Broadfoot,2017-09-29 Originally published in 1995 this volume brings together twenty classic contributions from the work of Desmond Nuttall as an educational researcher thinker and policy adviser A full commentary by two of his former colleagues who knew him well accompanies the text They have set out to explain and explore the essence of his contribution to others Much in the book is as relevant today as when the articles were written put together they form a formidable collection The book was published in the year after Desmond s death It is hoped it will remain a fitting tribute to him It will remind his friends of his classic ideas and brings together in one volume contributions that students of education may have missed

Catalog of Copyright Entries, Fourth Series Library of Congress. Copyright Office,1978-04 *Choose Wisely* Barry Schwartz,Richard Schuldenfrei,2025-09-23 A leading psychologist and philosopher challenge the shortcomings of rational choice theory and propose a new framework for understanding decision making For many decision scientists their starting point drawn from economics is a quantitative formula called rational choice theory allowing people to calculate and choose the best options The problem is that this framework assumes an overly simplistic picture of the world in which different types of values can be quantified and compared leading to the most rational choice Behavioral economics acknowledges that irrationality is common but still accepts the underlying belief from economics of what a rational decision should look like In this book Barry Schwartz and Richard Schuldenfrei offer a different way to think about the choices we make every day Drawing from economics psychology and philosophy and both inspired by and challenging Daniel Kahneman s *Thinking Fast and Slow* they show how the focus on rationality narrowly understood fails to fully describe how we think about our decisions much less help us make better ones Notably it overlooks the positive contribution that framing how we determine what aspects are most important to us contributes to good decisions Schwartz and Schuldenfrei argue that our choices should be informed by our individual constellation of virtues allowing for a far richer understanding of the decisions we make and helping us to live more integrated and purposeful lives Research Journal Texas Study of Secondary Education,1979

Higher Education: Handbook of Theory and Research John C. Smart,Michael B. Paulsen,2012-04-25 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world **Crafting a Class** Elizabeth A. Duffy,Idana Goldberg,2014-07-14 Admissions and financial aid policies at liberal arts colleges have changed dramatically since 1955 Through the 1950s most colleges in the United States enrolled fewer than 1000 students nearly all of whom were white Few colleges were truly selective in their admissions

they accepted most students who applied In the 1960s as the children of the baby boom reached college age and both federal and institutional financial aid programs expanded many more students began to apply to college For the first time liberal arts colleges were faced with an abundance of applicants which raised new questions What criteria would they use to select students How would they award financial aid The answers to these questions were shaped by financial and educational considerations as well as by the struggles for civil rights and gender equality that swept across the nation The colleges answers also proved crucial to their futures as the years since the mid 1970s have shown When the influx of baby boom students slowed colleges began to recruit aggressively in order to maintain their class sizes In the past decade financial aid has become another tool that colleges use to compete for the best students By tracing the development of competitive admission and financial aid policies at a selected group of liberal arts colleges *Crafting a Class* explores how institutional decisions reflect and respond to broad demographic economic political and social forces Elizabeth Duffy and Idana Goldberg closely studied sixteen liberal arts colleges in Massachusetts and Ohio At each college they not only collected empirical data on admissions enrollment and financial aid trends but they also examined archival materials and interviewed current and former administrators Duffy and Goldberg have produced an authoritative and highly readable account of some of the most important changes that have taken place in American higher education during the tumultuous decades since the mid 1950s *Crafting a Class* will interest all readers who are concerned with the past and future directions of higher education in the United States Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
