## **Einsteins Clocks Poincars Maps Empires Of Time:**

Einstein's Clocks, Poincaré's Maps Peter Galison, 2004 In May 1905 Einstein published his theory of relativity changing time forever This title is a dramatic account of the quest to synchronize time that culminated in the revolutionary theory As Peter Galison argues relativity was borne of urgent practical necessity Clocks and trains telegraphs and colonial conquest the challenges of the late 19th century provided an indispensable real world background to the theoretical breakthrough Europe's burgeoning rail network Only a century ago the continent had hundred of time zones and no universal system for synchronizing them Given that local time could vary from town to town scheduling rail services was hard but vital not least to stop trains from colliding as they hurtled in opposite directions along single tracks In his role as president of the French Bureau of Longitude a remit of which was to map colonial Africa Henri Poincare grappled with a similar issue Synchronized clocks set by telegraph signal from Paris were necessary to determine longitude and provide the precise coordinates his cartographers needed to tell the story of these two giants whose concrete preoccupations engaged them in a silent race towards a theory that overturned 200 years received thinking *Einstein's Clocks, Poincaré's Maps* Peter Louis Galison, 2003 In May 1905 Albert Einstein changed time forever his theory of relativity had practical consequences that changed the world Only a century ago Europe had a huge number of local time zones and no proper system of synchronizing them This threatened chaos particularly on the railways and communications Synchronized time was necessary to create timetables for passengers and stop trains from crashing as they hurtled in opposite directions along single tracks

**Einstein's Clocks and Poincare's Maps: Empires of Time** Peter Galison, 2004-09-14 In Galison's telling of science the meters and wires and epoxy and solder come alive as characters along with physicists engineers technicians and others Galison has unearthed fascinating material New York Times Screening the Operatic Stage Christopher Morris, 2024-03-29 An ambitious study of the ways opera has sought to ensure its popularity by keeping pace with changes in media technology From the early days of television broadcasts to today's live streams opera houses have embraced technology as a way to reach new audiences But how do these new forms of remediated opera extend amplify or undermine production values and what does the audience gain or lose in the process In Screening the Operatic Stage Christopher Morris critically examines the cultural implications of opera's engagement with screen media Foregrounding the potential for a playful exchange and self awareness between stage and screen Morris uses the conceptual tools of media theory to understand the historical and contemporary screen cultures that have transmitted the opera house into living rooms onto desktops and portable devices and across networks of movie theaters If these screen cultures reveal how inherently technological opera is as a medium they also highlight a deep suspicion among opera producers and audiences toward the intervention of media technology Ultimately Screening the Operatic Stage shows how the conventions of televisual representation employed in opera have masked the mediating effects of technology in the name of fidelity to live performance

**The Many Voices of Modern Physics** Joseph E. Harmon, Alan G. Gross, 2023-03-07 The Many Voices of Modern Physics follows a revolution that began in 1905 when Albert Einstein published papers on special relativity and quantum theory. Unlike Newtonian physics, this new physics often departs wildly from common sense, a radical divorce that presents a unique communicative challenge to physicists when writing for other physicists or for the general public and to journalists and popular science writers as well. In their two long careers, Joseph Harmon and the late Alan Gross have explored how scientists communicate with each other and with the general public. Here they focus not on the history of modern physics but on its communication. In their survey of physics communications and related persuasive practices, they move from peak to peak of scientific achievement, recalling how physicists use the communicative tools available in particular thought experiments, analogies, visuals, and equations to convince others that what they say is not only true but significant, that it must be incorporated into the body of scientific and general knowledge. Each chapter includes a chorus of voices from the many celebrated physicists who devoted considerable time and ingenuity to communicating their discoveries to the science journalists who made those discoveries accessible to the public and even to philosophers, sociologists, historians, an opera composer, and a patent lawyer. With their final collaboration, Harmon and Gross offer a tribute to the communicative practices of the physicists who convinced their peers and the general public that the universe is a far more bizarre and interesting place than their nineteenth-century predecessors imagined.

