Alien Reptiles and Amphibians Fred Kraus,2008-12-19 Transportation of species to areas outside their native ranges has been a feature of human culture for millennia During this time such activities have largely been viewed as beneficial or inconsequential However it has become increasingly clear that human caused introductions of alien biota are an ecological disruption whose consequences rival those of better known insults like chemical pollution habitat loss and climate change Indeed the irreversible nature of most alien species introductions makes them less prone to correction than many other ecological problems Current reshuffling of species ranges is so great that the present era has been referred to by some as the Homogocene in an effort to reflect the unique magnitude of the changes being made These alien interlopers often cause considerable ecological and economic damage where introduced Species extinctions food web disruptions community alterations ecosystem conversion changes in nutrient cycling fisheries collapse watershed degradation agricultural loss building damage and disease epidemics are among the destructive and frequently unpredictable ecological and economic effects that invasive alien species can inflict The magnitude of these damages continues to grow with virtually all environments heavily used by humans now dominated by alien species and many natural areas becoming increasingly prone to alien invasion as well

**Jungle of the Maya** Douglas Goodell,2010-07-05 The Selva Maya Jungle of the Maya is one of the world's most magical yet least appreciated places an enormous tropical forest that encompasses much of Belize Guatemala and Mexico's Yucatan Peninsula At 9 000 000 acres it is the largest contiguous tropical forest north of the Amazon in the Western Hemisphere Within its borders the Selva Maya provides habitat for an astonishing diversity of plants and animals more than 500 species of birds alone The forest also contains the fascinating ruins

of ancient Maya cities which attract visitors and researchers from all over the globe Jungle of the Maya presents a stunning photographic portrait of this irreplaceable natural treasure Nature photographers Douglas Goodell and Jerry Barrack capture the living wonders of the jungle jaguars and other cats spider and howler monkeys hummingbirds and butterflies and snakes amphibians and insects as well as the region's hallmark Maya sites including Tikal Chichen Itza Uxmal and Tulum Environmental writer Jim Wright invitingly describes the Selva Maya's natural and human history helping visitors and residents appreciate the riches to be found in the forest and the need to protect and preserve them for generations to come Because human activities are encroaching more and more on the Mayan forest Jungle of the Maya is a beautiful book with a timely message As renowned naturalist Archie Carr III sums it up in his foreword Today the Selva Maya is at risk again As modern beings can we manage the forest better than we believe the ancient Maya did We should We have the archaeological record to draw from We have modern science And we still have inspiration whispered to us by spirits in the great plazas of Tikal and beyond Turn the pages and witness

[The Eponym Dictionary of Amphibians](#) Bo Beolens, Michael Watkins, Michael Grayson, 2013-04-22 New species of animal and plant are being discovered all the time When this happens the new species has to be given a scientific Latin name in addition to any common vernacular name In either case the species may be named after a person often the discoverer but sometimes an individual they wished to honour or perhaps were staying with at the time the discovery was made Species names related to a person are eponyms Many scientific names are allusive esoteric and even humorous so an eponym dictionary is a valuable resource for anyone amateur or professional who wants to decipher the meaning and glimpse the history of a species name Sometimes a name refers not to a person but to a fictional character or mythological figure The Forest Stubfoot Toad *Atelopus farci* is named after the FARC a Colombian guerrilla army who found refuge in the toad's habitat and thereby it is claimed protected it Hoipollo's Bubble nest Frog *Pseudophilautus hoipolloi* was named after the Greek for the many but someone assumed the reference was to a Dr Hoipollo Meanwhile the man who has everything will never refuse an eponym Sting's Treefrog *Dendropsophus stingi* is named after the rock musician in honour of his commitment and efforts to save the rainforest Following the success of their Eponym Dictionary of Reptiles the authors have joined forces to give amphibians a similar treatment They have tracked down 1 609 honoured individuals and composed for each a brief pithy biography In some cases these are a reminder of the courage of scientists whose dedicated research in remote locations exposed them to disease and even violent death The eponym ensures that their memory will survive aided by reference works such as this highly readable dictionary Altogether 2 668 amphibians are listed
