many and varied ways in which countries have incorporated the subject into children's primary school experiences and issues that have arisen during its implementation. The authors all work in the field of primary technology education and have been actively involved in curriculum development and research in their own countries. The first part of the book is devoted to the introduction, the development and implementation of Technology education into the primary curricula of countries worldwide. Reasons for this movement, successes and barriers to development are discussed and speculation about the future of Technology education is reflected upon. The second part of the book relates to issues that have arisen as the subject has grown over the last twenty years and consideration needs to be given to these if future successes are to be achieved. Classroom practice including designing and ICT teacher education, enterprise sustainability and indigenous technology are all reflected upon and support the notion of technology as a valued and valuable part of the primary curriculum. **Museums and Education** Eileen Hooper-Greenhill, 2007-12-12 At the beginning of the 21st century museums are challenged on a number of fronts. The prioritisation of learning in museums in the context of demands for social justice and cultural democracy combined with cultural policy based on economic rationalism forces museums to review their educational purposes, redesign their pedagogies and account for their performance. The need to theorise learning and culture for a cultural theory of learning is very pressing. If culture acts as a process of signification, a means of producing meaning that shapes worldviews, learning in museums and other cultural organisations is potentially dynamic and profound, producing self-identities. How is this complexity to be measured? What can this measurement reveal about the character of museum-based learning? The calibration of culture is an international phenomenon and the measurement of the outcomes and impact of learning in museums in England has provided a detailed case study. Three national evaluation studies were carried out between 2003 and 2006 based on the conceptual framework of Generic Learning Outcomes. Using this revealing data, *Museums and Education* reveals the power of museum pedagogy and as it does, questions are raised about traditional museum culture and the potential and challenge for museum futures is suggested.

The authors also present a discussion of national strategies and The National Curriculum update for 2000, discussions of a world-wide curriculum and ICT and

citizenship viewed as tools for developing aspects of pedagogy