**The Phenomenology of Real and Virtual Places** Erik Malcolm Champion, 2018-10-26 This collection of essays explores the history, implications, and usefulness of phenomenology for the study of real and virtual places. While the influence of phenomenology on architecture and urban design has been widely acknowledged, its effect on the design of virtual places and environments has yet to be exposed to critical reflection. These essays from philosophers, cultural geographers, designers, architects, and archaeologists advance the connection between phenomenology and the study of place. The book features historical interpretations on this topic as well as context-specific and place-centric applications that will appeal to a wide range of scholars across disciplinary boundaries. The ultimate aim of this book is to provide more helpful and precise definitions of phenomenology that shed light on its growth as a philosophical framework and on its development in other disciplines concerned with the experience of place.

**William Kentridge & Peter L. Galison** Peter L. Galison, William Kentridge, 2011-06-10 Unsere Auffassungen von Zeit verändern sich fortwährend auf vielschichtige Art und Weise. Dies ist eine Untersuchung dieser Verschiebungen und Kämpfe in Form von Zeichnungen und Texten, Musik und Bewegung bis hin zu Filmen und Konzepten. Gegen Ende des 19. Jahrhunderts wurde Zeit bergreifend organisiert. Differente Stadien der ganzen Länder wurden ihrer eigenen Zeit beraubt, als die Uhren mithilfe von Signalen synchronisiert wurden. Albert Einstein stieß mit seiner radikalen Idee, die die Vorstellung eines überallhervorbrechenden Tiktak zugunsten von Zeiten, die nicht Zeit sind, auf erbitterten Widerstand. Auch in unserem eigenen Zeitalter wird die Zeit wieder durcheinandergewirbelt: die Zeit wird mit Informationen gekreuzt, sie wird herausgefordert am Horizont.

*Painting US Empire* Maggie M. Cao, 2025-01-03 A fresh look at the global dimensions of US painting from the 1850s to 1898 *Painting US Empire* is the first book to offer a synthetic account of art and US imperialism around the globe in the nineteenth century In this work art historian Maggie M Cao crafts a nuanced portrait of nineteenth century US painters complicity with and resistance to ascendant US imperialism offering eye opening readings of canonical works landscapes of polar expeditions and tropical tourism still lifes of imported goods genre paintings and ethnographic portraiture Revealing how the US empire was hidden in plain sight in the art of this period Cao examines artists including Frederic Edwin Church and Winslow Homer who championed and expressed ambivalence toward the colonial project She also tackles the legacy of US imperialism examining Euro American painters of the past alongside global artists of the present Pairing each chapter with reflections on works by contemporary anticolonial artists including Tavares Strachan Nicholas Galanin and Yuki Kihara Cao addresses important contemporary questions around representation colonialism and indigeneity This book foregrounds an underacknowledged topic in the study of nineteenth century US art and

illuminates the ongoing ecological and economic effects of the US empire      *The Poincaré Conjecture* Donal O'Shea, 2008-10-30 The Poincaré Conjecture tells the story behind one of the world's most confounding mathematical theories. Formulated in 1904 by Henri Poincaré, his Conjecture promised to describe the very shape of the universe but remained unproved until a huge prize was offered for its solution in 2000. Six years later, an eccentric Russian mathematician had the answer. Here Donal O'Shea explains the maths behind the Conjecture and its proof and illuminates the curious personalities surrounding this perplexing conundrum along the way, taking in a grand sweep of scientific history from the ancient Greeks to Christopher Columbus. This is an enthralling tale of human endeavour, intellectual brilliance and the thrill of discovery.

*Postcolonial Opera* Juliana M. Pistorius, 2025-05-27 Postcolonial Opera examines the social and political role of opera in the postcolony. Taking the multimedia operatic experiments of William Kentridge, South Africa's most celebrated contemporary visual artist, as a starting point, author Juliana M. Pistorius investigates contemporary opera's potential to process the troubled histories that haunt post and decolonial societies.      *Einstein's Opponents* Milena Wazeck, 2014-01-09 Exploring the ferocious opposition which once surrounded the theory of relativity, this fascinating account details the strategies and motivations of Einstein's detractors. A unique insight into the dynamics of scientific controversies, ideal for anyone interested in the history and philosophy of physics, popular science and the public understanding of science.

