Guidelines For The Evaluation Of X500 Directory Products:

Guidelines for the Evaluation of X.500 Directory Products John Tebbutt, 1995 Provides readers with the means to evaluate X 500 products and make informed choices as to which available products best match the requirements of their organizations The X 500 Directory is a distributed database capable of storing information about people and objects in various nodes or servers distributed across a network These servers acting in concert provide the potentially global access to information made possible by X 500 technology Especially useful for procurement officials and systems administrators Bibliography Charts and tables *Journal of Research of the National Institute of Standards and Technology* ,1995 *Understanding and Deploying LDAP Directory Services* Tim Howes, Mark Smith, Gordon S. Good, 2003 Lightweight Directory Access Protocol LDAP is the standard for directory information access and is the underlying protocol for a variety of email systems Web systems and enterprise applications LDAP enables central management of users groups devices and other data thereby simplifying directory management and reducing the total cost of ownership *Understanding and Deploying LDAP Directory Services* written by the creators of the protocol is known as the LDAP bible and is the classic text for learning about LDAP and how to utilize it effectively The Second Edition builds on this success by acting as an exhaustive resource for designing deploying and maintaining LDAP directory services Topics such as implementation pitfalls establishing and maintaining user access to information troubleshooting and real world scenarios will be thoroughly explored *Publications of the National Institute of Standards and Technology ... Catalog* National Institute of Standards and Technology (U.S.), National Institute of Standards and Technology (U.S.). Information Resources and Services Division, 1994 **User Modeling Servers** Josef Fink, 2004 Software systems that adapt their services to characteristics of individual users have already proven to be more effective and or usable than non adaptive systems User adaptive systems rely on user modeling systems for exhibiting personalized behavior Quite a few user modeling systems have been developed during the past fifteen years The decisions as to what useful services functionalities of these systems are were mostly based on intuition and or experience gained from studying the literature of a few user adaptive applications Results from neighboring disciplines and commercial developments have been largely ignored Empirical evaluations of the practical applicability of user modeling systems were hardly ever carried out This book is different the author takes an interdisciplinary and application oriented approach defines meaningful requirements on user modeling servers gives an overview of existing systems pinpoints their deficiencies develops a very novel architecture for user modeling servers implements it and tests its utility both within an application project and in empirically founded performance experiments His excellent synthesis of scientific and industrial concerns which rests on research in data bases distributed systems human computer interaction user modeling statistics and e commerce and his very convincing solutions make this book a worthwhile reading both for researchers and for industrial practitioners *Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 1995*

United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies,1994 Planning for PKI Russ Housley,Tim Polk,2001-03-27 An in depth technical guide on the security technology driving Internet e commerce expansion Planning for PKI examines the number one Internet security technology that will be widely adopted in the next two years Written by two of the architects of the Internet PKI standards this book provides authoritative technical guidance for network engineers architects and managers who need to implement the right PKI architecture for their organization The authors discuss results and lessons learned from early PKI pilots helping readers evaluate PKI deployment impact on current network architecture while avoiding the pitfalls of early technical mistakes Four technical case studies detail the do s and don ts of PKI implementation illustrating both successes and failures of different deployments Readers will also learn how to leverage future PKI related technologies for additional benefits **Monthly Catalog of United States Government Publications** ,1996-07 Network World ,1990-11-05 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce Understanding Directory Services Beth Sheresh,Doug Sheresh,2002 Book Description Understanding Directory Servicesclarifies the complex topic of directory services starting with basic theory and archetypes and then working its way up to the current directory service implementations It describes the basic idea behind directory services explaining the underlying conceptual models design characteristics and methods of managing distributed information The book begins with an overview of directory services and their core characteristics highlighting critical aspects of directory information distribution and storage The evolving nature of the information the directory contains and the factors involved in organizing and managing it are discussed in detail and then methods of information distribution and storage are examined at length After exploring the basics of directory service the book progresses to in depth chapters on each of the critical technologies being used to implement directory services The X 500standards are explained to help you understand the foundations of directory services and provide a basis for comparison of the other directory technologies Lightweight Directory Access Protocol LDAP and its emerging role as a directory access standard is described in detail with thorough explanations of models naming and operations The Domain Name System DNS is examined from a directory service perspective noting parallels in structures and operations This knowledge of directory services is then used to describe the design of X 500 and LDAP based directory service products as well as NDS eDirectory and Active Directory highlighting the architectural and operational implications of vendor s design decisions This book Explores X 500 based directory products eTrust DirX Nexor and highlights implementation approaches and capabilities Describes the LDAP based directory products OpenLDAP SecureWay iPlanet identifying similarities and
