Gunships No 3:

World War II US Gunships William Wolf, 2020-11-26 The XB 40 and XB 41 were secret little known experimental modifications of the B 17F and B 24D respectively into heavily armed bomber gunships sometimes referred to as bomber escorters They were developed during early World War II in response to the lack of a USAAF long range fighter aircraft able to escort and protect regular B 17 formations making the round trip from Britain deep into Germany Using many formerly classified documents from his large microfilm collection William Wolf presents their previously unpublished history It describes in depth for the first time the politics and development and associated problems of both escorter types Unfortunately these protecters were found wanting in several ways after the addition of guns and ammunition they became overweight and tail heavy causing center of gravity problems and each encountered numerous delays in the development and delivery of their various armament additions and improvements particularly the Bendix chin turret In the end the YB 40 participated in only 14 lackluster operational service test missions during mid 1943 before being withdrawn from service The XB 41 Liberator never saw operational testing before also being cancelled for its poor performance The failure of the gunship concept left a huge hole in the capabilities of the Eighth Air Force Their failure however spurred the adoption of the Merlin powered P 51 Mustang the outstanding escort fighter that was key to Allied victory in the air war over Europe **SHADOW AND STINGER: Developing the AC119G/K Gunships in the Vietnam War** William P. Head, 2007 Nicknamed the truck killer the AC 119K gunship and its counterpart the AC 119G were developed in the late 1960s in response to the needs of the US military in Vietnam This book examines the evolution of these aircraft and their role within Vietnam military policy and geopolitical realities **A Treatise on Naval Gunnery** Sir Howard Douglas, 1860 **Night Hunters** William P. Head, 2012 **Field Artillery**, 1997 Night Hunters William P. Head, 2014-03-18 In Night Hunters air power historian William P. Head provides the first detailed study of the development and deployment of the AC 130 gunship While other airframes and other types of close air support CAS and interdiction weapon systems preceded or flew with the AC 130s this four engine cargo airframe proved to be not only the longest serving fixed wing gunship but also the most effective by far During the Vietnam War the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features the difficult climate and the shifting diplomatic context One of the most important was the development of the AC 130 Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam era fixed wing gunship and the only one that continues to fly missions in the twenty first century In addition it employed many of the most advanced weapons sensors targeting devices and fire control systems of the 1970s or of any era By recounting both the technical development and the combat operations of the plane and by looking at the proposed alternatives for its use in the War on Terror Night Hunters offers a clear view of the role of gunships and of close air support in US wars In today s never ending brushfire wars the AC 130s continue to uphold their reputation for excellence

Vietnam Gun Trucks Gordon L. Rottman,2011-09-20

While Vietnam is usually perceived as an infantry war with US forces deploying by helicopter the long supply lines that led to their inland bases had to be traveled by ground vehicles The 8th and 48th Transportation Groups were responsible for hauling supplies through the long dangerous roads of Vietnam and they often found themselves the target of ambushes attacks and sniping In response to this vehicle crews began to arm trucks with machine guns and armour them with sandbags While these proved less than ideal the concept was considered valid and more and more gun trucks appeared sporting heavier weapons and armor Written by a Vietnam veteran this book traces the development of these gun trucks from the jury rigged originals to the powerful armoured vehicles that appeared later in the war
