Gunpowder Government And War In The Mid Eighteenth Century:

Gunpowder, Government, and War in the Mid-eighteenth Century Jenny West, 1991 The Seven Year War dominated the mid 18th century In the course of Britain's struggle for supremacy over France particularly in Europe and North America the army and navy required an unprecedented quantity of gunpowder This book supplies the first detailed study of the gunpowder trade which was of crucial importance to the conduct of the war It describes how gunpowder was supplied by watermills in south east England and the hazardous procedure by which it was shipped to the main magazine at Greenwich mills suffered explosions were exposed to severe trade fluctuations and had difficulty meeting the high standard required The government needing more gunpowder than ever before actually had dangerously low stocks in its magazines due mainly to the competing needs of the African slave trade and the North American fur trade in addition to demand from mines and quarries

The Fiscal-Military State in Eighteenth-Century Europe Christopher Storrs, 2016-03-03 In recent decades historians of early modern Europe and above all those who study the eighteenth century have elaborated the concept of what has been called the fiscal military state This is a state whose international effectiveness was founded upon the development of large armed forces whose performance and supply necessitated both further administrative development and the provision of large sums the raising of which involved unprecedented levels of taxation and borrowing by governments The present collection of essays by leading authorities in their individual fields all of whom have published widely on their chosen topic explores the subject of the fiscal military state by focusing on its leading exemplars in eighteenth century Europe Austria Britain France Prussia and Russia It also includes a chapter on the Savoyard state the kingdom of Sardinia a lesser power whose career illuminates by comparison developments elsewhere In addition and rather unusually a further chapter considers the fiscal military state in a broader comparative international context in the arena of international relations Each chapter provides a summary of the state of knowledge regarding the fiscal military state debate insofar as it relates to the state under consideration As well as contributing to that debate they take matters further by systematically analysing the sources of wealth and income and the way these were tapped and the broader impact that this attempt to extract resources had on society and the state both in the short and longer term The differing patterns and the variety of models of fiscal military state makes for ease of comparison across Europe making the volume an invaluable resource to both students and researchers alike

Fighting at Sea in the Eighteenth Century Sam Willis, 2008 Our understanding of warfare at sea in the eighteenth century has always been divorced from the practical realities of fighting at sea under sail our knowledge of tactics is largely based upon the ideas of contemporary theorists rather than practitioners who knew little of the realities of sailing warfare and our knowledge of command is similarly flawed In this book the author presents new evidence from contemporary sources that overturns many old assumptions and introduces a host of new ideas In a series of thematic chapters following the rough chronology of a sea fight from initial contact to damage repair the author offers a dramatic interpretation of

fighting at sea in the eighteenth century and explains in greater depth than ever before how and why sea battles including Trafalgar were won and lost in the great Age of Sail He explains in detail how two ships or fleets identified each other to be enemies how and why they manoeuvred for battle how a commander communicated his ideas and how and why his subordinates acted in the way that they did SAM WILLIS has lectured at Bristol University and at the National Maritime Museum in Greenwich He is also the author of *Fighting Ships 1750-1850* Quercus

Corruption, Party, and Government in Britain, 1702-1713 Aaron Graham, 2015-05-28 *Corruption Party and Government in Britain 1702-1713* offers an innovative and original reinterpretation of state formation in eighteenth century Britain reconceptualising it as a political and fundamentally partisan process Focussing on the supply of funds to the army during the War of the Spanish Succession 1702-13 it demonstrates that public officials faced multiple incompatible demands but that political partisanship helped to prioritise them and to hammer out settlements that embodied a version of the national interest These decisions were then transmitted to agents in overseas through a mixture of personal incentives and partisan loyalties which built trust and turned these informal networks into instruments of public policy However the process of building trust and supplying funds laid officials and agents open to accusations of embezzlement fraud and financial misappropriation In particular although successive financial officials ran entrepreneurial private financial ventures that enabled the army overseas to avoid dangerous financial shortfalls they found it necessary to cover the costs and risks by receiving illegal gratifications from the regiments Reconstructing these transactions in detail this book demonstrates that these corrupt payments advanced the public service and thus that corruption was as much a dispute over ends as means Ultimately this volume demonstrates that state formation in eighteenth century Britain was a contested process of interest aggregation in which common partisan aims helped to negotiate compromises between various irreconcilable public priorities and private interests within the frameworks provided by formal institutions and then collaboratively imposed through overlapping and intersecting networks of formal and informal agents

