Guidelines For Marine Operations:

Guidelines for Marine Operations, 1997 **Offshore Marine Operations** Adam Hassan, 2022-04-08 This book is an adaptation of the Guidelines for Offshore Marine Operations which were published as Revision 0611 1401 on 06 November 2013. References to the Guidelines or Guidance is made to direct the reader to the appropriate section of the original publication. The objective of this publication therefore is to provide said guidance regarding the best practices which should be adopted to ensure the safety of personnel on board all vessels servicing and supporting offshore facilities and to reduce the risks associated with such operations. It particularly relates to the following activities: Operations of offshore facilities, Operations of vessels. Whilst the best practices summarised in this publication primarily reflect those adopted in the North West European Area, the editor recognises that the guidance may just as easily apply outside this region and that many if not all of the recommendations included do indeed have global relevance. Where it has been possible to make recommendations relating to operations outside its core area without diluting the original objectives, these have been included. It is recognised however that in certain circumstances local or company specific requirements may exist. In this event the guidance contained herein should be read in the context of such requirements and interpreted accordingly. To facilitate common practices on a global basis where necessary, the guidance together with included reporting forms should be used as the basis for preparing procedures for local practices.

Guidelines for Siting and Layout of Facilities CCPS (Center for Chemical Process Safety), 2018-04-24 This book has been written to address many of the developments since the 1st Edition which have improved how companies survey and select new sites, evaluate acquisitions or expand their existing facilities. This book updates the appendices containing both the recommended separation distances and the checklists to help the teams obtain the information they need when locating the facility within a community, when arranging the processes within the facility and when arranging the equipment within the process units.

Maritime Skills on Vessels & Shore - The STCW Convention's Relevance & Recommendations Dr.

(Capt.) Vivek Jain, 2023-07-11 This Book is of the seafarers by the seafarers for the seafarers. Seafarers are the core of all maritime trade and their expectations/perspectives alone should be at the centre of all solutions for maritime skills. Taking this standpoint, the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology. The issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in the ecosystem, status relationship with stakeholders, technology focus on renewable energy, anxiety levels and so forth. Furthermore, stakeholders can no longer ignore the fact that seafarers are leaving a seagoing career after working for

only a few years Therefore the editor has also explored the need to prepare seafarers for transition into maritime shore jobs to preserve their maritime skills within the maritime industry This exhaustive book can be used as a guide for further revisions or a revamp of the current STCW Convention The editor thereafter divided the researched critical gaps in maritime skills into four groups Jain s Model for Maritime Skills Panoptic Social Intelligence Upskilling Reskilling for onboard vessels skills and Portable Skills for future shore jobs Panoptic and Social Skills are core skills required for both on board vessels as well for maritime shore jobs Thereafter the editor embarked on a voyage to discover persuade collaborate with a number of exceptionally experienced subject matter experts over many months to collaboratively pursue many mini research projects across all selected maritime skills adopting specific methodology to plug these critical gaps These experts were drawn 1 from countries such as India the Philippines Romania South Korea Malaysia UAE the UK and Singapore 2 from both genders 3 from deck engine professionals settled ashore 4 with current experience in the industry and or at sea at a fundamental level and 5 from seafaring supplying nations recognising experiencing the relevant socio economic circumstances of seafarers From this book seafarers will not only find ideas on how to plug gaps in their maritime skills but also how they can transition with their existing skills to other maritime jobs such as marine superintendents marine managers designated persons ashore managers supervising new build second hand vessels IT managers in the maritime domain marine surveyors marine experts investigators marine pilots in ports maritime arbitrators managers in shipyards and so forth The solutions in this book will also resolve the issue of the shortage and retention of seafarers