**Albert Einstein**, Bertrand Russell and Albert Einstein – Builders of Peace Claudio Giulio Anta, Bertrand Russell and Albert Einstein had very different cultural backgrounds and personalities. At the same time, they were united in their tenacious battle for peace, which began with the Great War and culminated in their famous 1955 Manifesto. Through various kinds of pacifism, they sought to encapsulate the dilemmas and problems that derived from the changed political conditions of his time: the beginning of the Great War, the creation and failure of the League of Nations, the affirmation of totalitarian regimes, the outbreak of the Second World War, the origin of the atomic age and the escalation of the Cold War, the establishment of the UN with its political and institutional weakness and the need for a world government in the form of a world federation. Their reflections on the subject of peace led them into dialogue with some of the greatest figures of their time: R. Rolland, Th. Woodrow Wilson, V. I. Lenin, F. D. Roosevelt, J. F. Kennedy, N. Khrushchev, F. Castro, S. Freud, L. Szilard and E. Reves.      *The Cosmic Time of Empire* Adam Barrows, 2011 Combining original historical research with literary analysis, Adam Barrows takes a provocative look at the creation of world standard time in 1884 and rethinks the significance of this remarkable moment in modernism for both the processes of imperialism and for modern literature. As representatives from twenty-four nations argued over adopting the Prime Meridian and thereby measuring time in relation to Greenwich, England, writers began experimenting with new ways of representing human temporality. Barrows finds this experimentation in works as varied as Victorian adventure novels, high modernist texts and South Asian novels, including the work of James Joyce, Virginia Woolf, H. Rider Haggard, Bram Stoker, Rudyard Kipling and Joseph Conrad. Demonstrating the investment of modernist writing in the

problems of geopolitics and in the public discourse of time Barrows argues that it is possible and productive to rethink the politics of modernism through the politics of time *The Turn to Transcendence* Glenn Olsen, 2010-06 A bold and provocative assessment of the current prospects for religion in our culture *Literature and Modern Time* Trish Ferguson, 2020-05-06 Literature and Modern Time is a collection of essays that explore literature in the context of a wave of challenges to linear conceptions of time introduced by thinkers such as Bergson Einstein McTaggart Freud and Nietzsche These challenges were not uniform in character The volume will demonstrate that literature of the era under scrutiny was not simply reacting to new theories of time in some cases it is actually inspiring and anticipating them Thus Literature and Modern Time promises to offer a genuine dialogue between literature and time theory and in doing so will uncover and examine influences and connections sometimes unexpected between philosophers and writers of the era It will examine literary attempts to transcend and escape time and also challenge rupture based accounts of modernist time by demonstrating that literary texts commonly associated with brokenness decline or stasis also at the same time maintain faith in healing renewal and mobility This collection contains interdisciplinary research of the quite highest kind to see so many different kinds of time narrative historical mechanical subjective non linear time myth and nostalgia as well as time space discussed here is very stimulating indeed Professor Simon James **Networking Operatic Italy** Francesca

Vella, 2022-01-26 A study of the networks of opera production and critical discourse that shaped Italian cultural identity during and after Unification Opera's role in shaping Italian identity has long fascinated both critics and scholars Whereas the romance of the Risorgimento once spurred analyses of how individual works and styles grew out of and fostered specifically Italian sensibilities and modes of address more recently scholars have discovered the ways in which opera has animated Italians social and cultural life in myriad different local contexts In *Networking Operatic Italy* Francesca Vella reexamines this much debated topic by exploring how where and why opera traveled on the mid nineteenth century peninsula and what this mobility meant for opera Italian cities and Italy alike Focusing on the 1850s to the 1870s Vella attends to opera's encounters with new technologies of transportation and communication as well as its continued dissemination through newspapers wind bands and singing human bodies Ultimately this book sheds light on the vibrancy and complexity of nineteenth century Italian operatic cultures challenging many of our assumptions about an often exoticized country

**Watching Cosmic Time** Matthew Dwight Moore, 2022-10-26 How do the suspense films of Alfred Hitchcock Orson Welles and Carol Reed allow us special insight into the popular mentality of their contemporaries contemporaries who went to war against the forces of Adolf Hitler How did midcentury films that fetishized clocks and time keeping devices as diverse as Peter Pan High Noon Rear Window Shadow of a Doubt The Stranger and Odd Man Out produce unique experiences that invited audiences to literally watch cosmic time What role did cinema audiences play in perpetuating the presumption that order exists in the universe and how have the polyvalent institutions of church and state implicated human agency in such perpetuation This full length academic treatment of the topic employs formal film analysis that is situated squarely within historical studies and addresses these cinematic and phenomenological questions and more
