all bird species that breed in the islands as well as of those that regularly visit them and the surrounding oceans and of most species believed to be extinct on the islands Black and white figures show many of the rarer visitors Introductory sections discuss the tropical Pacific as an environment for birds problems of birding on islands and bird conservation Appendixes include maps of the island groups and a thorough bibliography **The nature park guide for National Park of Niue (Niue)** ,2025-09-26

Olla,2013-11-11 Among birds shorebirds provide some of the more unique opportunities to examine basic problems in behavior ecology and evolution This is in large measure due to the diversity both behaviorally and ecologically of a group closely related taxonomically and distributed throughout the world The overall aim of these two volumes is to provide a representative selection of current research being conducted on shorebird behavior and ecology Traditionally marine birds have included those species that breed in large colonies on offshore islands along coasts see Volume 4 of this series Although shorebirds have generally not been considered within this group the fact that almost 40% of the species breed along coasts and more than 60% often or always spend the nonbreeding season in coastal habitats more than justifies their inclusion as marine birds at least those species that totally or partially depend upon the marine environment Their inclusion markedly increases species diversity in marine birds since shorebirds add about 217 species to the 280 that are traditionally thought of as marine *Waterbirds Around the World* G.