Bannerman, 2015-10-06 Investigates the contract sector of the British Army during the long eighteenth century This book argues that this group of financiers private merchants businessmen and farmers represented a vital interest group which was at the nexus of the fiscal military structure It draws on papers from the War Office the Treasury and the Audit Office

every other item needed It shows how these merchants could be large or small concerns and provides detailed case studies of different kinds of contractors including examples of contractors based both in Britain and in the navy's overseas bases The book demonstrates how overall the contracting system represented the mobilisation of a substantial part of the British economy for war how the performance of contracting was effective with little or no corruption and how the contractors took considerable financial risks and made only reasonable margins It assesses the performance of the Victualling Board arguing that this was good and that the problem in the major area of weakness accounting was quickly addressed following a major crisis in 1808-09 It concludes that this was an impressive performance by the state but that the overwhelming advantage was the resilience of the market and that it was upon the success of the contractors that the war at sea was won For most of his career ROGER KNIGHT was on the staff of the National Maritime Museum leaving as Deputy Director in 2000 Since then he has taught at the Greenwich Maritime Institute at the University of Greenwich where he is currently Visiting Professor of Naval History MARTIN WILCOX completed a doctorate in maritime history at the University of Hull and has been employed as postdoctoral research fellow at Greenwich Maritime Institute since 2006 *Science, Utility and British Naval Technology, 1793-1815* Roger Morriss, 2020-10-07 During the French Revolutionary and Napoleonic Wars the technology employed by the British navy changed not just the material resources of the British navy but the culture and performance of the royal dockyards This book examines the role of the Inspector General of Naval Works an Admiralty office occupied by Samuel Bentham between 1796 and 1807 which initiated a range of changes in dockyard technology by the construction of experimental vessels the introduction of non recoil armament the reconstruction of Portsmouth yard and the introduction of steam powered engines to pump water drive mass production machinery and reprocess copper sheathing While primarily about the technology this book also examines the complementary changes in the industrial culture of the dockyards For it was that change in culture which permitted the dockyards at the end of the Wars to maintain a fleet of unprecedented size and engage in warfare both with the United States of America and with Napoleonic Europe Frontline and Factory Roy MacLeod, Jeffrey A. Johnson, 2007-05-06 It has been said that history is a debate between the present and the past about the future Nowhere are these lines drawn more significantly than in the study of science and war And nowhere is the discourse more relevant than in the study of science and technology as foundations and multipliers of military power This book is concerned with one particularly seminal aspect of this development the history of chemical munitions during and immediately after the First World War The Great War as it came to be known was not the first industrial war but it was the first to involve all the major industrial nations of the world Within four years the world witnessed unprecedented feats of industrial development many of which drew upon and extended pre war reservoirs of scientific and technological knowledge The experience comes down to us as a conjuncture of scientific economic political and ultimately military departures which by their nature involved new ways of meeting crises and eventually new forms of critical thinking That these new forms

emerged only gradually and unexpectedly is not to underestimate their capacity to endure or to minimize their relevance From the Great War came patterns assumptions and practices which were to make an indelible mark on science and technology for the rest of the twentieth century and beyond

The British Fiscal-Military States, 1660-c.1783

Aaron Graham,Patrick Walsh,2016-05-26 The concept of the fiscal military state popularised by John Brewer in 1989 has become familiar even commonplace to many historians of eighteenth century England Yet even at the time of its publication the book caused controversy and the essays in this volume demonstrate how recent work on fiscal structures military and naval contractors on parallel developments in Scotland and Ireland and on the wider political context has challenged the fundamentals of this model in increasingly sophisticated and nuanced ways Beginning with a historiographical introduction that places *The Sinews of Power* and subsequent work on the fiscal military state within its wider contexts and a commentary by John Brewer that responds to the questions raised by this work the chapters in this volume explore topics as varied as finance and revenue the interaction of the state with society the relations between the military and its contractors and even the utility of the concept of the fiscal military state It concludes with an afterword by Professor Stephen Conway situating the essays in comparative contexts and highlighting potential avenues for future research Taken as a whole this volume offers challenging and imaginative new perspectives on the fiscal military structures that underpinned the development of modern European states from the eighteenth century onwards

Britain's Colonial Wars, 1688-1783

Bruce Lenman,2014-07-30 From Europe to India and America Britain s Colonial Wars relates empire to the fortunes of war In less than a century between the Glorious Revolution of 1688 and the settlement following the War of the American Revolution the modern British state was born This penetrating new analysis questions the centrality of the colonial enterprise to Westminster policy makers obsessed with European issues and explains how the impact of their strategies necessarily shaped the destiny of a multi national and incoherent empire beyond the shores of Europe

Guns for the Sultan

Gábor Ágoston,2005-03-24 Gabor Agoston s book contributes to an emerging strand of military history that examines organised violence as a challenge to early modern states their societies and economies His is the first to examine the weapons technology and armaments industries of the Ottoman Empire the only Islamic empire that threatened Europe on its own territory in the age of the Gunpowder Revolution Based on extensive research in the Turkish archives the book affords much insight regarding the early success and subsequent failure of an Islamic empire against

European adversaries It demonstrates Ottoman flexibility and the existence of an early modern arms market and information exchange across the cultural divide as well as Ottoman self sufficiency in weapons and arms production well into the eighteenth century Challenging the sweeping statements of Eurocentric and Orientalist scholarship the book disputes the notion of Islamic conservatism the Ottomans supposed technological inferiority and the alleged insufficiencies in production capacity This is a provocative intelligent and penetrating analysis which successfully contends traditional perceptions of Ottoman and Islamic history History of Technology Volume 26 Ian Inkster, 2016-09-30 The technical problems confronting different societies and periods and the measures taken to solve them form the concern of this annual collection of essays It deals with the history of technical discovery and change and explores the relationship of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred
