**Günther Domenig - Recent Work** Günther Domenig, Matthias Boeckl, 2005-03-11 Günther Domenig zählt zu den bedeutendsten Architekten Europas. Die ungewöhnliche Vielfalt seiner Bauaufgaben reicht von Krankenhäusern über Hotels, Brückenbauten und Gewerbeobjekte bis hin zu Interventionen in alten Strukturen. Das Buch bietet mit Präsentationen des Dokumentationszentrums am Reichsparteitagsgelände in Nürnberg sowie von Domenigs privatem Idealprojekt Steinhaus am Königssee. Urs Bette, 2020-03-30 Architecture in Dialogue with an Activated Ground sets out to validate the role of the unreasonable in the design process. Using case study projects, architect Urs Bette gives an insight into the epistemological processes of his creative practice and unveils the strategies he deploys in order to facilitate the poetic aspects of architecture within a discourse whose evaluation parameters predominantly involve reason. Themes discussed include the emergence of space from the staged opposition between the architectural object and the site and the relationship between emotive cognition and analytic synthesis in the design act. In both cases there is a necessary engagement with forms of unreasonable thought, action or behaviours. By arguing for the usefulness and validity of the unreasonable in architecture and by investigating the performative relationship between object and ground, Bette contributes to the discourse on extensions, growth and urban densification that tap into local histories and voices, including those of the seemingly inanimate. The architecture itself and the ground it sits upon to inform the site-related production of architectural character and space. In doing so, he raises debates about the values pursued in design approval processes and the ways in which site-relatedness is both produced and judged. **From Life to Architecture, to Life** Tim Ireland, 2024-01-18 The book establishes a correlation between architectural theory and the biosemiotic project and suggests how this coupling establishes a framework leading to an architectural biosemiotic paradigm that puts biosemiotic theory at the heart of cognising the built environment and offers an approach to understanding and shaping the built environment that supports and benefits human and organismic spatial intelligence.
