Cases on Adoption, Diffusion and Evaluation of Global E-Governance Systems: Impact at the Grass Roots

Rahman, Hakikur,2010-08-31 This book accommodates theories issues and methodologies for designing implementing and operating e government systems presenting cases covering a variety of services and applications that have been improving the governance of nations and economies Provided by publisher *ICT, Public Administration and Democracy in the Coming Decade* A.J. Meijer,F. Bannister,M. Thaens,2013-06-20 The physicist Neils Bohr allegedly wrote that Prediction is very difficult especially about the future Many academics believe that serious scholars should never attempt to write about the future but some awareness of the ways in which the future of e government may evolve is needed if well grounded long term decisions about issues such as infrastructures institutions and educational programs are to be made In addition future oriented research is of the utmost importance for informed public debate about technological developments with far reaching societal implications This book marks the 25th anniversary of the permanent study group on e government of the European Group for Public Administration and the papers here were first presented at their 2012 meeting in Bucharest Romania The invited authors were not asked for rigorous analyses based on systematic empirical research or deeply rooted in a theoretical framework instead they were challenged to write thoughtful and measured but provocative essays about ICT and public administration in the coming decade Their contributions are reflections on the nature of new and emerging technologies in the public sector and their impact on government and on democracy itself The book is divided into three sections the past and present as starting point for thinking about the future of e government imagining the future of government and implications for research and practice The many questions raised by developments in ICT for future public administration are presented in a clear and thought provoking manner and merit more debate This volume represents a departure from the normal run of academic publications It is intended both to provoke academics and administrators to think about questions which will affect all of our futures and to offer a range of creative ideas about how the opportunities presented by technology can be exploited to provide better government and governance **Handbook of Research on E-Services in the Public**

Sector: E-Government Strategies and Advancements Al Ajeeli, Abid Thyab,Al-Bastaki, Yousif A. Latif,2010-08-31 This book assists its readers in recommending formulation of ICT strategies for e government implementation and maintenance from the perspective of acknowledging the importance of e Governance for building institutions to achieve transparency and accountability and eventually democratic governance Provided by publisher *Policy-Making in the GCC* Neil Quilliam,Mark C. Thompson,2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in

prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike
