## **Efficient Monopolies The Limits Of Competition In The European Property Insurance Market:**

**Efficient Monopolies** Thomas von Ungern-Sternberg, 2004-02-26 This book presents startling evidence that state monopolies can produce better outcomes than the free market It provides an empirical comparison of the property insurance market in five European countries Britain Spain France Switzerland and Germany The market and cost structures of insurers in each country are described and particular features of each market and the outcomes for customers examined The regulatory frameworks vary widely from country to country and so do the market outcomes both in terms of premium level and in terms of available insurance cover In view of the increase in major floods and other forms of natural damage such as subsidence over the last decades the non availability of insurance cover in many competitive insurance systems is likely to become a major political issue This book shows that state monopoly is an adequate policy response Competitive insurance systems are shown to provide incomplete cover at a substantially higher cost In mixed systems where the private sector can obtain reinsurance from the state such a system is being tried in France the state tends to end up paying most of the costs it reinsures most of the bad risks while the private insurance companies keep most of the premium income The book will be of interest to academic economists interested in privatization regulation the theory of the firm and insurance Policy makers concerned with regulation and privatization Insurance companies regulators and analysts

**Research Handbook on Climate Change Adaptation Law** Verschuuren, Jonathan, 2022-06-14 This thoroughly revised Research Handbook on Climate Change Adaptation Law brings together leading scholars in the field to summarise and assess key topics including tort and insurance law disaster law water law and marine law as well as biodiversity law and pollution control

**Law and the Management of Disasters** Alexia Herwig, Marta Simoncini, 2016-12-01 Disasters raise serious challenges for contemporary legal orders they demand significant management but usually amidst massive disruption to the normal functioning of state authority and society When dealing with disasters law has traditionally focused on contingency planning and recovery More recently however resilience has emerged as a key concept in effective disaster management policies and strategies aiming at minimising the impact of events so that the normal functioning of society and the state can be preserved This book analyses the contribution of law to resilience building by looking at law s role in the different phases of the disaster regulatory process risk assessment risk management emergency intervention and recovery More specifically it addresses how law can effectively contribute to resilience oriented disaster management policies and what legal instruments can support effective resilience building

**Compensating Catastrophe Victims** Véronique Bruggeman, 2010-01-01 This book shows that amelioration of the current compensation solutions for disaster victims is indeed a possibility In a heated yet often poorly informed debate it offers clarity and insights regarding the financial compensation for victims of catastrophes which in addition to raising academic interest are certain to help build a framework for future policymakers and lawmakers faced with shaping compensation programmes for catastrophe victims

*Civil Liability and Financial Security for Offshore Oil and Gas*

*Activities* Michael Faure, 2017 7 2 1 2 Application to Offshore Related Risks      **Limits to Privatization** Marianne Beishem, 2012 Limits to Privatization is the first thorough audit of privatizations from around the world It outlines the historical emergence of globalization and liberalization and from analyses of over 50 case studies of best and worst case experiences of privatization it provides guidance for policy and action that will restore and maintain the right balance between the powers and responsibilities of the state the private sector and the increasingly important role of civil society The result is a book of major importance that challenges one of the orthodoxies of our day and provides a benchmark for future debate      **Policy Issues in Insurance Financial Management of Large-Scale Catastrophes** OECD, 2008-09-05 Contains three reports focusing on different institutional approaches to the financial management of large scale catastrophes the role of risk mitigation and insurance in reducing the impact of natural disasters and the importance of strategic leadership in the management of crises      **Regulating Disasters, Climate Change and Environmental Harm** Michael Faure, Andri Wibisana, 2013-01-01 This collection brings together insightful analyses of how developing countries can manage serious hazards Natural disasters have long been threats to developing countries but now climate change is increasing many risks and posing new challenges      Climate Change in the European Alps Adapting Winter Tourism and Natural Hazards Management OECD, 2007-01-18 The first systematic cross country analysis of snow reliability of Alpine ski areas under climate change for five countries in the region France Switzerland Austria Italy and Germany      *Natural Hazards, UnNatural Disasters* World Bank, United Nations, 2010-11-10 This book examines how to ensure that the preventive measures are worthwhile and effective and how people can make decisions individually and collectively at different levels of government      Dull Disasters? Daniel J. Clarke, Stefan Dercon, 2016-07-07 This is an open access title available under the terms of a CC BY 3 0 IGO licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations In recent years typhoons have struck the Philippines and Vanuatu earthquakes have rocked Haiti Pakistan and Nepal floods have swept through Pakistan and Mozambique droughts have hit Ethiopia Kenya and Somalia and more All led to loss of life and loss of livelihoods and recovery will take years One of the likely effects of climate change is to increase the likelihood of the type of extreme weather events that seems to cause these disasters But do extreme events have to turn into disasters with huge loss of life and suffering Dull Disasters harnesses lessons from finance political science economics psychology and the natural sciences to show how countries and their partners can be far better prepared to deal with disasters The insights can lead to practical ways in which governments civil society private firms and international organizations can work together to reduce the risks to people and economies when a disaster looms Responses to disasters then become less emotional less political less headline grabbing and more business as usual and effective The book takes the reader through a range of solutions that have been implemented around the world to respond to disasters It gives an overview of the evidence on what works and what doesn't and it examines the crucial issue of disaster risk financing

Building on the latest evidence it presents a set of lessons and principles to guide future thinking research and practice in this area

**The Oxford Handbook of Urban Economics and Planning** Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics
