

INITIAL CONSIDERATIONS

Measure non-fasting full lipid profile (TC, HDL-C, non-HDL-C, triglycerides) and HbA_{1c} as part of an initial baseline assessment. Consider secondary causes of hyperlipidaemia and manage as needed. Ensure appropriate baseline and follow-up tests as detailed in the guideline. Measure BMI, identify and exclude people with contraindications/drug interactions. If non-fasting triglyceride above 4.5 mmol/l see the guideline text.

PRIMARY PREVENTION

Consider statin therapy for adults who do not have established CVD but fall into the categories below. Use QRISK (a) assessment tool where appropriate (see Primary prevention risk assessment in the guideline).

Consider additional risk factors, if present, together with QRISK score (raised for FH, severe mental illness, taking medicines that cause dyslipidaemia, systemic inflammatory disorder (e.g. SLE), impaired fasting glycaemia, recent change in risk factors).

PRIMARY PREVENTION

If lifestyle modification is ineffective or inappropriate after seven treatment, atorvastatin 80 mg OD

- Measure full lipid profile again after 3 months (non-fasting)
- High-intensity statin treatment should achieve reduction of non-HDL-C >40% from baseline. If not achieved after 3 months:
 - discuss treatment adherence, timing of dose, diet, and lifestyle
 - If at higher risk based on comorbidities, risk score or clinical judgement—see Additional risk factors consider increasing the dose every 2–3 months up to a maximum dose of atorvastatin 80 mg OD*
 - for how to increase in people with CKD, see the section Special patient populations

- If patients on a high-intensity statin have side effects, offer a lower dose or an alternative statin (see Statin intensity table)
- If maximum tolerated dose of statin does not achieve non-HDL-C reduction >40% of baseline value after 3 months, consider adding ezetimibe 10 mg OD
- If recommended statin treatment is contraindicated or not tolerated:
 - see AAC Statin Intolerance Algorithm^(A) for advice regarding adverse effects
 - ezetimibe 10-mg monotherapy may be considered. Assess response after 3 months
 - ezetimibe 10-mg/rosuvastatin acid 180-mg combination may be considered when ezetimibe alone does not control non-HDL-C/LDL-C well enough (NICE TA694)

If non-HDL-C reduction remains <40% of baseline despite maximal tolerated lipid-lowering therapy (including people with intolerance and contraindications) consider referral to specialist lipid management clinic according to local arrangements

SEVERE HYPERLIPIDAEMIA

FFTC ≥7.5 mmol/l and/or LDL-C ≥8.9 mmol/l and/or non-HDL-C ≥5.9 mmol/l, a personal or family history of (confirmed) CVD (≥40 years) and with no secondary causes, suspect FH (possible heterozygous FH). Do not use QRISK risk assessment tool.

DIAGNOSIS AND REFERRAL

Take fasting blood for repeat lipid profile to measure LDL-C. Use the Simon Broome or Dutch Lipid Clinic Network criteria to make a clinical diagnosis of FH. Refer to lipid clinic for further assessment if clinical diagnosis of FH or if TC ≥7.5 mmol/l and/or LDL-C ≥4.5 mmol/l and/or non-HDL-C ≥7.5 mmol/l or fasting triglycerides ≥10 mmol/l (regardless of family history).

TREATMENT TARGETS IN FH

If clinical diagnosis of FH and/or other risk factors present, follow the recommended treatment management pathway for primary or secondary prevention as for non-FH, BUT aim to achieve at least a 50% reduction of LDL-C (or non-fasting non-HDL-C) from baseline.

Consider specialist referral for further treatment and/or consideration of PCSK9 therapy (B):

- they are assessed to be at very high risk of a coronary event*
 - or therapy is not tolerated
 - or LDL-C remains >5 mmol/l (primary prevention)
 - or LDL-C remains >2.5 mmol/l (secondary prevention) despite maximal tolerated statin and ezetimibe therapy.
- *defined as any of the following:
- established CVD
 - two or more other CVD risk factors

SECONDARY PREVENTION

Offer statin therapy to adults with CVD, not including angina, previous MI, revascularisation, stroke, or TIA, or angina/previous transient ischaemic attack. Do not delay statin treatment if a person has acute coronary syndrome. Take a lipid profile on admission (within 24 hours).

Identify and address all modifiable risk factors—smoking, diet, obesity, alcohol intake, physical activity, blood pressure, and HbA_{1c}.

