Matthews, 2014-09-19 Science Teaching explains how history and philosophy of science contributes to the resolution of persistent theoretical curricular and pedagogical issues in science education It shows why it is essential for science teachers to know and appreciate the history and philosophy of the subject they teach and how this knowledge can enrich science instruction and enthuse students in the subject Through its historical perspective the book reveals to students teachers and researchers the foundations of scientific knowledge and its connection to philosophy metaphysics mathematics and broader social influences including the European Enlightenment and develops detailed arguments about constructivism worldviews and science multicultural science education inquiry teaching values and teacher education Fully updated and expanded the 20th Anniversary Edition of this classic text featuring four new chapters The Enlightenment Tradition Joseph Priestley and Photosynthesis Science Worldviews and Education and Nature of Science Research and 1 300 references provides a solid foundation for teaching and learning in the field Grasping Truth and Reality Donald Le Roy Stults, 2008-08-01 When Lesslie Newbigin returned to Britain in 1974 after years of missionary service he observed that his homeland was as much a mission field as India where he had spent the majority of his missionary career He concluded that the Western world needed a missionary confrontation Instead of the traditional approach to missions however Newbigin realized that the Western world needed to be confronted theologically From his earliest days at Cambridge University Newbigin developed certain theological convictions that shaped his understanding of the Christian faith Newbigin utilizes these theological convictions as criteria for evaluating the belief system of Western culture and for providing an answer to Western culture s dilemma It is Newbigin s contention that the West is suffering from a loss of purpose because at the time of the Enlightenment it rejected a belief system that gave it purpose This was also a belief system that made it uniquely different from the rest of the world particularly Asia The Enlightenment reintroduced humanism and dualism into Western culture which resulted in the loss of purpose and the rise of skepticism Modern science and the scientific method in the form of scientism added to the problem making human reason the measure of truth and limiting facts to only that which could be verified through controlled experiment Newbigin s solution is to reintroduce the Christian belief system into Western culture in order to restore purpose and truth to Westerners and to put them into contact with true reality through Jesus Christ He desires to do this in the context of both modernism and post modernism This book will discuss Newbigin s theological convictions and how they factored into both his critique of and his solution for Western culture s spiritual and worldview problems *Britain's Cold War* Nicholas Barnett, 2018-07-30 The cultural history of the Cold War has been characterized as an explosion of fear and paranoia based on very little actual intelligence Both the US and Soviet administrations have since remarked how far off the mark their predictions of the other s strengths and aims were Yet

so much of the cultural output of the period in television film and literature was concerned with the end of the world Here Nicholas Barnett looks at art and design opinion polls the Mass Observation movement popular fiction and newspapers to show how exactly British people felt about the Soviet Union and the Cold War In uncovering new primary source material Barnett shows exactly how this seeped in to the art literature music and design of the period
