Jawad, 2017-09-21 This book is devoted to the dangerous fishes found offshore the eastern and southern Arabian Peninsula It covers information about the main groups of dangerous fish species i.e. biting and predator fish group venomous stinging fish electric shock fish harmful stinging fish and poisonous fish In the latter group the book gives details about fishes that cause several types of toxicities to human The purpose of this book is to thoroughly introduce life nature and methods of dangerous fishes in order to form awareness about their danger and to take

the proper preventive steps It will appeal to researchers scholars divers the sea coast visitors and students of marine biology as it is highly informative and carefully presented This book is the first of its kind for the Arabian region in particular and the Middle East in general **Management Techniques for Elasmobranch Fisheries** Food and Agriculture Organization of the United Nations,2005-01-01 This publication describes the scientific principles and techniques used for resource management of elasmobranch fisheries with emphasis on the particular context of elasmobranchs The management characteristics of these fishes are described their common bycatch character and their biological constraints on productivity low growth rate late maturity and low fecundity Stock assessment of elasmobranchs is described in the context of management objectives in a wide management context Special attention is given to accurate species identification given the prevalent aggregating of landings data across species genera and often families in this group Techniques and experiences for tagging elasmobranchs for population estimation are described as well as methods of genetic techniques for stock identification

**Biology of Skates** David A. Ebert,James Sulikowski,2008-12-25 Skates have become a concern in recent years due to the preponderance of these elasmobranchs that are caught as bycatch or as a directed fishery This has raised concern because skates have life history characteristics that may make them vulnerable to over exploitation It was due to this concern that prompted Drs David Ebert and James Sulikowski to organize an international symposium on the Biology of Skates The aims and goals of the symposium were to bring together an international group of researchers to meet discuss perhaps develop collaborations and present their most recent findings The symposium was held over two days on 13 14 July 2006 in conjunction with the 22nd annual meeting of the American Elasmobranch Society in New Orleans LA A total of 31 authors from four countries contributed 16 papers that appear in this volume The papers are broadly arranged into four separate categories systematics and biogeography diet and feeding ecology reproductive biology and age and growth This is the first dedicated book on the biology of skates We hope that readers will find this volume of interest and that it helps encourage and stimulate future research into these fascinating fishes **Sharks and Their Relatives II** Jeffrey C.