SECONDARY PREVENTION

Do not delay statin treatment in secondary prevention while managing modifiable risk factors. Prescribe a high-intensity statin: atorvastatin 80 mg OD. Use a lower dose of atorvastatin if there is a potential drug interaction, high risk of an exacerbating adverse effect, or patient preference. (see atorvastatin 20 mg/40 mg people with CVD and non-HDL-C >4.5)

- Measure full lipid profile again after 3 months (non-fasting)
 - High-intensity statin treatment should achieve reduction of non-HDL-C >40% from baseline. If not achieved after 3 months:
 - discuss treatment adherence, timing of dose, diet, and lifestyle measures
 - If started on less than atorvastatin 80 mg and the person is judged to be at higher risk (based on comorbidities, risk score or clinical judgement—see Additional risk factors), consider increasing to 80 mg atorvastatin. For how to increase in people with CKD see Special patient populations
 - If non-HDL-C baseline value is not available*, consider target non-HDL-C <2.5 mmol/l (approximately equivalent to LDL-C <1.8 mmol/l) as recommended by Joint British Societies
 - If patients on a high-intensity statin have side effects, offer a lower dose or an alternative statin (see Extent of lipid lowering with available therapies)
- *this scenario is not covered by NICE Q130†

If maximum tolerated dose of statin does not control non-HDL-C/LDL-C well enough after 3 months, confirm statin adherence then consider the following options based on shared decision making* with the patient.

*See the full guideline for information to support shared decision making

If recommended statin treatment is contraindicated or not tolerated, follow the AAC Statin Intolerance Algorithm^(A) for advice regarding adverse effects

If statin intolerance is confirmed, consider:

- ezetimibe 10 mg monotherapy. Assess response after 3 months (TA695)
- ezetimibe 10 mg/rosuvastatin acid 180 mg combination when ezetimibe alone does not control non-HDL-C sufficiently (NICE TA694)

Ezetimibe 10-mg daily (NICE TA695) reassess after 3 months. If non-HDL-C remains >2.5 mmol/l, consider injectable therapies, arrange a fasting blood test, and assess eligibility (TA718)

If non-HDL-C remains >2.5 mmol/l despite other lipid lowering therapies, consider injectable therapies—arrange a fasting blood test and assess eligibility criteria (TA694–694, TA718)

Injectable therapies^(B) If non-HDL-C >2.5 mmol/l, arrange fasting blood test to measure LDL-C to assess eligibility

- inclisiran—if fasting LDL-C <2.6 mmol/l, despite maximum tolerated lipid lowering therapy (TA718)
- or PCSK9—intravenous (if not eligible for oral therapy) or subcutaneous (if eligible for oral therapy) (TA718)

If eligibility criteria are not met, consider ezetimibe 10 mg daily (if not previously considered). Inclisiran and PCSK9 should not be prescribed concurrently.

(A) England: the statin intolerance decision-making pathway

BM=body mass index; CVD=cardiovascular disease; CKD=chronic kidney disease; CVD=cardiovascular disease; eGFR=estimated glomerular filtration rate; FH=familial hypercholesterolaemia; HbA_{1c}=haemoglobin A_{1c}; HDL-C=high-density lipoprotein cholesterol; LDL-C=low-density lipoprotein cholesterol; MI=acute myocardial infarction; OD=once daily; PCSK9=proprotein convertase subtilisin/kexin 9 inhibitor; SLE=systemic lupus erythematosus; TC=total cholesterol; TIA=transient ischaemic attack.

Guidelines For The Management Of Hyperlipidaemia In Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to

historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Guidelines For The Management Of Hyperlipidaemia In free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Guidelines For The Management Of Hyperlipidaemia In free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Guidelines For The Management Of Hyperlipidaemia In free PDF files is convenient, it's important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but it's essential to be cautious and verify the authenticity of the source before downloading Guidelines For The Management Of Hyperlipidaemia In. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether it's classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Guidelines For The Management Of Hyperlipidaemia In any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About Guidelines For The Management Of Hyperlipidaemia In Books

What is a Guidelines For The Management Of Hyperlipidaemia In PDF? A PDF (Portable Document Format) is a file

format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Guidelines For The Management Of Hyperlipidaemia In PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Guidelines For The Management Of Hyperlipidaemia In PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Guidelines For The Management Of Hyperlipidaemia In PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Guidelines For The Management Of Hyperlipidaemia In PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
