Effective Teaching Strategies With The Behavioral Outcomes Approach:

Effective Teaching Strategies with the Behavioral Outcomes Approach Muriel Gerhard, 1971 Here are 15 strategies you can use in your classroom immediately to adapt conventional teaching methods in a new more practical more effective way than ever before These dynamic strategies are part of the new Behavioral Outcomes Approach BOA developed by Muriel Gerhard under a grant from The Fund For The Advancement of Education of The Ford Foundation Proven in actual classroom settings BOA is the most practical modern way to motivate pupil self direction develop thinking skills increase knowledge and improve learning at all levels of ability Here s how this practical easy to use guide will go to work in your classroom Self Directed Behavior BOA motivates pupils to learn and to continue to learn by themselves A learning climate called Responsive Environment motivates pupils to instruct themselves set their own goals and measure their own achievement with a minimum of teacher direction What this means is Increased class participation Improved self discipline More thorough learning in all subject areas Develops Thinking Skills You ll be particularly pleased with the BOA method that gives you a systematic way to develop thinking skills The method enables you to develop pupil s thinking skills while you teach subject matter quickly easily Your BOA thinking skills program comes with teaching aids that simplify the entire process Definitions and illustrations of the thinking processes A Teacher s Periodic Table of the Thinking Processes Sample questions and activities you can take right from the book Accelerates Learning Special BOA strategies enable you to easily determine realistic mastery levels for each student This prevents pupil frustration builds a positive attitude toward learning eliminates the need for remedial instruction accelerates the entire learning process Simplifies Planning BOA Learning Units replace the lesson plans used in traditional approaches These units enable you to teach tool skills thinking skills and content material at the same time They also simplify the planning process and increase teaching efficiency while they save you time and effort The program comes complete with step by step directions for planning your own learning units including a sample unit you can take right from the book Easy to use Behavioral Outcomes requires no special equipment plant facilities grouping or scheduling procedures You get complete details on how you can adapt conventional methods to the Behavioral Outcomes Approach without adding to your teaching duties or causing any frustration to your pupils If conventional methods have gone stale in your classroom you ll want to begin using Behavioral Outcomes at once The experienced teacher will admire its practicality The beginning teacher will find its concrete guidelines and practices are indispensable tools When you see the difference in your classroom you ll agree that Behavioral Outcomes is a whole new adventure in teaching

Resources in Education ,1999-10 Military Chaplains' Review ,1983 *Teach Them All to Think* Dr. Muriel Gerhard,2017-03-24 It just happened There they were Shouting Put it in a book The research is significant The magazine Grade Teacher devoted the whole issue to the research What is significant is that we can teach for thinking We can improve our pupil s cognitive skills be they decision making creativity analysis problem solving inductive and deductive reasoning as well as concept

development to mention just a few It all began when I had given a presentation at the ASCD convention addressing over 500 educators following a nine year study on inquiry and cognitive centered teaching funded by The Ford Foundation and now found myself mobbed by publishers to PUT IT IN A BOOK The book was written in ten weeks and it sold and sold and sold one hundred thousand copies and was translated into many foreign languages This resulted in teaching pupils at all grade levels to process information to develop conceptual frameworks and in depth understanding of the content in all disciplines be it mathematics the sciences the social science music and the arts Learners developed and grew concepts and conceptual frameworks and really understood the material as opposed to mouthing memorized sequences of words Let me show you what I am trying to convey I visited a first grade class and there they were singing praises to TWO chanting One and One is TWO Then it happened One little boy raised his hand and blurted out What s a two We live in a conceptual world Whether we are teaching kindergarten children their ABCs or graduate students advanced mathematics we must teach so that they truly understand what they are talking about so that they can develop concepts simple concepts first and then more intricate concepts That my friends is what learning is all about My career has spanned over sixty years spent examining researching developing writing and teaching various methods teachers can use to educate our children more effectively So here it is an updated version of the original book designed for the digital age and our digital destiny providing our new generation with the critical cognitive skills to deal with a very challenging future The processes and strategies are clearly delineated and applicable to every discipline at every level of instruction These have been researched and evaluated In sum the world has become far more complex than any of us as educators could have envisioned We are being deluged with the new the unknown We will need thinkers and problem solvers Teach them all to think Need I say more **Peers Helping Peers**

and Skills in Different Educational Stages Pedro Gil-Madrona, Linda Saraiva, Luisa Losada-Puente, 2025-03-19 The teaching practice becomes a reciprocal activity in the classroom when teachers apply their creativity and their knowledge resulting from research and scientific evidence in the didactic teaching process with the purpose of strengthening in the students the key competencies of their training turning students at the core of the didactic process Teaching strategies must

be articulated from previous research and planning and designed sequentially to promote real and interesting learning scenarios and thereby achieve significant learning From this perspective of teaching learning strategies the reciprocal interaction between the student and the teacher becomes the focus of attention with a playful motivating interesting and rewarding approach for the learner The role of the teacher is conceived as fundamental in the teaching process to achieve the link between teaching learning and evaluation strategies For this reason multidisciplinary studies are welcome from all stages of the educational system with quantitative qualitative and mixed approaches and reviews promoting good teaching practices of reflection and innovation from these studies The Publishers' Trade List Annual ,1979 **Behavioral**
