Effects Of Nuclear Earth Penetrator And Other Weapons:

Effects of Nuclear Earth-Penetrator and Other Weapons National Research Council, Division on Engineering and Physical Sciences, Committee on the Effects of Nuclear Earth-Penetrator and Other Weapons, 2005-10-06 Underground facilities are used extensively by many nations to conceal and protect strategic military functions and weapons stockpiles. Because of their depth and hardened status, however, many of these strategic hard and deeply buried targets could only be put at risk by conventional or nuclear earth penetrating weapons. EPW. Recently an engineering feasibility study, the robust nuclear earth penetrator program, was started by DOE and DOD to determine if a more effective EPW could be designed using major components of existing nuclear weapons. This activity has created some controversy about, among other things, the level of collateral damage that would ensue if such a weapon were used. To help clarify this issue, the Congress in P L 107 314 directed the Secretary of Defense to request from the NRC a study of the anticipated health and environmental effects of nuclear earth penetrators and other weapons and the effect of both conventional and nuclear weapons against the storage of biological and chemical weapons. This report provides the results of those analyses. Based on detailed numerical calculations, the report presents a series of findings comparing the effectiveness and expected collateral damage of nuclear EPW and surface nuclear weapons under a variety of conditions.

Minimum Deterrence: Examining the Evidence Keith B. Payne, James Schlesinger, 2016-04-14 The National Institute for Public Policy's new book *Minimum Deterrence: Examining the Evidence* is the first of its kind. Dr. Keith Payne, former Secretary of Defense, James Schlesinger, and an unparalleled bipartisan group of senior civilian and military experts critically examine eight basic assumptions of Minimum Deterrence against available evidence. In general, Minimum Deterrence does not fare well under the careful scrutiny. Proponents of a Minimum Deterrent US nuclear force posture believe that anywhere from a handful to a few hundred nuclear weapons are adequate to deter reliably and predictably any enemy from attacking the United States now and in the future. Because nuclear weapons are so destructive, their thinking goes, no foreign leader would dare challenge US capabilities. The benefits advocates claim of reducing US nuclear weapons to the minimum level needed are better relations with Russia and China, reinforcement of the arms control and Nonproliferation Treaty, billions of defense dollars in savings, and greater international stability on the way to nuclear zero. As political pressure builds to pursue this vision of minimum US deterrence, *Minimum Deterrence: Examining the Evidence* stands as the seminal study to address the many claims of great benefit using available evidence. This book was published as a special issue of *Comparative Strategy*.

U.S. Nuclear Weapons Policy George Bunn, Christopher F. Chyba, 2007-08-29 A Brookings Institution Press and the Center for International Security and Cooperation publication. What role should nuclear weapons play in today's world? How can the United States promote international security while safeguarding its own interests? *U.S. Nuclear Weapons Policy* informs this debate with an analysis of current nuclear weapons policies and strategies, including those for deterring, preventing, or preempting nuclear attack, preventing further proliferation,

to nations and terrorists modifying weapons designs and revising the U S nuclear posture Presidents Bush and Clinton made major changes in U S policy after the Cold War and George W Bush s administration made further more radical changes after 9 11 Leaked portions of 2001 s Nuclear Posture Review for example described more aggressive possible uses for nuclear weapons This important volume examines the significance of such changes and suggests a way forward for U S policy emphasizing stronger security of nuclear weapons and materials international compliance with nonproliferation obligations attention to the demand side of proliferation and reduced reliance on nuclear weapons in U S foreign policy **U.S.**

Congress,2002 **Detering International Terrorism and Rogue States** James H. Lebovic,2007-01-24 This new study challenges the widely held view that many current US adversaries cannot be deterred maintaining that deterrence is not a relic of the Cold War period and that it should shape US policies toward so called rogue states and terror groups James Lebovic argues that deterrence principles continue to apply and focuses upon the three pillars of the Bush administration s national security policy missile defence which preoccupied the administration until September 11 2001 pre emption which became the US focus with the September 11 attacks and US success in overthrowing the Taliban regime in Afghanistan homeland security which the administration has portrayed as more a natural response to threat than an aspect of policy that must be reconciled with the other pillars Detering International Terrorism and Rogue States asserts that bad offences and defences have been endemic to the current US policy approach leading US policy makers to pursue policies that require them to do everything without adequate concern for resource trade offs overreach and unintended consequences This book will be of great interest to students of US foreign policy national and international security terrorism and international relations in general Appropriations, Budget Estimates, Etc United States. Board was created at the request of then Chief of Naval Operations Admiral Elmo R Zumwalt Jr As stated in his request to the National Academy of Sciences he thought it important for the Navy to have an outside resource to which it could turn for independent and outside counsel on any area of its responsibilities involving the interplay of scientific and technical matters with other national issues Admiral Zumwalt together with Under Secretary of the Navy Honorable David S Potter and President of the National Academy of Sciences Dr Philip Handler recognized the importance of not only continuing but also focusing and strengthening the relationship that had existed between the National Academy of Sciences and the Department of the Navy since the Academy s creation in 1863 To commemorate this special anniversary Naval Studies Board 40th Anniversary provides an overview of the history mission and accomplishments of the Board In the coming years the Naval Studies Board will continue to serve as a source of independent long range scientific and technical planning advice for the nation s naval forces It will also work to ensure that the relationships between the operational science engineering and technical communities remain as strong and productive as ever to ensure that progress continues in areas most critical to meeting future naval forces needs

You Are Here Hiawatha Bray,2014-04-01 The story of the rise of modern navigation technology from radio location to GPS and the consequent decline of privacy What does it mean to never get lost You Are Here examines the rise of our technologically aided era of navigational omniscience or how we came to know exactly where we are at all times In a sweeping history of the development of location technology in the past century Bray shows how radio signals created to carry telegraph messages were transformed into invisible beacons to guide ships and how a set of rapidly spinning wheels steered submarines beneath the polar ice cap But while most of these technologies were developed for and by the military they are now ubiquitous in our everyday lives Our phones are now smart enough to pinpoint our presence to within a few feet and nosy enough to share that information with governments and corporations Filled with tales of scientists and astronauts inventors and entrepreneurs You Are Here tells the story of how humankind ingeniously solved one of its oldest and toughest problems only to herald a new era in which it s impossible to hide
